

Take a closer look.

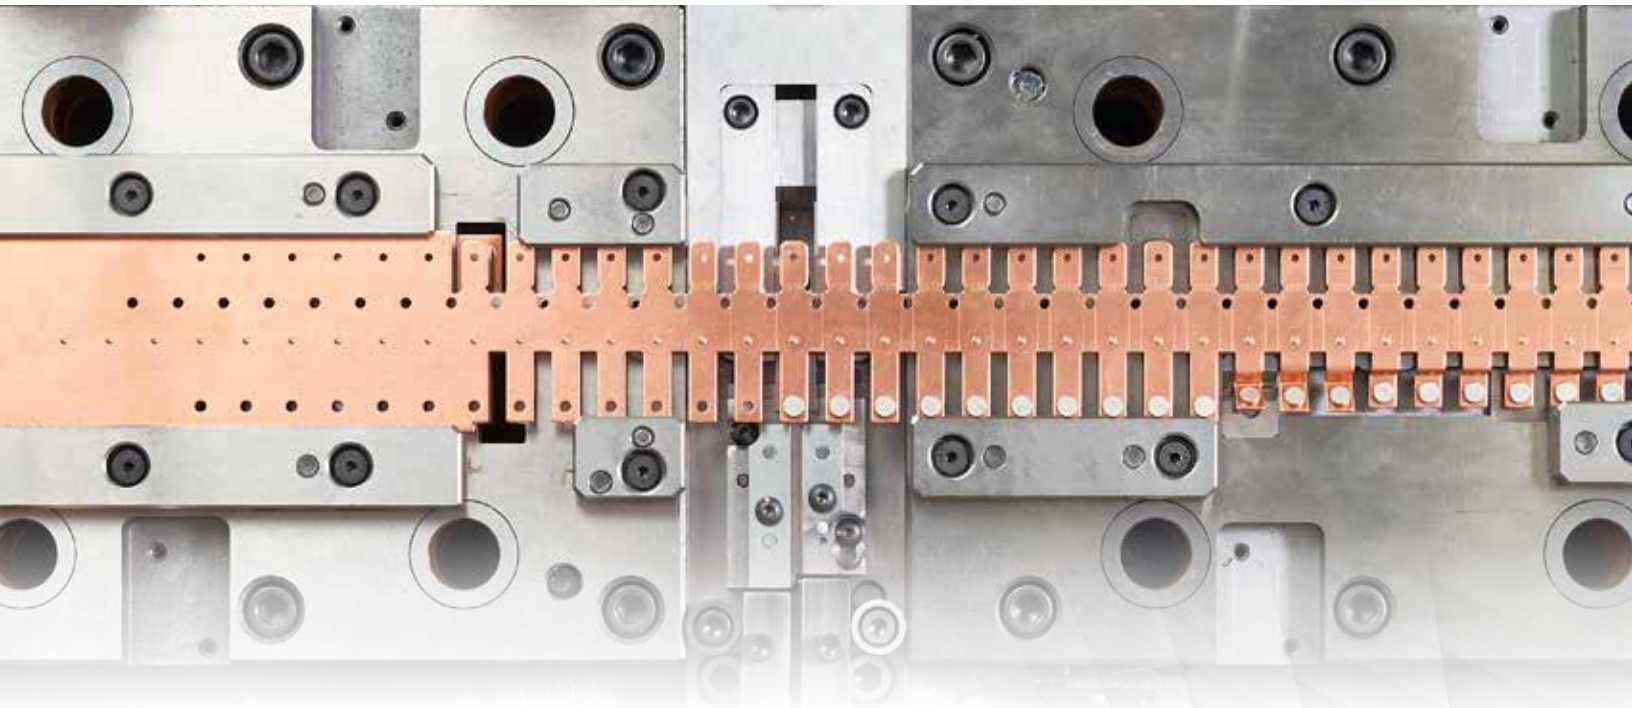

**Precision and quality
that will make a
BIG difference in
your business**

- True on-time delivery
- Passionate customer care
- Supreme customer communication

Making little parts requires a serious commitment by our team.

- Competitive Value-Pricing
 - Best in class quality
 - Prompt lead-times
 - Superior customer communication
 - On-time delivery
 - Engineering excellence

Make the Connection with Norstan

For over 50 years, is a leading manufacturer of highly specialized precision electrical contacts and stampings in both short and long production runs.

Cold heading: solid and composite buttons, rivets and discs
Brazing composites rivets, buttons & specialized tungsten brazing
Punch press and stamping, auto tape welding/stamping, riveting, wire welding and orbital riveting

- All manufacturing is done under one roof.
- On Staff Metallurgist
- You are an “A list” customer ... always!

NORSTAN

attention
to
detail

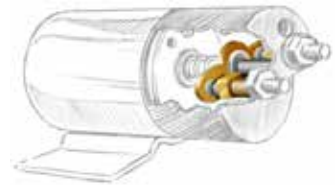

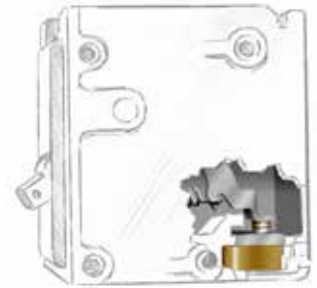

Our parts are hidden inside

Our electrical contacts and stampings can be very discrete. They are inside almost every type of electromechanical device made. In vehicles, appliances, elevator control systems, aerospace only you don't see them they are integrated into switches, relays, timers, thermostats and controls.

Made with Premium Alloys Specially Engineered & Formed

Our precision cold headed electrical contacts, rivets, buttons, discs and spheres work in all demanding electromechanical applications. Only materials with strict quality standards to meet our customers conductivity and requirements are used. Wire and strip made from:

- Silver
- Nickel
- Gold
- Platinum
- Palladium
- Coppers
- Brass
- Stainless Steel

Norstan's Strategic, Quality System

- Our Quality System is geared towards innovation – we consistently seek out new and different ways to improve.
- We consider more than just our manufacturing processes – every aspect of manufacturing is analyzed.
- We reward employees for ideas that help with product improvement, efficiency and cost reduction.
- Quality is so important to our customer and Norstan's bottom line we make it a priority to review and look for adopting improvements to the existing system or new certifications.

Fine silver brazed to copper.

Silver alloy brazed to copper stud.

Fine silver on copper. Machine composite.

Solid fine silver.

Silver alloy rivet staked to steel stamping.

Fine silver rivet welded to brass stamping.

Silver alloy rivet staked to brass stamping.

Silver alloy rivet staked to BeCu blade spot welded to brass stamping.

Our Promise

At Norstan, we are committed to meeting customer expectations 100% of the time. Our company and employees are focused on five key tenets:

- Total customer satisfaction
- Continuous process improvement
- Development of our employees
- Technological innovations
- Continuous waste reduction

We are constantly seeking new ways to increase customer value while lowering costs. **Your business is greatly appreciated!**
