

BYG

Precision Metal Components for the
Automotive Industry

Core Capabilities

- **High-pressure die casting** in aluminum & zinc
- Precision CNC machining
- IATF 16949 & ISO 9001 Certified
- Trusted partner for automotive suppliers
- Manufacturing in Mexico
- Local Engineering Support

Manufacturing Footprint
Mexico | Thailand | China

BYG is a manufacturing partner specializing in precision metal components through **High Pressure Die Casting (HPDC)**, CNC machining and **value-added** manufacturing services. With advanced manufacturing technologies, **certified quality systems** and **local engineering support**, we deliver **cost-effective**, reliable and high-quality solutions from prototype through mass production.

Representative Products

Manufacturing Capabilities:

- **High-pressure die casting** in aluminum and zinc
- Precision CNC machining (3, 4 & 5-axis)
- Complete project management from prototype to mass production
- Assembly and customized value-added services
- Surface finishing through qualified supply partners
- IATF 16949 quality system with full APQP & PPAP support

✓ 350T–1250T Die Casting Capacity ✓ 3, 4 & 5-axis CNC machining ✓ IATF 16949 & ISO 9001 Certified ✓ Prototype to mass production ✓ Local engineering support
