With over 80 years of experience in the world of machine tools and flexible production systems, Mandelli designs and manufactures 4 and 5 Axis Horizontal Machining Centers, for shapes that require higher and higher performance both in turning and milling as well as a reduction in the setups from one type of processing to another. With a strong propensity towards technological innovations and customization of solutions, Mandelli's machines are made according to the guidelines of the Industry 4.0 world, offer excellent performance for Power, Speed, Versatility and Endurance, ensuring its customers a rapid and effective return on investment (ROI).
