

Custom industrial stampings, secondary operations, and fasteners

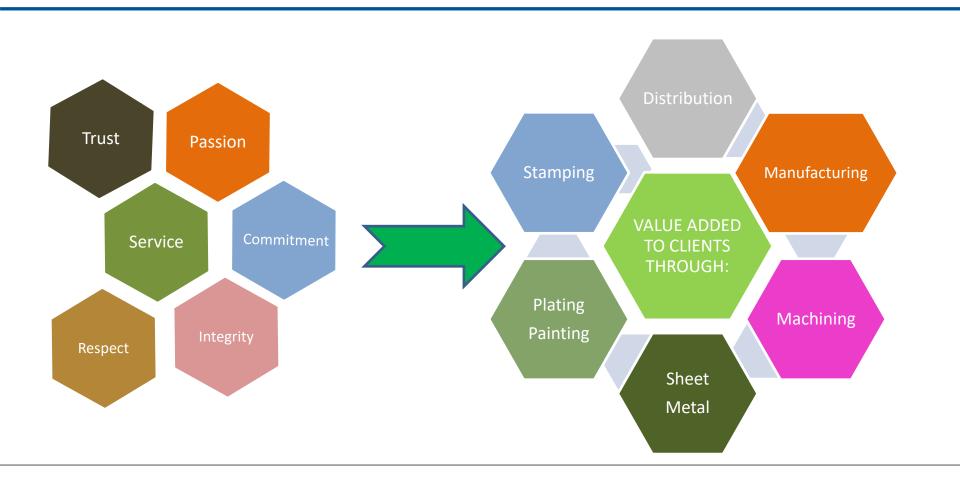

Getting to Know Us

Archer LLC: We are a leading company with integral solutions of great value, innovation and high quality, grew into a focus on providing customers with precision parts manufacturing, design, technical solutions enterprises of fastener distribution, commodity inventory management systems (VMI's), metal plating and finishes because we know that it's about a lot more than just sending you a part. It's about making sure it's the right part, on time, every time. Our commitment to supplying products with only the highest quality has been an integral part of our longevity and success in this business.

Our values to give our clients more value added

Where our products contribute

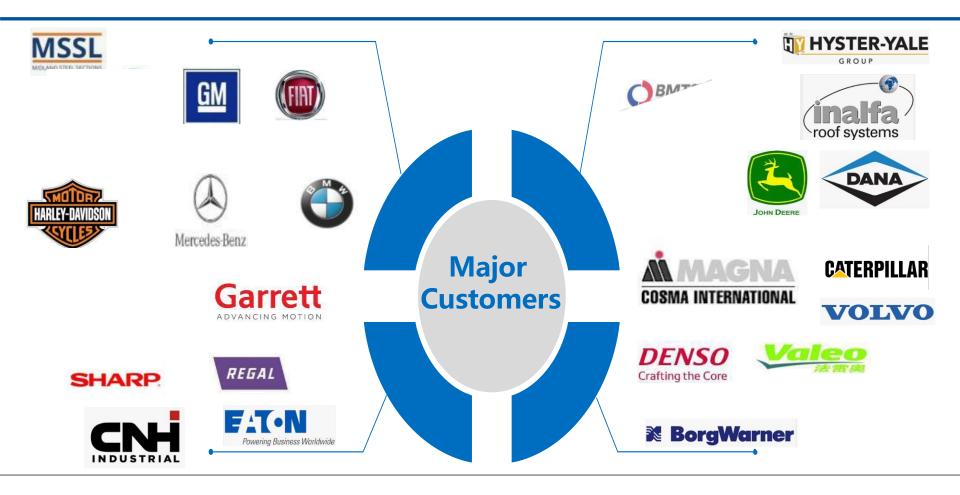

Our T2 Customers to OEMs

Metal Plating / Finishes

Process available:

- •Silver
- Nickel
- •Tin
- Bright Dip, Cleaning
- Iron Phosphate
- Zinc Phosphate
- Copper
- Conversion Coating

- LASER CUTTING MACHINE
- CNC MILLS
- CNC LATHES CONVENTIONAL LATHES
- CONVENTIONAL MILLS CYLINDRICAL GRINDING
- MACHINE HORIZONTAL GRINDING

Fine Blanking Machine up to 100 strokes per minute (800 kN) 80 to (400 kN) 40 to Stroke (1.97") 50mm

BACK PRESSURE

Nominal force (220 kN) 22 to V-RING Nominal force (250 kN) 25 to

TOOL DIMENSIONS

Lower Table - Width - (16.942")
430mm Lower table - Deep- (19.306")
490 mm Top Table - Width - (16.548")
420mm Top Table - Deep - (16.548")
420mm closing height max. (9.062 ")
230mm Carriage adjustment (3.152")
80 mm
Step between front uprights (17.73") 450 mm

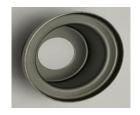

Combined Capacities

Production Capability:

Automotive Fastener (M1.6~M16) Shaft/Insert/nut (Brass, SS, M1~M10, 1~25mm length)

Monthly Production Capacity:

Automotive Fastener: 8 million Brass Insert/nut: 20 million

Major Manufacturing Process:

Heading, Threading, Heat Treat, Plating, Stamping
