Oil & Gas

Pharmaceutical

WHAT WE DELIVER

MACHINE TOOLS

Exclusive partnerships with the world's leading CNC manufacturers. The right machine for every application, at every scale.

ENGINEERING & AUTOMATION

Special machine design, robotic cell integration, and production line automation. In-house engineering capability deployed across five continents.

METROLOGY & QUALITY CONTROL

Precision measurement and quality control at every stage of production, from tool presetting to final certification.

DIGITAL SOLUTIONS

IIoT, AI, and data intelligence that connects the shop floor to real-time decisions.

AFTER-SALE SERVICE

Field service, planned maintenance, spare parts, and application support — across every brand we represent.

OUR TEAM

Factory-trained engineers and technicians. Regional presence. Single-point accountability.

130+

Sales & Service Engineers

Deployed across the region

48+

Application Engineers

Trained directly at the manufacturers' factories

10+

Software Engineers

Specialists in IIoT, AI, and industrial data

9

Regional Tech Centres

Full-service hubs for rapid on-site response

TECHNOLOGY PARTNERS IN MEXICO

Other technology partners in South America.

TRUSTED BY INDUSTRY LEADERS

STRATEGIC CLIENT RELATIONSHIPS

MOLGROUP maintains strategic relationships with leading companies across the region and around the world.

120 YEARS OF INDUSTRIAL OPERATION

The greatest challenge is always the next one.

Built around customer needs

Each entity was built in direct response to a market need — adding specialized capabilities, not unrelated businesses. The result is a coherent offer designed around the full scope of manufacturing.

Accumulated knowledge

120 years of continuous operation in Latin America means deep knowledge of the region's industrial landscape, logistics, regulatory environments, and manufacturing culture.

Long-term relationships

We measure success in years, not deals. The relationships we value most — with customers and partners — are the ones that grow over time.

We are here not because of where we came from. We are here because of what we kept choosing to do next.
