ABOUT US

We design and manufacture incredible plastic products to global scale.

We believe that the basis of the development of companies are creativity and innovation. That is why, since 1984, we have made sure that brands deliver real value to their customers through our products, from toys and promotional to household items.

- The customer receives safe and quality products.
- The brand wins the loyalty of its customers.
- We leave a legacy.

SERVICE

Our customer service team is always available to assist with any questions or concerns, dedicated to helping you find the best option for your needs.

DESIGN

Our skilled in-house graphics team crafts unique and memorable designs, always tailored to meet each customer's specific needs.

ENGINEERING

Our skilled team creates precise CAD files and develops molds with careful attention to specifications. They ensure each mold is efficient, durable, and perfectly suited to the final product.

MANUFACTURING

With more of 35 years of expertise in injection molding, we produce high-quality products with precision. We also handle various decoration, assembly and packing processes in-house, ensuring efficiency and consistent quality in every step.

QUALITY

We carefully inspect every product at each production stage to meet the highest standards. Our facility is certified in Social Compliance, GMP, Food Safety, and Border Security, ensuring safe and high-quality products.

WORLDWIDE DISTRIBUTION

Our strategic location in Mexico allows us to efficiently deliver to any destination worldwide. Partnering with reliable transportation providers, we ensure fast and timely shipments, reaching customers across the globe with ease.

WHY CHOOSE REUSABLE?

Using reusable plastics as our products, helps reduce waste and environmental impact. Unlike single-use plastics, they can be used multiple times, conserving resources and minimizing pollution. Additionally, they are often recyclable, further reducing their footprint and promoting a more sustainable approach to consumption.

MIXING WITH NATURE

We create products by combining natural plastics like polypropylene with natural fibers such as agave, barley, and wood. This innovative approach reduces the amount of plastic used in each cup while maintaining durability and functionality. By incorporating renewable materials, we help minimize environmental impact and promote more sustainable production.

OUR RAW MATERIAL

We use recyclable plastics like PET and PP, which are widely accepted in recycling programs. PET can be turned into new bottles, fibers, and packaging.

Virgin plastics help keep recycled products strong, as plastic weakens after multiple recycling cycles. Adding new material improves durability.

Recycling these plastics reduces waste in landfills and oceans, supporting a sustainable circular economy. Recycled PET and PP are used in packaging, textiles, and more, cutting the need for new raw materials.
