## Giesecke+Devrient – a SecurityTech company

Our confidence in navigating our lives is built in large part on the most basic things: your payment will work at the grocer's, your ID will establish who you are, your phone will connect when you leave your home. We take this trust in the world for granted, but it is built, and it is earned. G+D has been in the business of securing that trust since 1852.

Now, as a global SecurityTech group headquartered in Munich, G+D provides reliable solutions across Digital Security, Financial Platforms, and Currency Technology. We have 14,500 employees across 118 subsidiaries and joint ventures in 41 countries, powering a turnover of €3.2 billion in 2025.

**We make the lives of billions of people worldwide more secure.**

Dr. Ralf Wintergerst,  
Group CEO Giesecke+Devrient

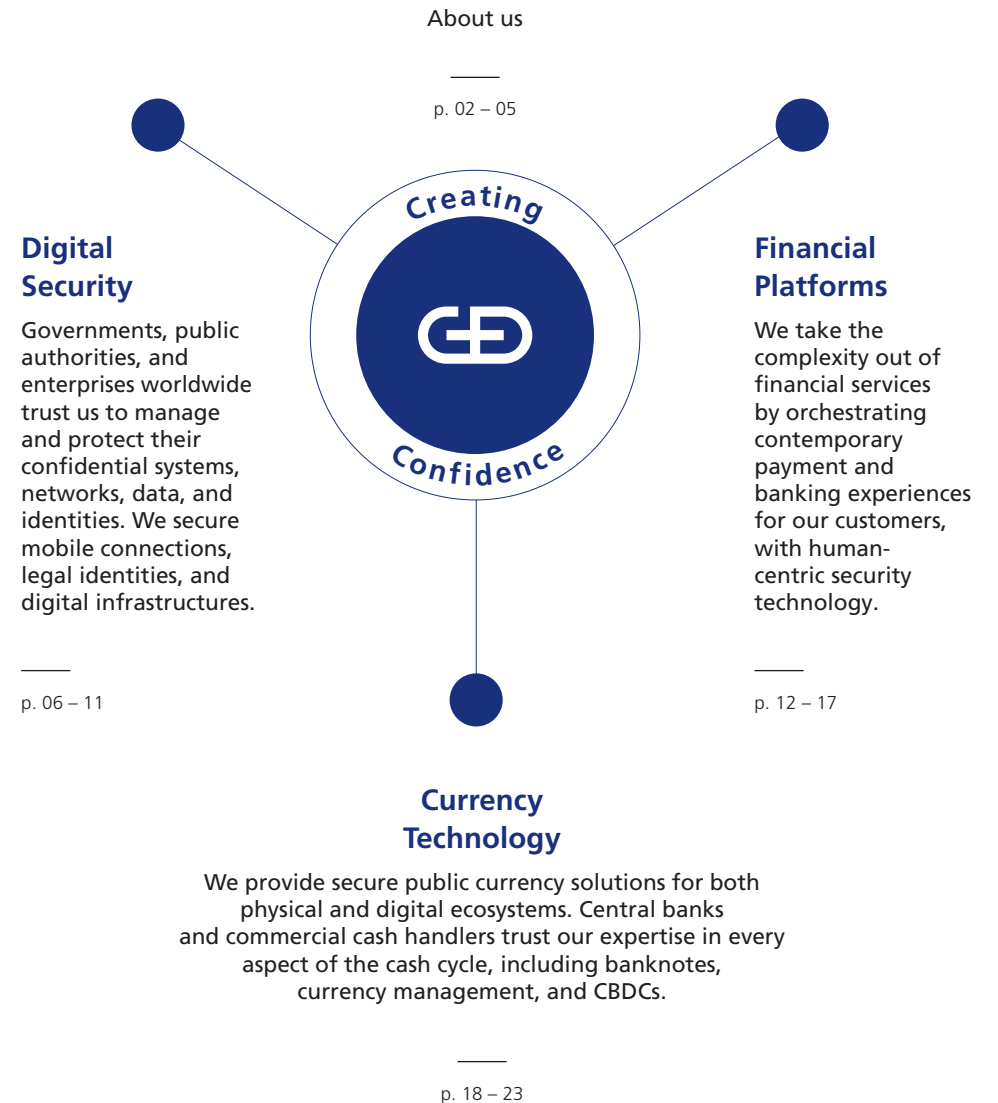

## Creating Confidence

What is the world without trust?

At G+D, we shape trust in the digital age, with built-in security tech. As the world becomes more and more digital every day, the reliance on digital systems grows and they become a fundamental part of enterprises and governments. The digital future depends on the confidence in this new ecosystem of trust.

In that regard, G+D is well positioned to support our customers and partners on this future journey. We give you confidence in those parts of your life where certainty means everything. For almost 175 years, we have been the reliable partner of our customers worldwide.

