

DYNAMIC SIGNAL ANALYSIS & NVH SOLUTIONS

WELCOME TO THE DEWESOFT EXPERIENCE. ONE SOFTWARE, ONE HARDWARE, ONE SOLUTION.

V23-2

7 DEWESoft
YEAR WARRANTY

ULTIMATE ALL-IN-ONE TOOL FOR ANY NVH CHALLENGE

EASY TO USE AND VERSATILE

Get your measurements in 30 seconds.

DEEP IN FUNCTIONALITY

With an amazing set of features, Dewesoft instruments are used in most advanced research labs around the world; all functions are available at the same time in one software.

DUAL CORE HIGH DYNAMIC

Dewesoft Sirius increases signal dynamic to 160 dB by using two ADC converter per channel with different gains. Both - time domain and frequency domain data have an amazing dynamic signal performance.

SuperCounter®

Patented Supercounter technology provides perfect angle and angular speed information which is a base to align data from time to angle domain.

FULLY SYNCHRONISED

Data from various sources are perfectly aligned: Analog, Digital, Counter, Vehicle buses, Video, ...

DEWESOFT 7-YEAR WARRANTY

Our warranty covers that the instruments function as promised for a period of 7 years from the day of the delivery.

SIRIUS® R1DB/R2DB

Small-size instrument with embedded computer, 12" display and batteries.

SIRIUS® R8DB/R8RT

Integrated instrument with 8 SIRIUS slices, powerful SBOX computer, optional 19" display (R8D) and batteries (R8DB) and real-time EtherCAT® slave interface (R8rt).

SIRIUS® XHS

High-speed data acquisition system (15 MS/sec) with the new Hybrid ADC technology capable of high-bandwidth transient recording and very high-dynamic, alias-free data acquisition.

ALL-IN-ONE

Dewesoft hardware can perform a wide variety of measurement tasks. Every function is available in a single Dewesoft X software package.

MODULAR AND EXPANDABLE

Can you imagine FFT analyzer with thousands of channels? We can... Systems can be gradually expanded from one to unlimited number of channels.

TOTAL SOLUTION

Combine your NVH measurements with data recording, electrical power, combustion, vehicle dynamic and other powerful Dewesoft tools.

NO HIDDEN COSTS

Software license is included in every system. Free lifetime software upgrades included. No yearly maintenance or upgrade fees, free online training courses.

PLUG AND PLAY

Any device, sensor or signal. Smart sensors with TEDS are recognized automatically.

SIRIUS® MODULAR

Most flexible and distributable single slices with USB and EtherCAT® interface.

SIRIUS® MINI

Small and highly portable, USB powered data acquisition system ideal for acoustic, vibration, and rotating machinery analysis.

TEDS	yes
Features	modal hammer with TEDS
Dimensions	221 x 71 mm
Weight	100 g (head)
Temperature range	-40 °C ... +65 °C

VIBRATION SHAKERS

Permanent Magnet Shaker				
	DS-PM-20	DS-PM-100	DS-PM-250	DS-PM-440
Output Force (Sinus)	20 N	100 N	250 N	440 N
Frequency range	0 - 12 kHz	0 – 7,5 kHz	0 – 5 kHz	0 – 5 kHz
Displacement (Pk-Pk)	5 mm	10 mm	25 mm	25 mm
Max Acceleration	30 g	45 g	80 g	80 g
Amplifier (Integrated, External)	I	I	E	E

- Embedded power amplifier and sine generator for PM-20 and PM-100
- Lightweight, durable, portable and easy to use
- Adjustable trunnion base provides high degree of flexibility
- Broad frequency range

Modal Shakers				
	DS-MS-20	DS-MS-100	DS-MS-250	DS-MS-440
Output Force (Sinus)	20 N	100 N	250 N	440 N
Frequency range	0 – 12 kHz	0 – 7,5 kHz	0 – 5 kHz	0 – 5 kHz
Displacement (Pk-Pk)	5 mm	10 mm	25 mm	25 mm
Max Acceleration	40 g	60 g	100 g	100 g
Amplifier (Integrated, External)	I	I	E	E

- Embedded power amplifier and sine generator for MS-20 and MS-100
- Modal stinger can be easily adjusted by the through-hole armature
- Lightweight, durable, portable and easy to use
- Adjustable trunnion base provides high flexibility
- Up to 25mm stroke and broad frequency range

