# GLOBAL FLOCK GROUP

## High-Quality Object-flocking from Mexico

GF started its operations in June 2009 in order to provide to its customers in North America object-flocking in the best quality available.

*GF Plant in Tetla, Tlaxcala (Central-Mexico)*

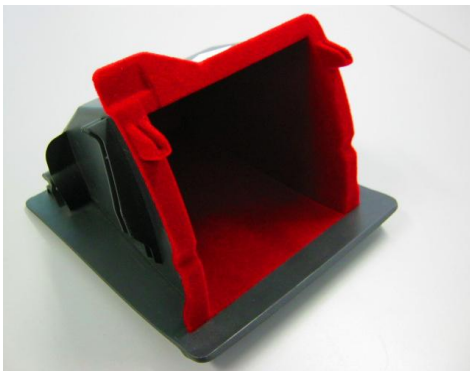

# GLOBAL FLOCK GROUP

## High-Quality Object-flocking from Mexico

GlobalFlock®

GF is Tier-2/3 for serial parts from Mercedes-Benz, Cadillac, Audi, BMW, Lincoln, Infiniti, Mazda, Ford, Volkswagen, Toyota, Chrysler and others. Through our high density flocking process, even flock colors in contrast to the substrate can be applied without any shine through of the substrate.

*Flock-colors in contrast to the substrates applied from GF without any shine trough of the substrate*

# GLOBAL FLOCK GROUP

## High-Quality Object-flocking from Mexico

GlobalFlock®

The Global Flock manufacturing process allows the flock-fibers to stand uniform with high density in the adhesive-bed. The benefits are:

- Superior noise reduction of the flocked area
- Superior resistance against wear
- A soft and esthetic surface – avoids scratches on sunglasses
- Glare reduction – avoids sunlight reflections for HUDs
- Applicable on difficult geometries

*2020 Mazda CX-30 flocked Head-Up-Display frame*

*VW New Beetle Jumbo Box*

*Flocked Spring*

# GLOBAL FLOCK GROUP

## High-Quality Object-flocking from Mexico

GlobalFlock®

GLOBAL FLOCK can flock almost any substrate in any geometry, color, size and quantity! GF is the only object-flocker in North-America who can flock with the very smooth Nylon-flock-fiber PA6.6; 1.7 dtex; 0.5 mm as we do in the flocking of pillars in UV-resistant automotive colors.

*B-Pillar from Nissan TIIDA  
flocked by GF with PA6.6;  
1.7 dtex; 0.5 mm*

*Detail of a B-Pillar from Nissan TIIDA flocked by GF*

*One of our latest development is the flocking of logos inside of bins, which was first shown to the public in 2017 at the Automotive Interiors Expo Novi, Michigan.*

*Non production part – for illustration purposes only.*
