Capital Structure	100% Domestic, 100% Private
MISSION	To satisfy the Clutch and Brake market at an excellent level. To be a company that, through the union, effort and achievements of its team members; our stockholders, workers, customers and suppliers feel proud about it.
VISION	Develop a company that innovates, evolves, reaches success and lasts through time in the Clutch and Brake markets; promoting the reuse of components and the preservation of the ecological environment
Quality Objectives	<ul style="list-style-type: none">❖ Maintain our Quality System updated and operative❖ Train, Evaluate and Develop our staff❖ Operate under the scope of Safety and Continuous Improvement❖ Satisfy our Customer needs, by offering new products with quality and good performance, with personalized and excellent attention
Design Focus	The Vantech Product Line is the result of considering that strength, performance and long life are the basic attributes that a clutch disc and a clutch facing must have to put up with real operation conditions.

Description of Manufacturing Processes including a brief description of main machinery

a) Clutch Disc Division [disc components + assembly]

Raw Material: Flat Steel (1018, 1045 and 1075), Steel Forges (1045 and CrMo), Springs, Rivets.

- + Stamping Presses
- + Laser Cut Machine
- + Machining (CNC and conventional Lathes)
- + Broaching
- + Drilling Benches
- + Heat Treatment Area
- + Finish Area (Black Phosphate)
- + Assembly Line
- + Electronic Balancing Machine

b) Clutch Cover Components Division [bearing cage, retainers, sleeves]

Raw Material: Cast Iron, 1045 Steel Bar

- + Machining (CNC Lathes and Vertical Machining Center)
- + Broaching
- + Heat Treatment Area
- + Bushing assembly

c) Clutch Facing Division (organic facings)

[Regular facings for all kind of vehicles and "steel back" for Performance Cars]

Raw material: Yarns, Rubber, Resins, plus a variety of chemical products, flat steel.

- + Reactor and Impregnation Towers
- + Weaving Machines, Vulcanize Presses, Curing Oven
- + Finish Area (Grinding, Drilling, Counter Boring)
- + Chemical Laboratory
- + Inertia Dynamometer for Performance Test

d) Tool Shop to design and manufacture: Cutting and Embedding Dies, Vulcanize and Drilling Molds, Assembly Devices, Gauges for QA Processes

Tier 3 Experience. From 2005 to 2009 we manufactured Embedded Plates to Contitech (San Luis Potosí) for their Suspension Air Bags.
