EN ESPUMAS

IES WE CAN!

WHO WE ARE

Ingenieriza en Espumas, S.A. de C.V. is a 100% Mexican company founded in 1992, dedicated to production, distribution and sale of flexible polyurethane foam in different densities, textures, colors and firmness. In addition to different materials such as PVC foam, EPDM, EVA, Neoprene, Polyethylene, among others.

Certified IATF-16949

WHAT WE DO

We make products (foams, seals, felts and foams for packaging) under specific customer designs that integrate, material, dimensions, specs to meet, etc. We also have a variety of adhesives that meet customer requirements. We offer alternative materials that have the same performance.

MARKET

INDUSTRIAL

Anti-vibration and soundproofing solutions, adhesives and attachments for finishes. Also packaging solutions

PHARMACEUTICAL

The pharmaceutical industry demands sterilized and quality products. Foam Engineering produces polyurethane specs that meet laboratory specifications to protect drugs.

AUTOMOTIVE

For each process within the automotive production lines, we have different materials, such as: Thinsulate, Neoprene, EVA, EPDM, PVC and Polyurethane Foam.

FURNITURE INDUSTRY

We cover different requirements ranging from the sale of block, laminated or dimensioned polyurethane foam, to more specific ones such as high or low density foams.

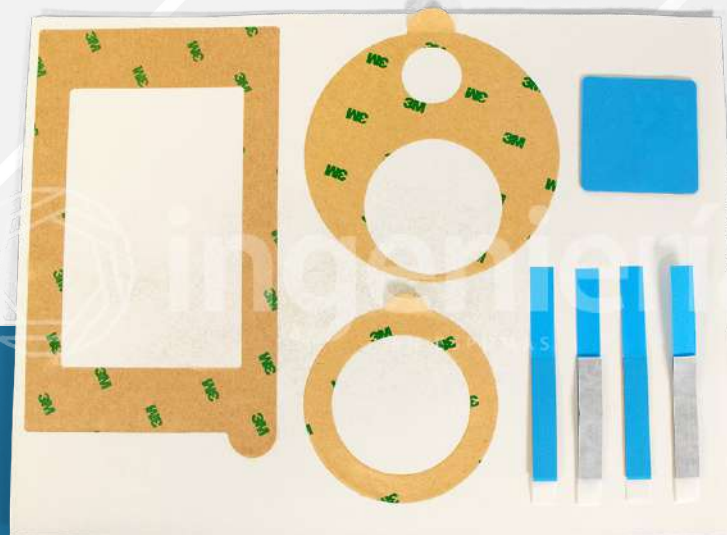

OFFICIAL CONVERTER AND DISTRIBUTOR (**SINCE 2004**)
