

CONTRACT MANUFACTURING

ELECTRONIC ASSEMBLIES

Manufacturing Services

- Robust ERP materials management system
- Functional, MDA Flying Probe
- Automated SMT and Through Hole board assembly
- Automated Vision Inspection
- In house X-ray
- BGA replacement
- Cable assembly
- Box build
- System Integration
- ESS, Vibration, Burn-in
- Bar code serialization with WIP tracking (beta site)
- Ship in-place and direct ship Depot repair

Manufacturing Capabilities

Circuit board design and assembly, box build, systems integration and test, is built upon a full spectrum of capabilities. These capabilities encompass turnkey procurement, design/design review, full test services and factory automation.

PLASTIC INJECTION MOLDING

- Injection Molded parts in your choice of material, or your own material.
- Repeatability within tolerances, +/- 0.005" on most parts and features.
- High productivity rates with relatively low labor.
- Improved design flexibility, high polishing and texturing possible.
- Technical assistance by our qualified teams.
- Design per customer's specifications of the molds and of the finished products.
- Full material selection: complete line of rubber, non-flammable rubber, thermoplastics, elastomers, polymers or advanced resin materials.
- Special material characteristics: heat, oil, chemicals, abrasive or weather resistant.
- Manufacturing of finished products with metal or plastic insertion, or other.
- Manufacturing in compliance with ISO 9000 standards.
- Flexible production capacity for small, medium or large runs

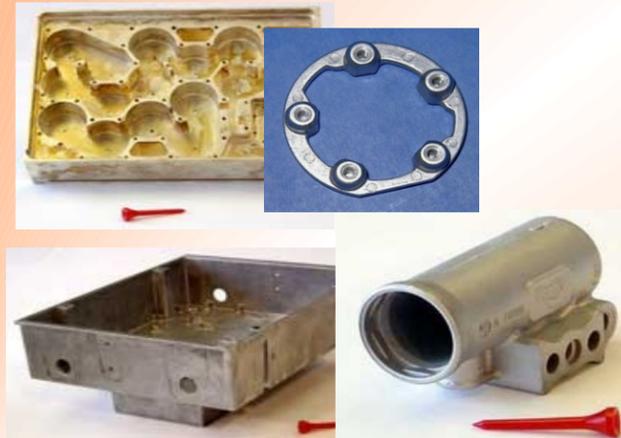

WIRE & CABLE ASSEMBLIES

- Full Engine/Cab/Chassis/Body vehicle sets
- Braided/Conduit/Tape and moulded finishes
- Hi Temp
- EMC screened
- ABS sensors leads
- Can Bus links
- Conduited
- Encapsulated
- Fibre Optics (terminated)
- Hybrid
- Open Wire
- Potted
- RF (terminated)
- RFI Shielded
- Steel Braided
- Textile Braided
- Woven Ribbon Harness

METAL FABRICATIONS

ALUMINUM CASTING, EXTRUSION and ANODIZING

CNC-SCREW MACHINE TURNING

CNC MILLING

METAL STAMPING AND SHEET METAL WORKS

" WE MAKE OUTSOURCING COST EFFECTIVE AND STRESS FREE "

AIMCO is an International Company specializing in assisting companies to reduce their manufacturing cost by outsourcing projects to Mexico.

Many companies today are faced with increasing demands from their customers, compounded by aggressive competition from overseas. To maintain a competitive edge, these companies are looking to outsourcing to reduce cost while maintaining their core competency.

Through our offices in the United States and Mexico, **AIMCO** has established the infrastructure to simplify your transition and facilitate outsourcing your manufactured products to Mexico.

Key Service Elements:

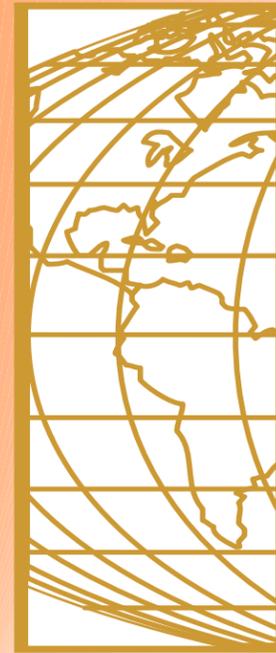

Project Management
Source Selection
Engineering Coordination
Quality Assurance
Logistical Management
Cost Reduction

Product Specialization Includes:

Tooling
Injection Molding
Die-Castings
Metal Stampings
Mechanical Assemblies
Electromechanical Assemblies

CUSTOMERS

**HADCO LIGHTING
LIGHTOLIER
FASCO MOTORS
ALCOA
DELPHI
MOTOROLA
ROCKWELL
BOEING
PHILIPS
SUNPOWER**
