

Stevedoring | Warehousing | Trucking | Rail | Customs Brokerage Coordination | Industry Leading Shipping Technology

We are a general cargo logistics company based out of Monterrey, Mexico. With a focus on steel and other break-bulk commodities, we offer; stevedoring, warehousing, trucking, rail, and ocean freight services for both import and export shipments. Our clients typically include steel and commodity producers, ship lines, service centers, fabricators, and trading companies. Audaxia is comprised of a team of seasoned multi-national executives dedicated to having a positive and smart influence on the traditional shipping industry in Mexico. We offer an intelligent business standard, and elevated customer service practice to create a more sophisticated experience in this industry. One which modernizes shipping in Mexico.

Audaxia Logistics Network
United States & Mexico

The Audaxia logistics network is comprised of both public and private operations. We offer a combination of our own physical assets, as well as a portfolio of approved service providers which allows us to expand our reach throughout Mexico. Our group has its own terminals, warehouses, and trucks; but we also subcontract others to amplify our operational capacity. And as a team of international executives with several decades of experience operating in Mexico, we wish to extend that experience to you.
