

INDUSTRIAS LTG S.A. DE C.V

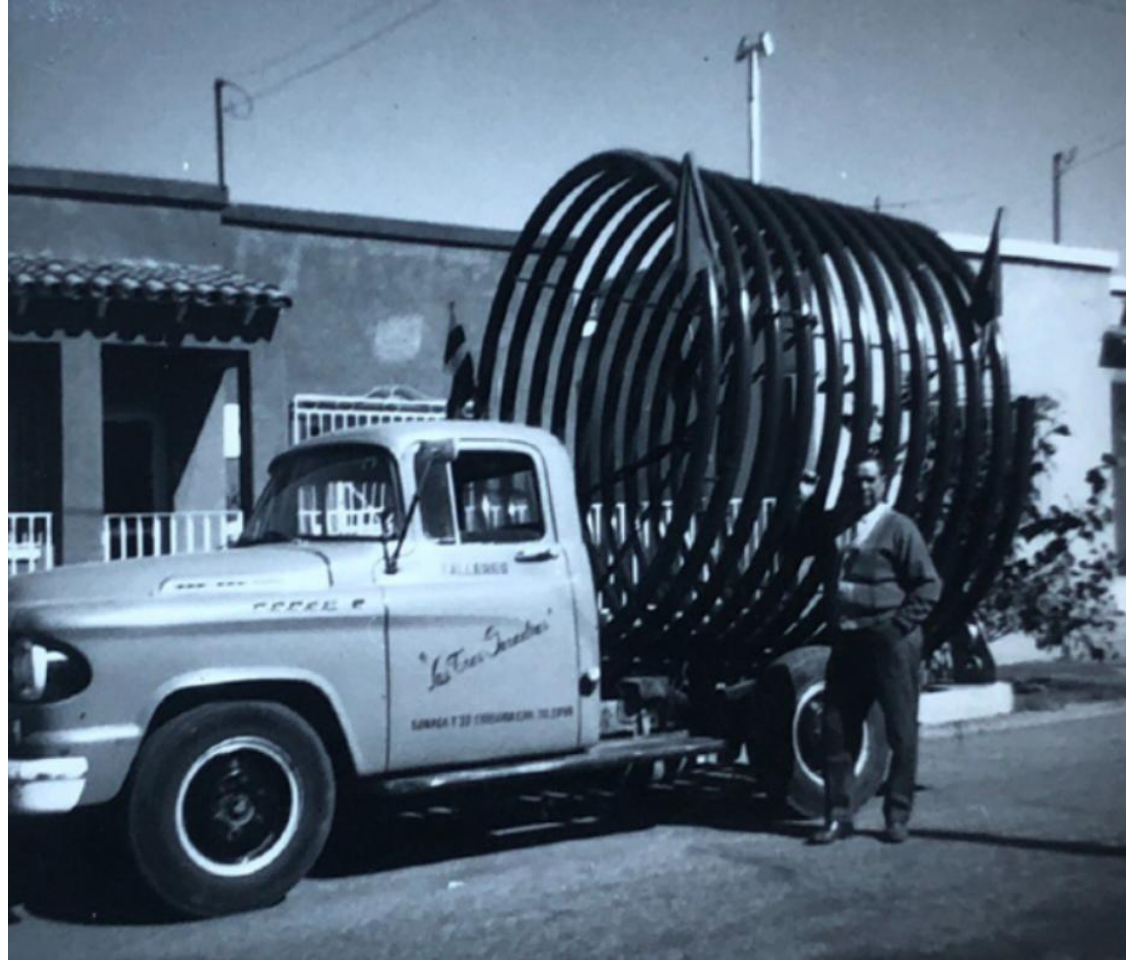

LTG
CALIDAD INDUSTRIAL

HISTORY

We are a company based in Chihuahua, Mexico, founded in 1910 under the name "Las Tres Garantías"—one of the region's first foundry and machining businesses. We supply products that meet the following criteria:

1. Quality
2. On-time delivery
3. Competitive pricing

Our services have evolved over time, and we now specialize in the design and manufacturing of production components for various industries, including the electrical, automotive, medical, and aerospace sectors, among others.

FUNDAMENTALS

MISSION

To provide comprehensive solutions to our clients in the manufacturing industry through the engineering, fabrication, and procurement of products and services—covering both production needs and MRO requirements.

VISION

To serve as a strategic partner in supplying engineering solutions and parts within the supply chains of world-class companies, leveraging alliances with domestic and international suppliers to secure the best pricing and lead times, while consistently meeting quality standards.

VALUES

-Honesty -Excellence -Responsibility -Leadership -Communication
-Collaboration -Integrity

QUALITY POLICY

At INDUSTRIAS LTG, we are committed to excellence and customer satisfaction, offering high-quality products and services to the manufacturing industry. As a company dedicated to manufacturing parts for world-class clients, we pledge to uphold the following principles:

Customer Satisfaction: Our primary objective is to understand and meet our customers' needs. We strive to provide products that align with their specific requirements, adhering to the highest standards of quality and timely delivery.

Continuous Improvement: We foster a culture of continuous improvement throughout the organization. We regularly review our processes and systems to identify opportunities for optimization and efficiency, ensuring sustainable growth and adaptability to changing market demands.

Process Quality: We recognize the importance of each of our core processes to the final outcome of our products. Therefore, we implement rigorous quality controls at every stage to ensure precision, consistency, and compliance with specifications.

Personnel Competence: We value and promote the training and development of our workforce. Our team receives necessary training in the latest manufacturing technologies and techniques, enabling us to maintain a highly competent team committed to quality.
