

Precision Stamping

Stamping capabilities for complex components.

Higuchi is a custom metal stamping manufacturer that produces parts using aluminum, beryllium copper, copper, ferrous metals, stainless steel, steel, tempered steel, and titanium. Through our 30+ year history working with inflators, we have become deep draw specialists in both progressive and TRF stamping. We are also a one stop shop for any additional assembly needs along with our own in-house E-coating line.

- Higuchi America
 - IATF 16949 , ISO 9001 , ISO 14001
- Higuchi Mexico
 - IATF 16949 , ISO 14001

QUALITY, VALUE, LEAD TIME

Business Strengths

- Co-Development with Customers
- Press Die Designing Process Designing
- Die & Machine Manufacturing
- Mass- Production

- Stamping of Components
- Assembly (Welding, Staking, Riveting)
- E-Coat
- Finished Products

All production tool/assemblies are manufactured in-house to allow for co- development with customers to ensure maximum quality and efficiency.

One Stop Shopping of Stamping, Welding, Assy and E-Coating