Inertial Shaker				
	DS-IS-5	DS-IS-10	DS-IS-20	DS-IS-40
Output Force (Sinus)	5 N	10 N	20 N	40 N
Frequency range	10-1000Hz	10-3000 Hz	10-3000 Hz	10-3000 Hz
Displacement (Pk-Pk)	1 mm	5 mm	8 mm	8 mm
Shaker mass	0,06 kg	0.21 kg	0.28 kg	0.5 kg
Amplifier (Integrated, External)	E	E	E	E

- Compact and lightweight design
- Superior low-frequency performance
- Any angle mounting
- Low friction bearing guided

ORBIT ANALYSIS

KEYPHASOR /
TACHO SENSOR

Y PROBE

X PROBE

INDUSTRIES

Complete solution that improves the operating efficiency, lower wear, and prevent any potential critical failures of rotating machinery. Applied in a variety of industries, e.g. automotive, chemical, oil and gas, metals, HVAC or mining and in the majority of different power plants: Hydroelectric, Nuclear, Thermal, Gas, Coal, Biomass.

APPLICATIONS

Turbo machinery provides kinetic energy to operations enabling movement - a function that is widely used in industrial processes to move solids, liquids or gases through drivers, driven components and transmissions such as: Compressors, Drills, Generators, Turbines, Engines, Pumps, Blowers, Gearboxes.

DEWESoft® X
SOFTWARE

SOFTWARE INCLUDED

Award-winning DewesoftX software with powerful math and extensive analysis options included free of charge: mathematical analysis with visualization, sequencing and data export to a multitude of formats.

MULTI FUNCTIONALITY

Maximum measurement capabilities - functions with any Dewesoft DAQ system and sensors can be added to simultaneously capture temperature, vibration, video, strain, etc. in the same SW and perfectly synchronized.

With fully-fledged and wholesome turbo machinery analysis, easy setup, intuitive presentation of measured data and industry leading measurement expandability orbit analysis measurement is reimagined the Dewesoft way.

POWERFUL ANALYSIS

Complete set of functionalities and displays for turbomachinery monitoring: Raw, averaged and harmonic orbits, Time trends and Waveform, Bode plot, Polar plot, Full motion graph, Waterfalls, clearance circle, runout compensation, reference orbit and many more.

DEDICATED ADVANCED PACKAGES

Dewesoft Orbit Analysis can be combined with Order Tracking and Advanced FFT with cursors to cover further analysis needs.

ORBIT ANALYSIS

MACHINE TRAIN SUPPORT

Simply add the number of desired bearings to the analysis.

MONITORING CAPABILITIES

Orbits (raw, averaged, H1, H2 etc.), FFTs, cascade plots, Bode plots and polar plots can be uploaded to our Historian database for long term condition monitoring.

EASY SETUP

Only a few steps from connecting the sensors to having stored all data. Post analysis: Offline calculation using raw signals from proximity probes.

HIGH ACQUISITION RATE

200kS/s sample rate enabling analysis of high speed rotors.

UNLIMITED CHANNEL COUNT

Catering any R&D measurement need, regardless of the number of bearings analyzed and/or proximity probes used.

HIGH DYNAMIC CAPABILITIES

Dual ADC converter technology, seamlessly covering 160dB dynamic range out-of-the box.

POST ANALYSIS

Offline calculation using raw signals from proximity probes.

TEDS SUPPORT

Plug-and-play with proximity probes that support TEDs.

MULTI-BRAND PROXIMITY PROBE SUPPORT

Dewesoft LV input on SIRIUS covers the needed ranges and supplies excitation to the majority of proximity probes.

Out of the box, Dewesoft Orbit Analysis packs the entire set of industry-proven analysis metrics, supporting calculation and graphical representation of: Time trends, Raw/Direct orbit, Orbit Waveform, Averaged orbit, Filtered orbit, Subharmonic orbit, maximum orbit dimensions, Polar plot, Bode plot, shaft centerline, full-motion graph, clearance circle, runout compensation, reference orbit, full spectrum, and a complete set of cascade plots and waterfalls.

FFT ANALYZER

MULTIPLE MARKERS

Maximum marker, free marker, zoom marker, sideband marker, harmonic marker, RMS marker. Linked marker technology enable easy cuts from 3D to 2D graph, export and further analysis. Any edits on each of the graphs automatically applies it to the other as well. Including a dedicated marker table.

