

Value Proposition

Deliver reliable performance and quality at low cost rates in the following capabilities:

- > **Sheet Metal structural assembly**
- > **Composite structural assembly**
- > **Sealant application, painting & polishing**
- > **Electrical Wiring Installation**

A modern plant operated on Lean concepts, world-class manufacturing techniques and excellent performance processes

Certifications

- > **AS9100** (Quality Management System – Aerospace)
- > **EASA PART 21 SUB PART G** (Production Organisation Approval)
- > **NADCAP** (Chemical Processing)
- > **ISO 14001 / 45000** (Environmental Management System).

Key Capabilities

Metal Structure Assembly

- > Drilling / countersink / dimple processes
- > Solid / blind rivet installation
- > Hi-lok / Hi-lite / Jo-Bolt / Screw installation

- > Hydraulic system installation

Composite Structure Assembly

- > Lay up / Autoclave curing
- > Insert bonding / installation
- > Milling / jet melt application
- > Sanding / paint preparation
- > Tape and foam installation
- > CNC composite parts

Special Processes

- > Sealing / adhesive application
- > Primer / top coat / Polishing application
- > Electrical grounding

Additional Services

Engineering Services

- > Analysis and implementation of major / minor customer changes
- > State-of-the-art work instructions created onsite
- > Supply chain development
- > Tooling assembly repair / calibration (Laser tracker Leica AT402)

Clients & Industries

Commercial & Business Jets

- > Airbus
- > Gulfstream
- > Honda Jet
- > Bombardier

THE POWER OF 5

Mexcellence
