DIVISIONS (horizontal integration)

AUTOMOTIVE

Driven by Performance.
Defined by Luxury.

AIR

Premium Comfort.
Certified to Fly.

RAIL

Engineered Convenience
for Rail Mobility.

SEA

Styled for Yachts.
Developed for the Elements.

CONTRACT

Timeless Elegance.
Exceptional Performance.

PREMIUM QUALITY - INNOVATING FOR A SUSTAINABLE FUTURE

At Boxmark, sustainability is not an add-on - it is embedded in everything we do. We combine craftsmanship with innovative, eco-conscious technologies to create leather solutions that meet the highest environmental standards. Our mission: to deliver premium products with minimal impact, maximum longevity, and full responsibility - today and for the future (see also our [website](#)).

Certified Eco-Processes

State-of-the-art water treatment, energy-efficient production, and environmentally responsible chemical management. Certified processes according to leading global standards.

Sustainable Materials (X_{Eco})

Carefully sourced raw materials from responsibly managed supply chains. Durable, long-lasting leather - reducing the need for frequent replacement.

Circular Economy Principles

Ongoing investment in closed-loop production, waste minimization, material recovery, and resource optimization.

Energy & Emission Reduction

Continuous reduction of CO₂ footprint through modern energy systems and optimized production technologies.

Product Longevity & Lifecycle Performance

High durability, exceptional wear resistance, timeless design - ensuring long product life and sustainable customer value.

Certified for Sustainability: ISO 14001 · ISO 50001 · LWG Gold Standard · REACH Compliant

LEATHER TYPES - BEST CHOICE FOR EVERY APPLICATION

KING

KING is a custom embossed or smooth bull hide leather of European origin. It is available in a variety of colors and different embossings. On request, special colors can be developed with the outstanding technical standards of this collection. Due to its customer-specific design options, this leather can be used in different areas of application.

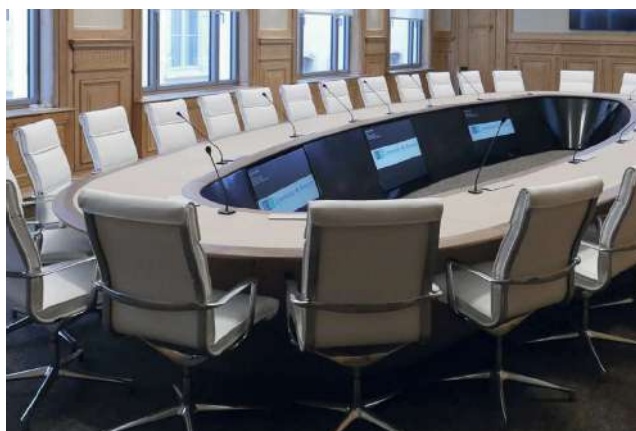

ROYAL

ROYAL is an embossed and pigmented bull hide leather. Its natural beauty and excellent durability is truly captivating. The easy-care and stain-resistant surface reduces the maintenance and cleaning effort. Due to the high levels of tensile and tear strength, this leather can be used universally and is also suitable for complex upholstery solutions. Furthermore, ROYAL can be finished in accordance with all prevalent European and American fire safety regulations.

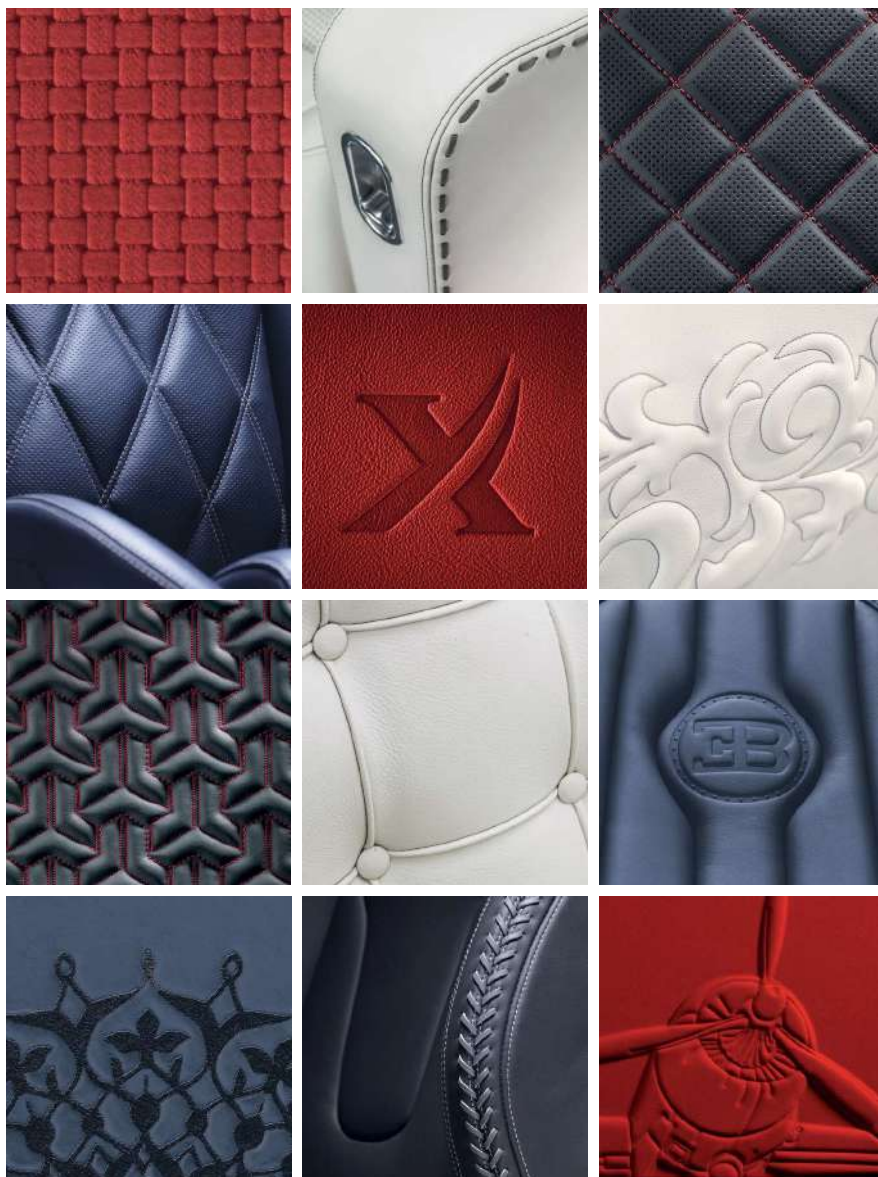

XTREME

XTREME is a resistant and pigmented bull hide leather. The even and finely structured surface gives this leather an extremely elegant appearance. XTREME can be finished in accordance with all prevalent European and American fire safety regulations. The easy-care and stain-resistant surface reduces the maintenance and cleaning effort. This leather boasts industry-compliant tear and tensile strength.

X-ECO

The sustainable product line X-ECO consists of three leather innovations. XGREEN uses only purely vegetable tanning agents such as leaves or herbs from trees and plants. In the case of ORGANIX, organic waste materials from other industries are recycled for leather production by tanning with a mixture of lignosulfonate and cocoa shells and XLOOP is a synthetically tanned biodegradable leather without chromium or glutaraldehyde.

Trusted Supplier for Global Brands