AVERAGING

Overall and block history averaged FFT with linear, energy, energy exponential and maximum averaging are available. Including different amplitudes settings: Linear, ASD, PSD, Power, ESD are available in Peak, RMS or Peak-Peak scaling.

ANY LINE RESOLUTION

The frequency resolution can be set freely with no module limitations, or selected to a value from a pre-defined list.

FFT analysis is one of the most used analysis tools across all application domains when it comes to identification and specification of content in measured data.

The FFT analyzer in Dewesoft has it all: top performance, advanced cursor functions, high freely selectable line resolution, flexible averaging as well as advanced functions for in-depth analysis.

CURSOR VALUE ESTIMATE

Innovative window interpolation technique allows precise amplitude and frequency estimation.

ADVANCED MATH

Auto-power spectrum, cross-power spectrum, complex spectrum, waterfall spectrum, cepstrum (for bearing faults, speech processing), full FFT (for rotor whirl analysis), STFT (for non stationary signals), envelope detection (for bearing fault analysis). Including direct integration & derivation of input parameters.

OCTAVE ANALYZER

SEAMLESS ACOUSTIC SUITE INTEGRATION

The Octave analysis module is perfectly integrated with sound level, sound power, sound intensity and other modules for advanced sound analysis.

FREQUENCY SOUND WEIGHTING

Standard frequency weighting curves (A, B, C, D and Z) can be applied directly in frequency domain for analysis of sound.

AVERAGING

Linear, peak and exponential averaging or block-based calculation.

RESOLUTION UP TO 1/24 OCTAVE

For deep analysis of data very narrow band analysis up to 1/24th octave.

Octave analysis is an indispensable tool for sound measurement as well as predictive monitoring. Dewesoft octave analysis solution meets all of the IEC and ANSI Class I specifications for octave filters.

SYNTHESIZED OCTAVE ANALYSIS

Extremely fast calculation based on the narrow band FFT. Offering the same high level of accuracy with optimal speed - especially useful with high channel count systems where performance is crucial.

TRUE OCTAVE ANALYSIS

True octave filters exactly represent the filter sets defined by the IEC 61260 standards and offer the user a real time response for vivid live visualization of data, crucial for advanced acoustic analysis.

ORDER TRACKING

RICH VISUALIZATION

Frequency and order 3D waterfall plots provide a great tool to determine machine condition. Nyquist, Bode and Campbell plots are available for presentation of the data. Orbit analysis with raw or order view is an efficient tool for turbo-machinery analysis.

TIME, FREQUENCY AND ORDER DOMAIN - AT THE SAME TIME

Due to high sampling rate (support) and advanced alias free resampling mechanism, data are available in all three domains (time, frequency and order), everything at the same time in one screen and data file, perfectly synchronized.

Determine the operation condition of rotating machines (resonances, stable operation points, determining causes of vibrations). even more powerful in combination with other math modules like torsional analysis, combustion or power analysis - the true EKG for machines.

ANGLE SENSOR SUPPORT

All angle sensors from tachometer, encoder, gear tooth, gear tooth with missing or double teeth, tape sensors and others are supported to determine angle and rotational speed with 10nsec resolution using SuperCounter® technology.

ADVANCED MATH

Any order and time-domain harmonics can be easily extracted with amplitude and phase, available versus rotational speed or time in run-up or coast down modes.

ROTATIONAL AND TORSIONAL VIBRATIONS

EASY SENSOR SETUP

The Math module supports any type of sensor output, and the sensor type can be totally different at each end of the rotor. SuperCounter® technology provides 10ns resolution in determining rotational angle and speed.

ORDER TRACKING INTEGRATION

Closely combined with order tracking, advanced data analysis is available based on the same angle sensors as the source of frequency.

Rotational and torsional vibration module along with order tracking are a strong tool to troubleshoot shafts in automotive, industrial or power-generation applications.

ADVANCED MATH

Different input filters and rotational DC filters are available as well as the option to enter rotational speed ratio for gearbox analysis.

ACCESS TO ALL DATA

All data, such as reference angle, individual sensor rotational angle, speed and acceleration, torsional angle and velocity are readily available for advanced analysis.

BALANCING

SINGLE OR DUAL PLANE BALANCING ON SITE

Perform single plane (narrow disc) or dual plane (long shaft) balancing.

WEIGHT SPLITTING

Adds the possibility to split needed balancing weight into equidistantly spaced points, for example holes on the rotor.

