

Precision manufacturing solutions for metal components

Our manufacturing facilities offer top-tier quality and competitive pricing:

Autana Invested facilities

Autana Managed facilities

Autana Partner facilities

Why companies choose to partner with us:

Mexico-based Operations: Autana's manufacturing facilities, based in Mexico, specialize in cross-border end-to-end solutions for the United States market.

Top-Tier Facilities: Autana holds AS9100D for aerospace and ISO 9001:2015 for quality management, alongside ISO 45001:2018 for occupational health and safety, and ISO 14001:2015 for environmental management. Our facilities also hold IATF 16949:2016 for automotive quality and ISO 13485:2016 for medical devices. We have expertise in FMEA, APQP, SPC, and MSA, and adhere to PPAP requirements.

Manufacturing Capabilities: We specialize in aluminum High Pressure Die Castings (HPDC), plastic injection molding, and CNC machining. Our world-class equipment includes LK and Lester machines for castings, with capacities ranging from 400 to 1,250 tons. For plastic injection molding, we have Belken, Euroinj, Taimex, and Tederic machines, ranging from 80 to 440 tons. Our CNC machining is equipped with Maincasa, Hartford, and HAAS technology.

Additional Finishes & Services: CNC milling, machining, polishing, heat treatment, media blasting, leak testing. Complete services including plating and painting, powder coat, wet spray, E-coat. Assembly, packaging, logistics, and fulfillment.
