

Carbon Brushes

The AVO Carbon Group is the leader in design, manufacturing, and distribution of carbon brushes for the automotive industry.

Our subsidiary Cyclam is a major supplier for high performance mechanical seals for the automotive, water pump and bottling industries.

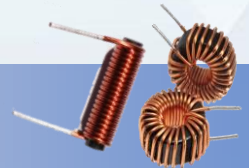

Mechanical Seals

Carbon Bushings

Low friction carbon bushings used for rotating mechanical parts where high chemical stability and low weight are the requirements.

Coil winding technology for rod-, fuse- and common chokes present in all regions for automotive and electronics industries.

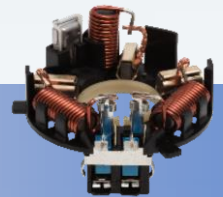

Chokes

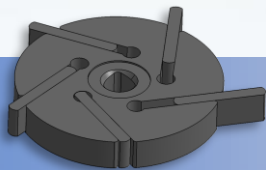

Carbon Discs

High performance and low wear sliding contacts used in fuel and diesel pumps.

The AVO Carbon Group specializes in brush card assemblies in 4 locations all around the globe.

Brush Cards

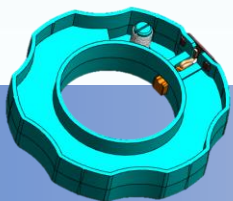

Rotors & Vanes

High resilience carbon used in vacuum pumps for brake assist systems, exhaust gas circulation and various pneumatic actuators.

AVO Carbon specializes in high performance brush grades and systems for E-Motors.

EV Traction

Grounding Systems

EV applications require protection systems to divert harmful electrical currents away from vulnerable systems. We specialize in both radial and axial solutions.