SIMPLE STEP-BY-STEP PROCEDURE

You are guided through the balancing steps for flawless operation including setup of angle sensor with live preview. Multiple modules can be combined for multi-axis balancing to save time and improve the quality of balancing.

Balanced rotors are essential for smooth operation of rotating machinery. Imbalance will create high vibrations, reducing machine life, causing material defects and down times. The balancing module is the tool to eliminate imbalance on site.

RICH VISUALIZATION

Results from all runs are displayed in order to ease a decision for the next steps and to evaluate the stability of the measurement. RPM display has color indicator to determine in-out range.

STORAGE OF INFLUENCE VECTOR

Influence vectors can be stored so that additional test runs are not needed for repetitive balancing of the same machine.

SHOCK RESPONSE SPECTRUM (SRS)

SUPPORTED STANDARD

Shock response spectrum calculation according to **ISO 18431-4**.

DATA EXPORT

Data can be exported in virtually any data format used for NVH analysis.

SELECTABLE FREQUENCY SPAN

Freely definable calculation range for the frequency spectrum.

ADVANCED MATH

All relevant mathematics (positive max., negative max., maximax in either primary, residual or composite) are calculated. Results in frequency domain spectrum can be shown as acceleration, velocity or displacement. Support for pseudo-velocity and static acceleration determination.

EASY SETUP & USE

The setup of sensors and the system is fast and simple; automatic shock detection based on the threshold method.

DAMPING/QUALITY FACTOR

The selection of the damping ratio or quality factor is easily updated.

Mechanical shock pulses are often analyzed in terms of the shock response spectrum. The SRS assumes that the shock pulse is applied as a base input to an array of independent single-degree-of-freedom systems.

MODAL TEST / ANALYSIS

IMPACT HAMMER TEST (SIMO/MISO)

Hammer testing has never been easier than with Dewesoft X. Grouping, rejecting and remeasuring of measurement points is fully supported. Ability to move excitation and/or response points (roving hammer or responses) allows for full flexibility when performing measurements.

In addition to frequency response functions, coherence, (cross) PSD and MIF can also be calculated.

SHAKER TEST (MIMO)

To analyse the most complex structures, Dewesoft X supports tests with any number of shakers. Externally driven shakers are supported, as is controlling the shakers via AO using Dewesoft's function generator (burst random, continuous random, sine sweep, step sine tests).

H1 or H2 estimators are supported for calculating the FRFs. Multiple coherence (MCOH) can be calculated to help with the setup and measurement when using multiple shakers.

ODS

Operating Deflection Shapes (ODS) is a simple way to do dynamic analysis and see how a machine or a structure moves within its operational conditions. ODS tests are fully supported in Dewesoft X.

RICH VISUALIZATION

Sophisticated animation of measured structure with interpolation in all three axes is available - both during and after the measurement. Complete integration with the Modal Test & Modal Analysis modules allows for trivial selection of transfer functions or mode shapes to animate.

Structures can easily be created with a dedicated geometry editor that supports everything from individual points, up to simple objects, in both Cartesian and cylindrical coordinate systems. Alternatively, geometry can also be imported from an UNV file.

The Modal Circle tool determines the exact resonance and calculates the viscous or structural damping factor.

FINE-TUNING OF MEASURED DATA

With its rich displays, Dewesoft X allows for real-time quality control of the measurement, as well as the ability to repeat the measurement of any point, all during acquisition. Additionally, all the time-domain data is stored into a datafile, which allows for offline recalculation with different parameters.

Multiple measurements done on a large structure can easily be combined into a single datafile, to analyze the entire structure at once.

ADVANCED MODAL ANALYSIS

With the help of CMIF (complex mode indicator function) and LSCF curve fitting, finding the modes on the stabilization diagram is easy. Selected modes can be used to calculate mode frequencies, damping ratios, mode shapes, complexity, participation factors, synthesize FRFs, ...

Calculated mode shapes can be animated on a modal geometry widget. AutoMAC matrix can be displayed on a 3D bar graph to ensure the modes are well selected.

UNV EXPORT

All data, from raw time domain signals and FRFs, to all the advanced outputs from Modal analysis, can be exported into a standard UNV file.

Modal test is an indispensable tool to determine the natural frequencies and mode shapes of any structure - offers easy to use operation with fast setup while providing rich visualization and animation of results.

SINE PROCESSING

REAL-TIME CALCULATION

Peak, RMS, THD, phase, transfer functions for each available point in real-time and post-analysis.

