

# Dynacast Company Profile

Dynacast, a Form Technologies Company, is a leading global manufacturer of small and medium, engineered precision components utilizing proprietary multi-slide and conventional die casting technology and tooling techniques. With world-class technology and processes, Dynacast can serve any industry at virtually any volume with superior components and outstanding part to part consistency. The Form Technologies group of companies operates 30 design and production facilities in 18 countries worldwide, serving as a supply channel partner for over 2200 customers. Together, the group is focused on delivering the highest level of quality at scale.

## FAST FACTS

- > 21 facilities in 16 countries
- > 1900+ global customers
- > 7500+ employees
- > Hot chamber aluminum capability
- > Multi-slide die cast technology
- > Proprietary in-house machine building
- > 800+ machines ranging from 4 to 500 tons
- > Unique metal bonding process called Injected Metal Assembly

## GLOBAL FOOTPRINT

## SUBSIDIARIES

## MARKETS SERVED

- > Consumer Electronics
- > Healthcare
- > Defense & Aerospace
- > Telecommunications
- > Enterprise Technology
- > Automotive: ADAS & Connectivity
- > Automotive: Safety & Security

**\*ISO TS 16949 certified in all locations**

## ALLOYS

- > Aluminum
- > Magnesium
- > Zinc

## PROCESS OPTIONS

- > Hot chamber
- > Cold chamber

## SECONDARY OPERATIONS

- > CNC Machining
- > Specialty Coatings
- > Sub Assembly
