# WE CONVERT ALL TYPES OF LABELS FROM ANY TYPE OF FILMS

Our 8 color **Nilpeter FB-3300** Web printing press with multiple die stations is capable of high-quality printing at a maximum speed of 750 ft/min, which makes it the fastest in the narrow web industry.

Hand in hand with our Digital Pro 3 CMYK Dry Toner Printer CMYK dry toner electrophotography, Flexo decoration & converting in the same printer

Both machines gives us the ability to run label stock and film according to the design of our customer.

Minorize the lead time of each label once the project was started

Provides us with the flexibility to supply rolls or sheeted products.

It makes us capable of printing all UV colors or mixed with water-based colors.

We can do printing images with high quality and resolution.

Our machines can be adjusted to different measurements and can be print continue images.

# MACHINE PRINTING PROCESS

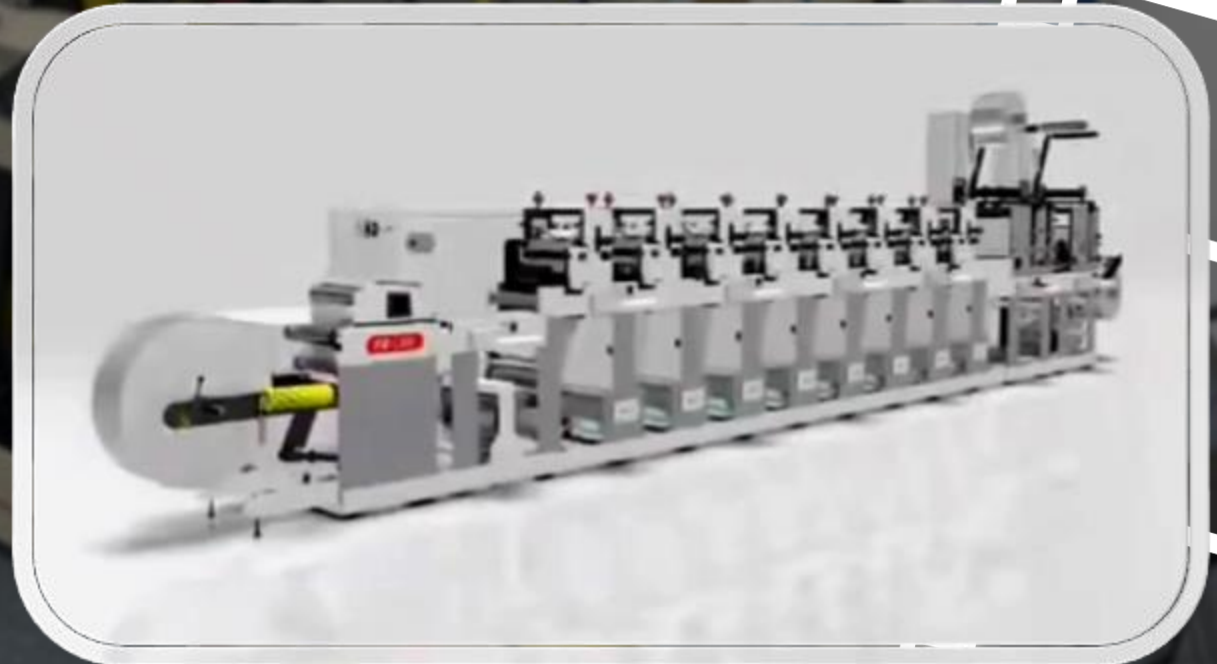

# NILPETER FB-3300

## MACHINE BENEFITS:

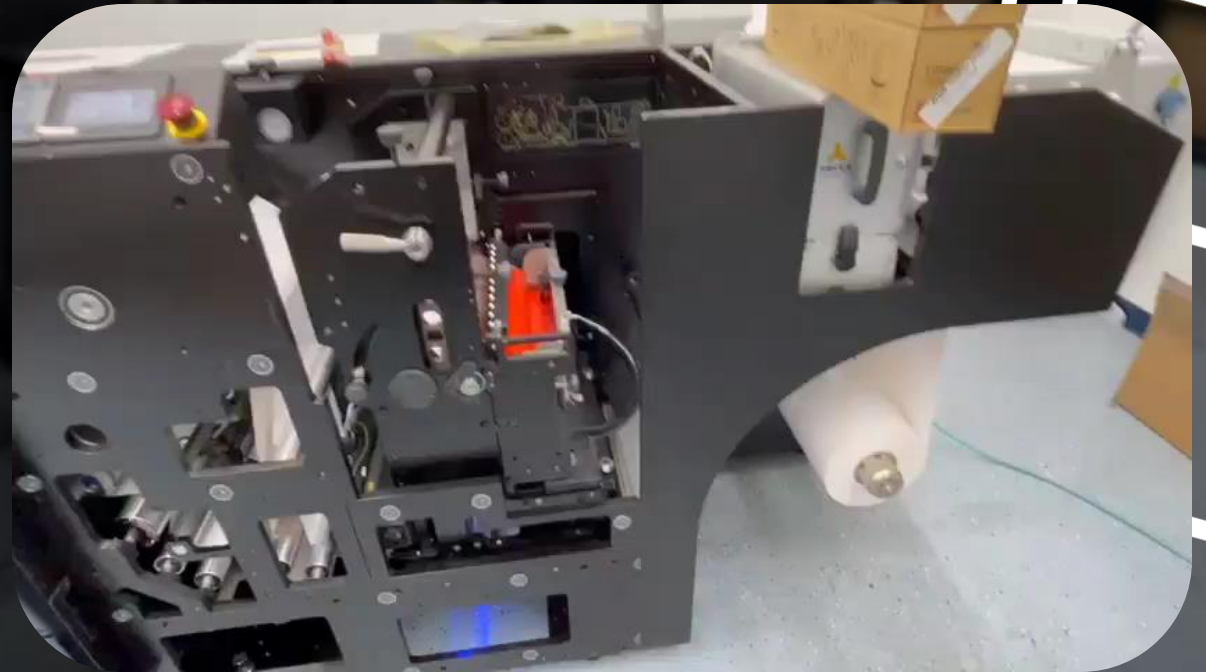

- 228 m/min. mechanical speed (750 FeetPM)
- Ideal choice for high – quality , cost-effective printing
- Based on modular Flexo technology for easy configuration
- Fast job changes based on easy configuration

# DIGITAL PRO 3

## MACHINE BENEFITS:

- True 77 fpm (23,5mm) speeds
- Digital printing
- All process in the same machine
- Extended game CMYK with FRESH COLORS
- Semi rotary Die-cutting in line converting
- Images and resolutions will not be affected on the printing process

# STRETCH FILM REWIND SLITTER

## MACHINE BENEFITS:

- Customized measurements
- High exit velocity producing 2,952 fpm ~ 60 coils /min

The background of the entire slide is a dark gray network of interconnected nodes and lines, resembling a molecular or digital structure. The nodes are represented by circles of varying sizes, and the lines are thin and light gray.