FUTURE-PROOF APPLICATION

Lifetime free upgrades and support.

STORE AUTOMATICALLY

Automatic storing on desired trigger conditions.

TEDS SUPPORT

Save time by using TEDS accelerometers which are supported by DewesoftX and all Dewesoft hardware.

DATA EXPORT

Data can be exported in virtually any data format used for NVH analysis.

ONLINE AND OFFLINE ANIMATION

Determine the quality of results - animation of structure in all three directions with different projections during (and after) measurement.

Structural dynamics characterization, durability and fatigue testing, design validation and qualification.

UNLIMITED NUMBER OF CHANNELS

Supports real-time calculation of an unlimited number of channels.

COMPLETE SINE PROCESSING TESTS

Directly integrates with your existing shaker and controller, needing only the COLA signal to sync perfectly.

EASY TO SET UP AND USE

Simply connect the accelerometers and COLA signal, assign the correct channels and start measuring.

DIFFERENT MODES OF FREQUENCY DETECTION

Zero crossing and Hilbert transform for detecting the exact frequency of the sweep produced by the shaker controller and driving the shaker through an amplifier.

UNMATCHED POWER OF CALCULATION

Runs octave and FFTs simultaneously on all channels and all in real-time.

DEWESOFT QUALITY AND FLEXIBILITY

Add additional parameters to the same measurement system and expand your measurement chain in seconds.

SOUND LEVEL METER

UNMATCHED FLEXIBILITY

SLM supports sound measurements in both air or water, and can be combined with all other physical measurement parameters, vehicle bus systems, video, GPS and other math to build a thorough image of circumstances.

RICH VISUALIZATION

Flexible displays offering digital meters, analog bars, time domain recorders, narrow band FFT and octave analyzers can be freely combined to show your SLM data in real-time as well as in post-processing.

SUPPORTED STANDARD

IEC 61672 Class 1 sound level meter

ADVANCED MATHEMATICS - ALL AT THE SAME TIME

Predefined standard frequency weighting (A, B, C, D, and Z), time weighting (Fast, Slow or Impulse), sound pressure level, equivalent, peak, minimum & maximum sound pressure levels, sound energy, impulsivity of sound, statistical noise level (LAF1, 5, 10, 50, 90, 95 and 99 % classes of values) are all available at the same time.

Compliance with international standards. Maximum accuracy and high dynamic range have been re-imagined with the Dewesoft approach. Regardless of the acoustics measurement, SLM plugin is always at the heart of it.

HIGH DYNAMIC RANGE

Our top-of-the-class data acquisition hardware with 160 dB dynamic range in the time and frequency domain allows direct input of IEPE compatible microphones. Supports automatic recognition of microphones with TEDS. Dewesoft data acquisition systems can be scaled for any number of microphones which can be effortlessly calibrated with a calibrator.

SUPPORTED STANDARDS

Fully compliant with relevant sound power standards **ISO 3741, ISO 3743-1, 3743-2, ISO 3744, ISO 3745, ISO 6393, ISO 6394, ISO 6395 and ISO 6396.**

RAPID REAL-TIME AND OFFLINE CALCULATION

All calculated parameters are available during measurement as well as offline; rapid calculation of correction factors K1 (background noise measurement), K2 (room correction with integrated RT60 module), C1, C2 and C3 (deviations due to meteorological reasons - temperature and barometric pressure); support for raw time domain data storing and offline sound power calculation.

HEAVY MACHINERY

Includes measurement procedures for testing heavy machinery.

PREDEFINED REPORT

After testing, present your results using our pre-defined and yet flexible report templates.

GUIDED STEP-BY-STEP PROCEDURE

You will be guided step by step through the entire measurement procedure, with our clear and comprehensive user interface.

REVERBERATION TIME RT60

Expand your measurement with RT60 and perform room ratings yourself, using the same software interface. Template for absorption coefficient included!

**RT60 plugin sold separately.*

Widely established sound power measurements with familiar, distinctive user interface and industry unmatched flexibility. Rating and comparison of different noise sources with ease and exactness while simultaneously monitoring any number of additional process parameters.

SOUND POWER

SOUND INTENSITY

SUPPORTED STANDARDS

Complies to Sound Intensity-based Sound Power calculation - **Discrete points method (ISO 9614-1)** and **Scanning method (ISO 9614-2)**.

IEC 61260 & IEC 61672

Using octave filters in compliance with IEC 61260 and complete measurement chain in compliance with IEC 61672 - worldwide valid calibrations can be ordered together with the system or done in your local calibration lab.