Today, G+D is a SecurityTech company that offers innovative physical and digital solutions in the three segments of Digital Security, Financial Platforms and Currency Technology – making the lives of billions of people more secure.

A woman in a grey sweater is shown in profile, holding a smartphone. The background is a blurred digital environment with glowing blue and purple lines forming a network or data structure. A dark blue circle with a white border is positioned in the upper right quadrant, containing the text 'Digital Security'.

Digital  
Security

**We manage and protect  
confidential systems,  
networks, data, and  
identities, across the  
physical, digital, and  
mobile realms.**

While technological advances have changed the digital landscape and our lives, it is also true that the new reality presents opportunities for bad actors. Cyberattacks against nations, companies, and individuals are rising.

Equally, the growth of the IoT offers incalculable opportunities, but also creates more portals for exploitation as more devices connect to it.

More than ever, our daily lives (including work and travel) depend upon secure identities, especially now as eGovernment and eID solutions change the way citizens and public authorities interact. Safeguarding confidential systems, networks, data, and identities is critical.

Ensuring our interconnected world remains safe for us all requires a thoughtful approach that guarantees security, while remaining accessible and user-friendly. G+D uses its leadership and experience to secure mobile connections, sovereign identities, and critical digital infrastructures.

Whether solving the challenges thrown up by the IoT, managing a sovereign identity across an individual's life cycle, or protecting essential digital communications with cutting-edge cybersecurity, G+D is your partner in building trust with a human touch.

## Connectivity & IoT

Our introduction of the world's first commercial SIM card more than 30 years ago was one of the foundations of highly secure cellular connectivity. As a tech leader today, G+D provides innovative solutions for SIM, eSIM, and the IoT. We unlock business potential for our customers through IoT innovation with built-in security tech.

## Identity Technology

Through our joint venture Veridos, G+D issues, manages, and verifies legal identities physically and digitally. We've been working with sovereign identities for more than 150 years, and offer a cradle-to-grave identity portfolio trusted by 100 countries around the world.

## Digital Infrastructures

Our sophisticated cybersecurity solutions help move the needle toward digital sovereignty for governments, companies, and society itself. G+D's subsidiary secunet is the IT security partner of the Federal Republic of Germany, and the market leader for security-related solutions at the highest level.

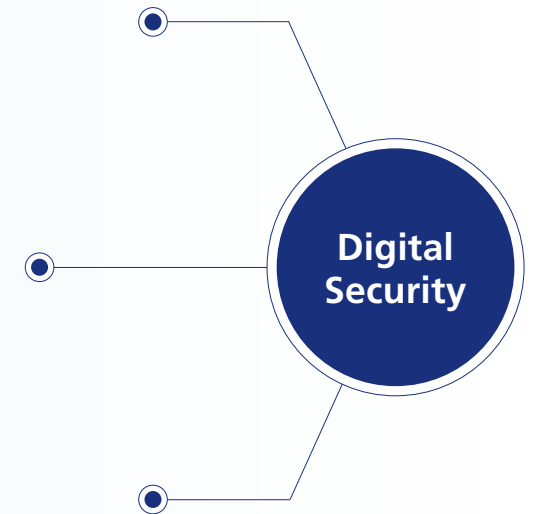

We provide the stringent safeguarding our hyperconnected world requires without compromising on user experience. **Governments, enterprises, and citizens trust G+D to secure their networks, data, and identities in the physical world, as well as digital and mobile settings.**

