ENGINEERING SYSTEMS

WHAT WE DO

We turn manufacturing requirements into production-ready machines, lines, and documentation — from concept to plant floor.

01

MCAD/ECAD DESIGN

CAD/CAM/CAE conceptual and detail design, prototyping, for transportation and manufacturing systems.

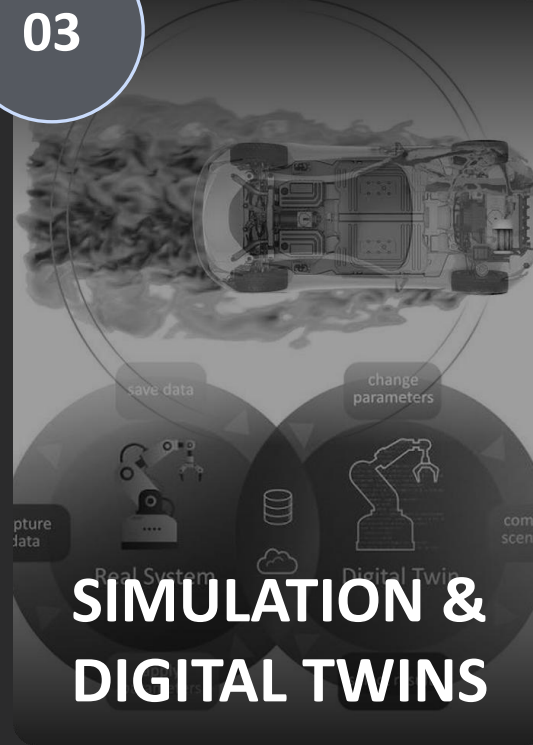

02

ROBOTICS & AUTOMATION

Robotic-assisted cell development and automated assembly line integration, including PLC/HMI control.

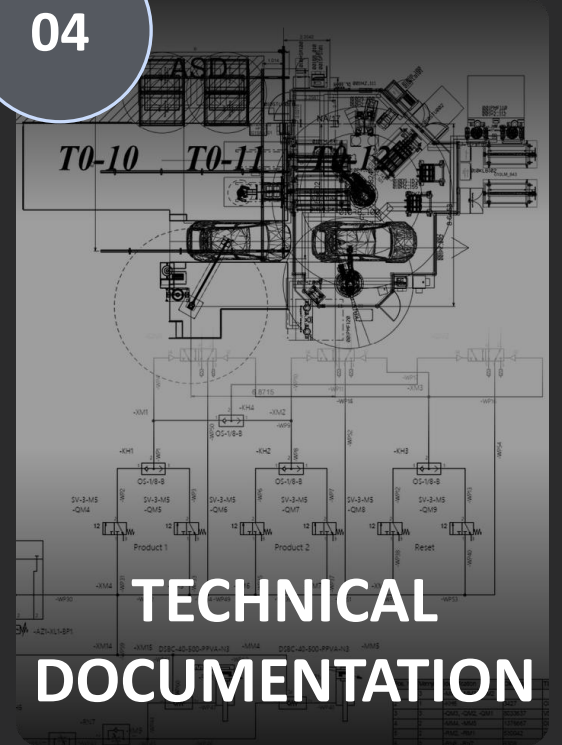

03

SIMULATION & DIGITAL TWINS

Structural and mechanical CAE testing to validate designs before they reach the floor.

04

TECHNICAL DOCUMENTATION

BOM management, engineering blueprints, and electrical/pneumatic diagrams built to client standard.

OUR TEAM

A compact, senior engineering team built around direct ownership of every project.

7

COLLABORATORS

Among Mechanical, Electromechanical, Materials, and Mechatronics engineers.

25+

YEARS OF COMBINED EXPERIENCE

Across automotive, aerospace & industrial automation sectors

2021

ESTABLISHMENT YEAR

Chihuahua, México · Operations across 4 countries.

MCAD / ECAD DESIGN

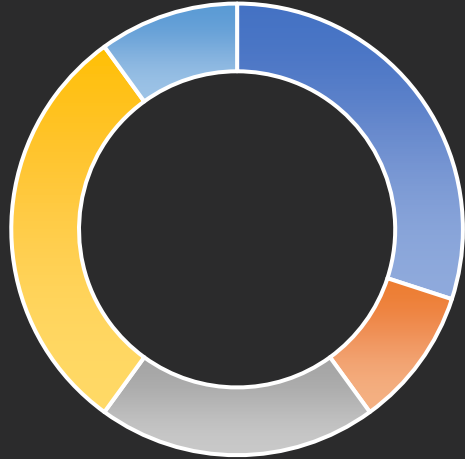

ROBOTICS & AUTOMATION

SIMULATION & DIGITAL TWINS

TECHNICAL DOCUMENTATION

Every project is led directly by senior engineering staff — no hand-offs, no junior dilution.

CAPABILITIES AND MARKETS

- Mechanical Design
- Electrical Design
- Automation and Integration
