

Vision. Trust. Performance.

An innovative OEM/ODM electronics design and manufacturing company. MYE products involve a high level of embedded software engineering and backend system application development to produce seamless products that make a difference.

Specialized OEM / ODM Services

MYE Technologies specializes in OEM / ODM design and manufacturing services. Our extensive product development experience began over 25 years ago, and today, MYE technology is featured in leading consumer, fitness, automotive, and pro-audio music products worldwide. The MYE engineering team continues to meet the growing demands of the world's leading brands, bringing the highest level of expertise to every aspect of the development and manufacturing process to assure products exceed expectations.
