

A State-Of-The-Art Laptop Running on an 80's Operating System!

This could be your business if your **Human System** is still working with models from the last century.

upgrades your Human Operating System and ensures it's the one needed to meet the challenges of growth in this new environment.

Technological and social evolution have changed the human-side challenges that businesses face.

Yet, we are still using models from the last century... The results have not been good!

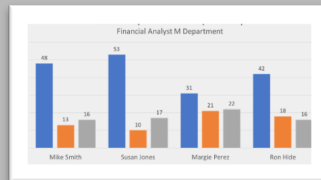

InZynch™ provides real 21st century solutions by taking your business beyond four outdated assumptions that have originated huge financial, operational and personal costs for decades.

InZynch™ is not just another app or software, you already have too many of those! It is an integral solution that uses **proven operating models + simple, effective tools** to ensure...

PERFORMANCE

PRODUCTIVITY

INTELLIGENCE

"We learned to truly work based on outcomes in alignment with our business goals, achieving the lowest production costs and highest levels of worker productivity in shallow water production in the world"

Ricardo Villegas, Sub-Director in Charge of Shallow Water Production Pemex PEP

"In Amcor, with the experience of Mr. Garcia Jurado as external consultant, we were able to introduce a deep cultural change at the 13 sites in the country. The results were so good that this project was considered a worldwide benchmark.

In Valeo, InZynch supported us with intercultural training. The feedback from the expatriate participants was excellent, some of them mentioned that this training was of higher value and content than the ones they have taken in Europe or Asia."

Antonio Velazquez – HR National Director
