

VISION

Be leaders with our innovation, Brand, response speed and technology; in the design and manufacture of integral clamping solutions. Being agile and able to respond to markets and changing customer demand.

MISSION

Provide solutions that exceed customer expectations in the design of clamping devices. As the most trusted partner in industrial machining processes; as a passionate team and united by the same values.

ZPWORKHOLDING

QUALITY POLITICS

OUR HISTORY

"It is our commitment to exceed customer expectations in the design and manufacture of hydraulic workholding fixtures for the automotive industry that meets the requirements and demands of the sector. Continuously improving our quality management system and production processes, through their effectiveness and the efficiency of our staff. Allowing us to grow profitably as a socially responsible company, ensuring the welfare of our human capital. 100% Mexican company focused on the design and manufacture of hydraulic workholding fixtures for the automotive industry."

It was founded in 2017 with the objective of providing an integral solution to the automotive industry in the design and manufacture of hydraulic clamping devices.

We currently have the technological tools that allow us to exceed customer expectations in innovation and product development.

In ZP we use our wealth of design and manufacturing experience coupled with the latest technology to deliver the most appropriate and effective custom fixture for you needs. We consider every element of the fixture to ensure your Project is the most efficient and effective as possible.
