

>INDIRECT SUPPLIER

Gishner INC (Global Integration Solutions in Headway Networking and Enterprise Robots) is a Mexican company founded in 2020 with the purpose of supporting the automation and robotics needs of the industry in the region.

Our commitment is to develop integral projects that offer the highest quality solutions to our clients, safeguarding the integrity of our employees through their professional and human development, transmitting and sharing this with our customers in the quality of the product and the cordial relationship between both parties.

PRODUCT

Design, Manufacturing and Integration of Turn Key Projects, including Robotic process, special process machinery, fixtures, EOAT's, JIG's, Marking Laser Process. Our experience and expertise is to design a mechanical and mechatronic integral solution to accomplish with our customer's specifications, using and applying them standards. Our process is to make a:

- | | |
|---------------------------------|------------------------------------|
| 1 General Concept | 5 Integrate all Control Components |
| 2 Validate it with the customer | 6 Programming of the equipment |
| 3 Develop the final engineering | 7 Final Validation |
| 4 Manufacture the equipment | 8 Installation of the equipment |

CAPABILITIES

Our engineering team is made up of engineers specializing in mechanical and mechatronic design with more than 10 years of experience in the development of turnkey projects.

We have a 3,000m² shop floor area for the integration of the projects with all the facilities to the testing process.

Manufacturing process is supported by an 11,000 m² working area where is installed the following process: Plasma Cutting, Laser Cutting, GMAW Welding, CNC Machining, Conventional Machining, Shotblast, Powder Coating.
