More services!

- **Metrology laboratory:**
The main purpose of the Metrology Laboratory is to verify that manufactured parts meet the required specifications.
These verifications are typically performed on dimensions, shape, and surface finishing.
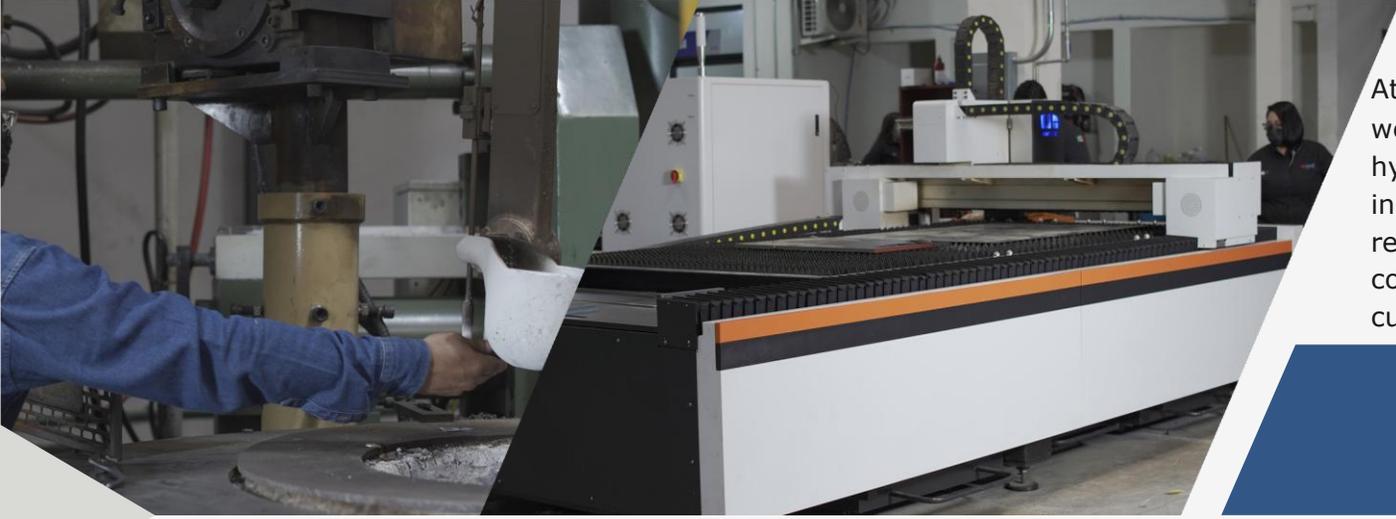

- **CNC Vertical Machine Center**
Manufacture metal and plastic components, produce industrial parts with high precision, create molds, fixtures, and custom mechanical parts.

YPC
DE MÉXICO

Manufacturing services!

Efficiency in each of our projects.

Quality policy

At YPC de Mexico,
we create and develop manufacturing solutions, hydraulic and pneumatic equipment, as well as industrial parts and components, meeting customer requirements with the best quality and service, committed to continuous improvement with cutting-edge technology and within our processes

About Us

YPC de México is a 100% Mexican company with a presence over 17 years in the hydraulic and pneumatic equipment distribution and manufacturing industry, allowing us to provide our clients with a wide range of automation solutions for their processes and projects.

Our sevices

Die Casting:
YPC de México offers aluminum die casting services for manufacturing parts.
There are installed 300 ton and 400 ton die casting machines.

Electrostatic painting:
