

Who is Bead, and what do they do?

Bead was founded on a swaging process to make Bead Chain and continues to evolve today

- Precision interconnect company
- Customer focused – **Custom parts, quick & cost effective**
- Automated, scrap-less, repeatable, cold forming process
- Family owned, in business for over 100 years
- A division of Bead Industries, headquarters in Milford, CT

What we make

- Round, square and rectangular pin
- Lightweight hollow pins
- Pin assemblies

How we make it

- Swaging, a scrap-less, cold forming process
- Variety of base metals and plating options
- Customer features

Where used

- Custom metal interconnect pins for signal and power applications
- Metal electromechanical and mechanical components

Why Bead

- Cost effective, customer solutions with short lead-times
- Minimal tooling cost compared to other metal forming processes