**1 billion**  
eSIM devices  
are enabled by G+D's secure SIM OS.

**100**  
countries worldwide put their  
faith in G+D's cradle-to-grave  
identity portfolio.

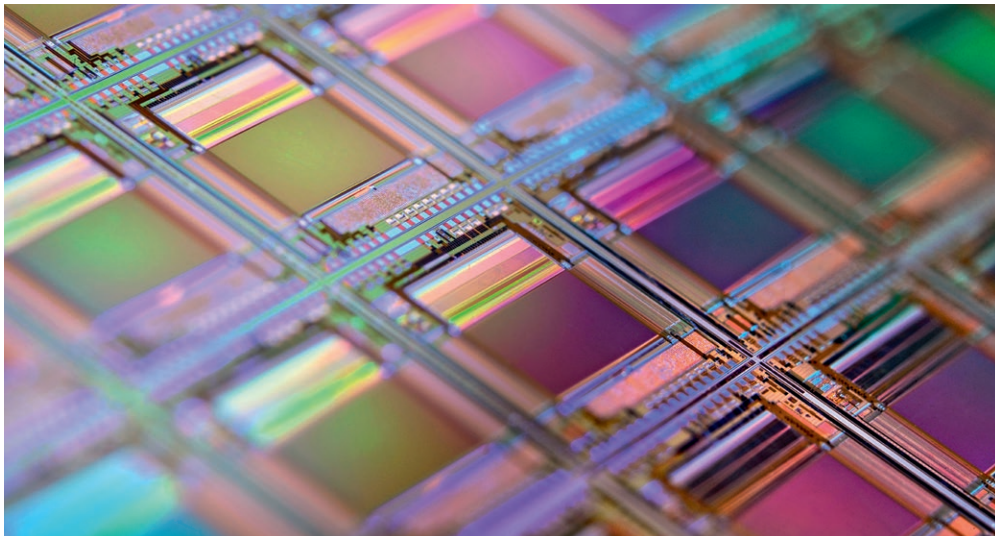

**€ 459 million**  
secunet's annual sales more than  
quintupled between 2015 and 2025,  
reflecting the demand for our trusted  
security technology.

A person wearing a bright yellow long-sleeved shirt and blue jeans is sitting on a bed. They are using a silver laptop with their right hand on the keyboard. In their left hand, they are holding a white credit card. The background is a softly lit room with a white pillow and a green plant. A blue curved graphic element is on the left side of the page.

Financial  
Platforms

**We create contemporary  
payment and banking  
experiences for the  
digital age.**

The digitalization of our lives has raised the bar for what we want in terms of ease of access, convenience, and inclusivity, while maintaining high security.

Cards and digital payments are surging, with physical and digital customer journeys converging across the financial industry. As new forms of fraud arise, trust needs to evolve as well – without making everyday financial transactions more complicated. This drives innovation across banking and payments. Payment technology and trusted software that take the complexity out of digital services are in high demand.

G+D has been a market leader across card and digital payments since the invention of the smart card. We enable an end-to-end customer journey, from onboarding and authentication over card issuance to digital banking, and a highly secure checkout in e-commerce.

Our portfolio includes 100% environmentally sustainable cards, accessible payment methods, and other digital solutions that make payment systems more inclusive. A strong focus on user experience is the common denominator in everything we do, driving us to find solutions to improve the lives of millions of end users around the world.

### Trusted Software

Our Trusted Software division G+D Netcetera takes the lead in human-centric solutions demanded by highly secure, privacy-driven environments like payments and banking. We give end users the seamless experience they require.

### Payment Technology

As a one-stop shop, we produce and personalize hundreds of millions of payment cards every year, and secure their “digital twins” for mobile and online payments. We combine global reach with the ability to adapt to local needs, and serve our customers worldwide.

### Financial Platforms

Over  
**500**  
million contactless cards  
made by G+D delivered every  
year to consumers worldwide.

More than  
**160,000**  
merchants  
rely on G+D Netcetera's solutions for  
secure online payments.

Over  
**3 billion**  
digital payment  
transactions  
are protected by G+D's  
tokenization solutions.

Over  
**5,000**  
banks and issuers  
worldwide trust G+D's payment  
and banking expertise.

Eight of the world's top 10 financial institutions trust G+D's expertise in payment and digital banking. **We combine technology, regulatory compliance, and user-centric design to enable accessible, efficient, and secure financial services.**

**We shape the future  
of currency with  
technology that people  
can trust worldwide.**

The Earth just welcomed its 8 billionth resident; by 2050, there will be almost 10 billion people populating our planet. In a globalized economy, societies rely on secure access to public currencies. As a global market leader in this space, G+D offers unique solutions across the entire cash cycle, physical or digital.

Ever since we printed our first banknote in the 1850s, G+D has been synonymous with securing public currencies. Today, we are a trusted partner to 145 central banks worldwide. We ensure cash remains a trusted good through our forgery-proof and sustainable banknote solutions. Furthermore, we help keep cash competitive and resilient by enabling efficient banknote processing through increasing automation and data-driven technology.

Embracing the role of cash as a universally accessible public infrastructure, we work with many central banks on digital complements to cash – Central Bank Digital Currencies (CBDCs). These transfer the values of cash into the digital age, enhance financial inclusion, and unleash digital payment innovations.

G+D offers a holistic portfolio for the future, looking at the entirety of currency technology. We aim to build connected physical and digital currency ecosystems.

## Currency Technology

### Digital Currency Ecosystem

G+D is a global trailblazer in Central Bank Digital Currencies (CBDCs), the central-bank-backed digital cash equivalent that is designed to be secure, reliable, convenient to use, and inclusive.

### Currency Management

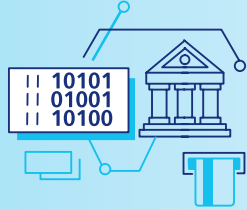

G+D covers every aspect of cash processing, from machines of every size, to the software they integrate with, to complete turnkey solutions. We count central banks, commercial banks, CITs, casinos, and others among our clients.

### Banknote Solutions

From design to printing to end-of-life solutions, G+D is the preferred partner for central banks around the world. We've been printing money since 1852: our expertise in banknotes is unparalleled.
