

About Nifco America :

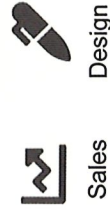

Nifco is a global company that designs and manufactures custom injection-molded plastic components and assemblies. Nifco's first area of business was plastic automotive fasteners. Its scope has since expanded into nearly all areas of the automobile. Nifco supplies interior and exterior parts, kinematic assemblies, fuel components, and more to nearly every OEM in the world.

**WOWING
THE
WORLD**

fasteners

Nifco plastic fasteners continue to reduce labor and manufacturing time while also driving down cost and vehicle weight.

interior

Leveraging a keen awareness of contemporary buying trends – in conjunction with best materials and manufacturing techniques – Nifco ensures the best and most cost-effective interior components on the market.

powertrain

We design and manufacture the best injection-molded components for current vehicles, as well as the powertrains of tomorrow - hybrid, electric, hydrogen, and other alternative propulsion methods.

exterior

Nifco manufactures exterior parts and assemblies all around the vehicle: doors, windows, engine bay, bumpers, and beyond. The results are lower costs, improved durability, and a better end-user product.

kinematics

By combining essential functionality with elegant appearance, Nifco excels at producing components and assemblies that move and change to address your customers' needs.

fluid control systems

Critical parts, ones that relate to occupant safety, are manufactured in a clean environment and subjected to the highest quality standards possible.
