Meticulous Service
tailored to your needs

Who is O’Mara, Inc.

Innovation is at the core of everything that was created at O’Mara, Inc. founded by Joseph O’Mara Jr. in 1970.

The color authority

We know color – we’ve created over 39,000 of them since O’Mara was founded. Stock or customized, unsurpassed performance and consistent quality are our promise to you. Read more about our color.

Unparalleled service

We provide personal service the industry’s giants can’t, and it’s helped O’Mara become the preferred choice in markets including automotive fabrics, industrial, narrow-elastics waist bands, denim, sheer hosiery, socks, apparel, and contract upholstery, worldwide.- textil nesecita.

Manufactured in the USA

O’Mara delivers supply chain simplicity and transparency by servicing domestic and global markets from our state-of-the-art extruding and texturing plants in North Carolina.

INNOVATING FOR THE ENVIRONMENT ECO SENSE

At O’Mara, we’re transforming waste into wonders: yarns with the smallest carbon footprint ever. Our “True-Green” ECOsense is the only polyester filament yarn made from pure, 100% post-consumer plastic bottles, unlike others using post-industrial wastes with less environmental benefit. This helps reduce the demand for new petroleum and the energy needed to produce virgin polymers, which means less greenhouse gas and non- biodegradable waste in landfills.

YARNS FOR AUTOMOTIVE

With the yarns we offer, our customers can produce the style and type of fabrics, for seat covers and door panels, the industry is looking for today.

UPHOLSTERY & MATTRESS

In our catalogue, we have a wide range of possibilities, for customers who produces upholstery fabrics and mattress ticking.

YARNS FOR APPAREL

We offer ECO Sense yarns, PBT yarns and some others, for the production of high performance fabrics for apparel.
