

UNIQUE FREIGHT TRANSPORT, INC
CONTAINER FREIGHT STATION-LOS ANGELES

WWW.UNIQUEFREIGHTTRANSPORT.COM

Trans-loading & Distribution Division

No matter how complex your supply chain, Unique Freight Transport, a leading provider of warehousing, distribution, and transportation services since 2004, delivers the capacity and flexible logistics options that you need.

Unique Freight Transport Trans-load Services address four major concerns: supply chain flexibility, speed, reliability and cost management.

Trans-loading Defined

Trans-loading is the practice of handling freight directly from one mode of transportation (inbound) into another mode of transportation (outbound). These modes can include any combination of rail, ocean, truck or air. The freight does not enter a warehousing inventory, but is rather a "rolling inventory" of goods "in transit."

Services

We Service Ocean Containers Trans-loads covering movements of cargo from ocean containers into domestic trailers so you can take advantage of the long haul economies of ocean transport and the flexibility, reliability, and consolidation of road transportation.

Clients Key Benefits of Trans-load Operations

- Greater supply-chain responsiveness
- Reduced operating costs
- Reduced inventory levels
- Increased throughput
- Reduced product obsolescence
- Reduced product damages
- Reduced transit times
- Faster time to market
- Improved cash flow

Distribution Competitive Advantages

- Privately held and asset based
- Distribution competitive
- Strategic trans-load facility located close to the ports of Los Angeles, Long Beach, direct rail line access, and Los Angeles International Airport.

The following is typically what will take place in the ocean containers trans-load process:

1. Pick up of the containers at the Port.
2. Floor unloading of containers at warehouse trans-load center.
3. Segregation and reloading of product into outbound trailers (same day).
4. Departure of outbound dry van trailer to destination.
5. Return of the empty containers back to the port.

Los Angeles Int'l Airport Import & Export ULD a.k.a PMC Breakdown/Roller Bed/LTL Ocean & Air Services

LD & PMC Defined

A Unit Load Device (ULD) a.k.a. Pallet Metal Container (PMC), is a pallet or container used to load freight, on wide-body aircraft and specific narrow-body aircraft. ULDs come in two forms: pallets and containers. ULD pallets are rugged sheets of aluminum with rims designed to lock onto cargo net lugs. ULD containers, also known as cans and pods, are closed containers made of aluminum or combination of aluminum (frame) and Lexan (walls).

Airport Transfer Service & Ocean Container Freight Station (CFS) Import & Export pick up and delivery

Unique Freight Transport provides an instrumental line haul service to airlines, logistics and freight forwarders through out Los Angeles Airport and Container Freight Stations. Sea Port Drayage Import & Export Port of Los Angeles/Long Beach

We are experts at handling your import & export goods, we provide importers, exporters, freight forwarders, customs brokers and trucking forwarders with a wide-variety of sea port drayage options that include:

- Long-haul moves.
- Pre-Pulls (For early A.M. secure container delivery).
- Peak service (day-time operations and delivery; Pier-Pass would be applicable).
- Pre-pull full loads to off-terminal container yards locations for delivery to your customer's facility or to the terminals.
- Drop service (full or empty) at your customer's facility for unloading/loading.
- A comprehensive tracking and tracing service of container moves in house.
- Service for overweight containers (overweight containers requiring special equipment such as tri-axes and slider chassis).
- In conjunction with our drayage services, we also specialized in trans-loading, cross-docking and warehousing (short or long-term) all under the same location as our drayage services.
- All of our drivers are certified with the Transportation Worker Identification Credential (TWIC) agency.

Full Container Loads (FCL) shipments can be stored at our secure facilities until you are ready to receive your merchandise for unloading, or until the container is due back to the terminals for loading out for export.
