# Looking for Steel?

- We don't just sell steel, we offer **Solutions** that surpass our customer's expectations when it comes to Hot Rolled Carbon Steel Plate, Sheet or BTS Fabrications

- Why **Steel Warehouse?**

- We are an integrated STEEL SERVICE CENTER that provides numerous processing services for the delivery of production-ready steel to Manufacturers (OEMs) in a wide range of industries (Heavy equipment, Agricultural, Energy, Transportation, Construction, Pressure Vessels amongst others), and to fabricators & other processors

- We are a FAMILY OWNED and managed company headquartered in South Bend, Indiana. We operate 12 facilities in the US, 1 in Brazil and 1 in Mexico

- **Steel Warehouse MEXICO** was the first venture outside of the US, started operations in January 2007 and it is located in Escobedo, within the metro area of Monterrey, the heart of industrial development of Mexico. We have 20 acres of rail accessible land and we are just 2 miles from a major highway intersection, as we became the fourth of the eight TEMPER Cut To Length (T-CTL) Lines that we currently operate

# Not “any” steel... the right Steel

- Whether you are looking for a “simple” plate or sheet, or the sophisticated piece of metal that will be part of a state of the art equipment or machinery, we will have the right solution for you!

If the steel that you are looking for requires any of the following...

- **Tight tolerances?**
- Goes into an **Exposed Surface** application?
- Needs to be **Memory Free?**
- **Improved productivity** during your laser or burning operations?
- Improved **yield?**
- **High Strength?**
- **Abrasion resistant or Weathering?**
- Availability in both Metric and Imperial sizes

- The experience with Steel Warehouse means that our whole team will collaborate with you and we will develop **the right solution for your application**
- Besides, we know that it is **not just the right Steel...** is a Solution that comes with the accurate understanding of your needs, with the **right delivery** method, the proper planning & forecasting, **financially accessible** (credit terms), easy to do business with and with a great team of responsive people that will **make sure that your steel gets where it needs to be, on time, in the right quantities and qualities**, and with a **competitive price** that will lower your Total Cost of Operations (TCO).

# Get in touch with us!

- We are **the first Temper Mill in México**, successfully operating since 2007, capable of processing High Strength steel from 0.060" up to 1", and from 36" up to 96" wide.
- We offer Laser and Plasma Cutting, Bending and Roll to Crown
- We can offer some secondary fabrication capabilities (upon demand)

- Our "signature" process is the **Temper Pass**, which cold reduces the steel that has been previously coiled (with way better surface compared to Discrete Plate) through a combination of tension and a large pressure force, creating an **Stress Relief** process, reorganizing the steel microstructure and hence, deleting the "Coil Memory" defect, also known as "spring back"
- We are conveniently located for domestic and international sourcing. Leveraging with our purchasing power of over **1.5 Million tons** of steel every year and supported by the strength of our partnerships with the leading edge steel mills of the world (including **TATA Steel Europe**, our partner of 53 years and counting), most of the US mills and all the Mexican steel mills, **we are prepared to offer you a wide array of alternatives to find the one that best suits your business needs**
