NAGASE America Automotive Supplier Group

Supplying automotive solutions for the future

NAGASE America LLC is a global leader in innovative products and solutions through our expertise in chemicals, plastics, electronics, automotive, and life sciences. Founded in 1832, we have grown to include over 100 companies in 27 countries and regions, with more than 6,000 employees worldwide, connecting the world with high-end materials and technologies and strong manufacturing research and development capabilities. We believe in the power of bringing together good science with great people to create customized solutions for the world's changing economic, environmental, and social needs.

Our interior supplier group specializes in supplying high-quality, price-competitive, sustainable, and lightweight products to the global automotive market. Our joint partnerships and network of experienced interior parts suppliers, both domestically and globally, allow us to successfully supply products that meet the needs of OEM and Tier 1 customers in the industry. Our adept ability to manufacture, warehouse, quality control, ensure a reliable supply chain, and import/export large quantities of automotive parts and materials adds intrinsic value to our overall function as a global interior supplier.

 Contact our sales team today for innovative automotive solutions.

Our Parts and Materials

Interior Soft Trim Materials

Synthetic Leathers

- Vegan/sustainable materials
- Wet/dry PUR, PVC, TPO, TPU, TPO/PPF, PVC/PPF
- In-house grain design and development capabilities
- Smart surfaces (anti-bacterial, stain-resistant, and engineered performance)

Foam

- On-site foam manufacturing, flame lamination, engineering, and development
- PU foams for seating, slabs, and slitting
- Ruseela EPDM sealant foam – a low-compression material with weather-resistance

HVAC Ducting

- Conventional Blow Molded HVAC
- Lightweight HVAC Foam Ducts

Light Weight Cargo Management/ Cargo Systems

- Engineered Substrates
 - Antislip, chemical resistance cargo van flooring
- Frunk and Trunk Bin Dividers
- FLP Load Floor
- FLP Spare Tire Covers and FLP Lite S Boards

NCU Materials

- Epoxy potting Materials and Adhesives
- Magnet Bonding for Motor

EV/HEV

- Sensor Cores and Wire Forming
- Custom Insert Molded Parts
- Thermal Interface Materials
- Battery Materials and Separators

Coating Materials

- Self-healing Coating
- Anti-fog Coating
- Haptic (soft-hard, rough-smooth) Coating

NAGASE North America Manufacturing

Sustainability Stance

We supply lightweight components, vegan materials, and technology and products that support the advancement of electric vehicles (EVs), which result in reduced carbon emissions. These solutions, along with other green initiatives, are our contribution to a more sustainable future.