Noise source determination brought to an entirely new level. Sound intensity measurements in a simple and intuitive way with precision and flexibility unmatched in the industry. For example: measuring process parameters and recording video in parallel.

ADAPTED FOR INDUSTRY

No need for a special environment - perfect for measuring on big chillers, transformers and other large-scale industrial applications.

SUPPORTED HARDWARE

Plug and play support for different intensity probes from all major manufacturers, integrating full remote control functionality.

UNMATCHED FLEXIBILITY

Measurement of additional process parameters like vibration, video and others, everything perfectly synchronized.

PHASE CALIBRATION

Straightforward, automated phase calibration and correction with a single button click. Evaluation of PRI index and all the standard indicators including the dedicated table for output of results and needed actions.

QUICK SOUND SOURCE IDENTIFICATION

Identify noise sources smoothly with an easy-to-use interface, perform rapid investigation with Logged intensity and a camera - automatically synchronized

PROMINENCE RATIO

Calculation according to **ISO 7779**, freely definable frequency range and desired resolution.

LOUDNESS & SHARPNESS

Calculation according to **ISO 532-1** and **ISO 532-2**.

POWERFUL METRICS

Articulation index, speech intelligibility, noise rating and criterion.

MONAURAL AND BINAURAL ANALYSIS

Select desired measurement method before measuring or measure both at the same time.

FUTURE-PROOF APPLICATION

Lifetime free upgrades and support - our solutions are constantly being improved.

REAL-TIME AND POST ANALYSIS

Calculation of metrics is supported in real-time as well as in post-analysis.

TIME-VARYING AND STATIONARY SIGNALS SUPPORT

No limits when it comes to different use cases.

MEASUREMENT EXPANDABILITY

Bundled with award-winning DewesoftX Professional - advanced and easy-to-use data acquisition and analysis software.

POWERFUL DAQ SYSTEM

Bundled with renowned SIRIUS DAQ system supporting sampling rates of 200kHz.

Product sound engineering Analysis and characterization of product sound. The indispensable tool for sound engineering - make your product sound right.

SOUND QUALITY

REVERBERATION TIME RT60

PARAMETER ESTIMATION

Estimation of modal decay parameters from noise measurements of reverberant and resonating systems using **Lundeby method**.

When room acoustics properties are the issue, RT60 solution represents an essential tool. Easy setup enables reliable measurement for effective modification of room parameters and achieving desired reverberation time.

ABSORPTION COEFFICIENT CALCULATION

Calculate absorption coefficient and make a report with provided template.

EVALUATION RANGES

Different evaluation ranges for reverberation of time estimation are supported (T10, T15, T20, T30 & T60).

SUPPORTED STANDARDS

Fully complies with the **ISO 354** standard using integrated response method.

DIRECT MICROPHONE INPUT

Our data acquisition hardware with 160 dB dynamic range allows direct input of IEPE compatible microphones with support for TEDS recognition. Data acquisition system can be scaled for any number of microphones.

HUMAN BODY VIBRATION

HAND-ARM VIBRATION

Sensors are installed using special adapters for fixing on a handle or between fingers and dedicated hand-arm calculations are available including risk assessment of vascular disorders.

WHOLE-BODY VIBRATION

Applicable to motions transmitted from workplace machines and vehicles to a person's body through a supporting surface.

Measure the effect of vibration on the body of a human being. The extracted parameters allow the judgment of risks for workers exposed to vibration. Whole-body and hand-arm measurement is supported according to international standards.

HAND VIBRATION

SEAT VIBRATION

SUPPORTED STANDARDS

Calculation in accordance with latest revisions of **ISO 5349**, **ISO 8041**, **ISO 2631-1**, **ISO 2631-5** and **ISO/TR 18570**.

ADVANCED MATH

All data like RMS, Peak, Crest, VDV, MSDV, MTVV, Weighted raw, al (ISO 2631-5), al and D (ISO 2631-5) are available.

DATA ANALYSIS

With its deep data analysis functionality, DewesoftX is the basis for R&D work related to the reduction of vibration.

DEWESOFT® WORLDWIDE: SLOVENIA, Austria, Belgium, Brazil, Czech, China, Denmark, Finland, France, Germany, Hong Kong, India, Italy, Mexico, Singapore, Sweden, UK, USA and PARTNERS IN MORE THAN 50 COUNTRIES
