METAL PULLEYS

VARPULLEY

VARPULLEY

ABOUT US

- *Mexpulley is a 100% Mexican company in the auto parts industry dedicated to the manufacture of automotive steel pulleys that began operations in January 2003.*
- *On February 5, 2020 VARESE SA de CV, acquired the shares of the company Mexpulley to expand the product portfolio incorporating the entire line of Pulleys.*

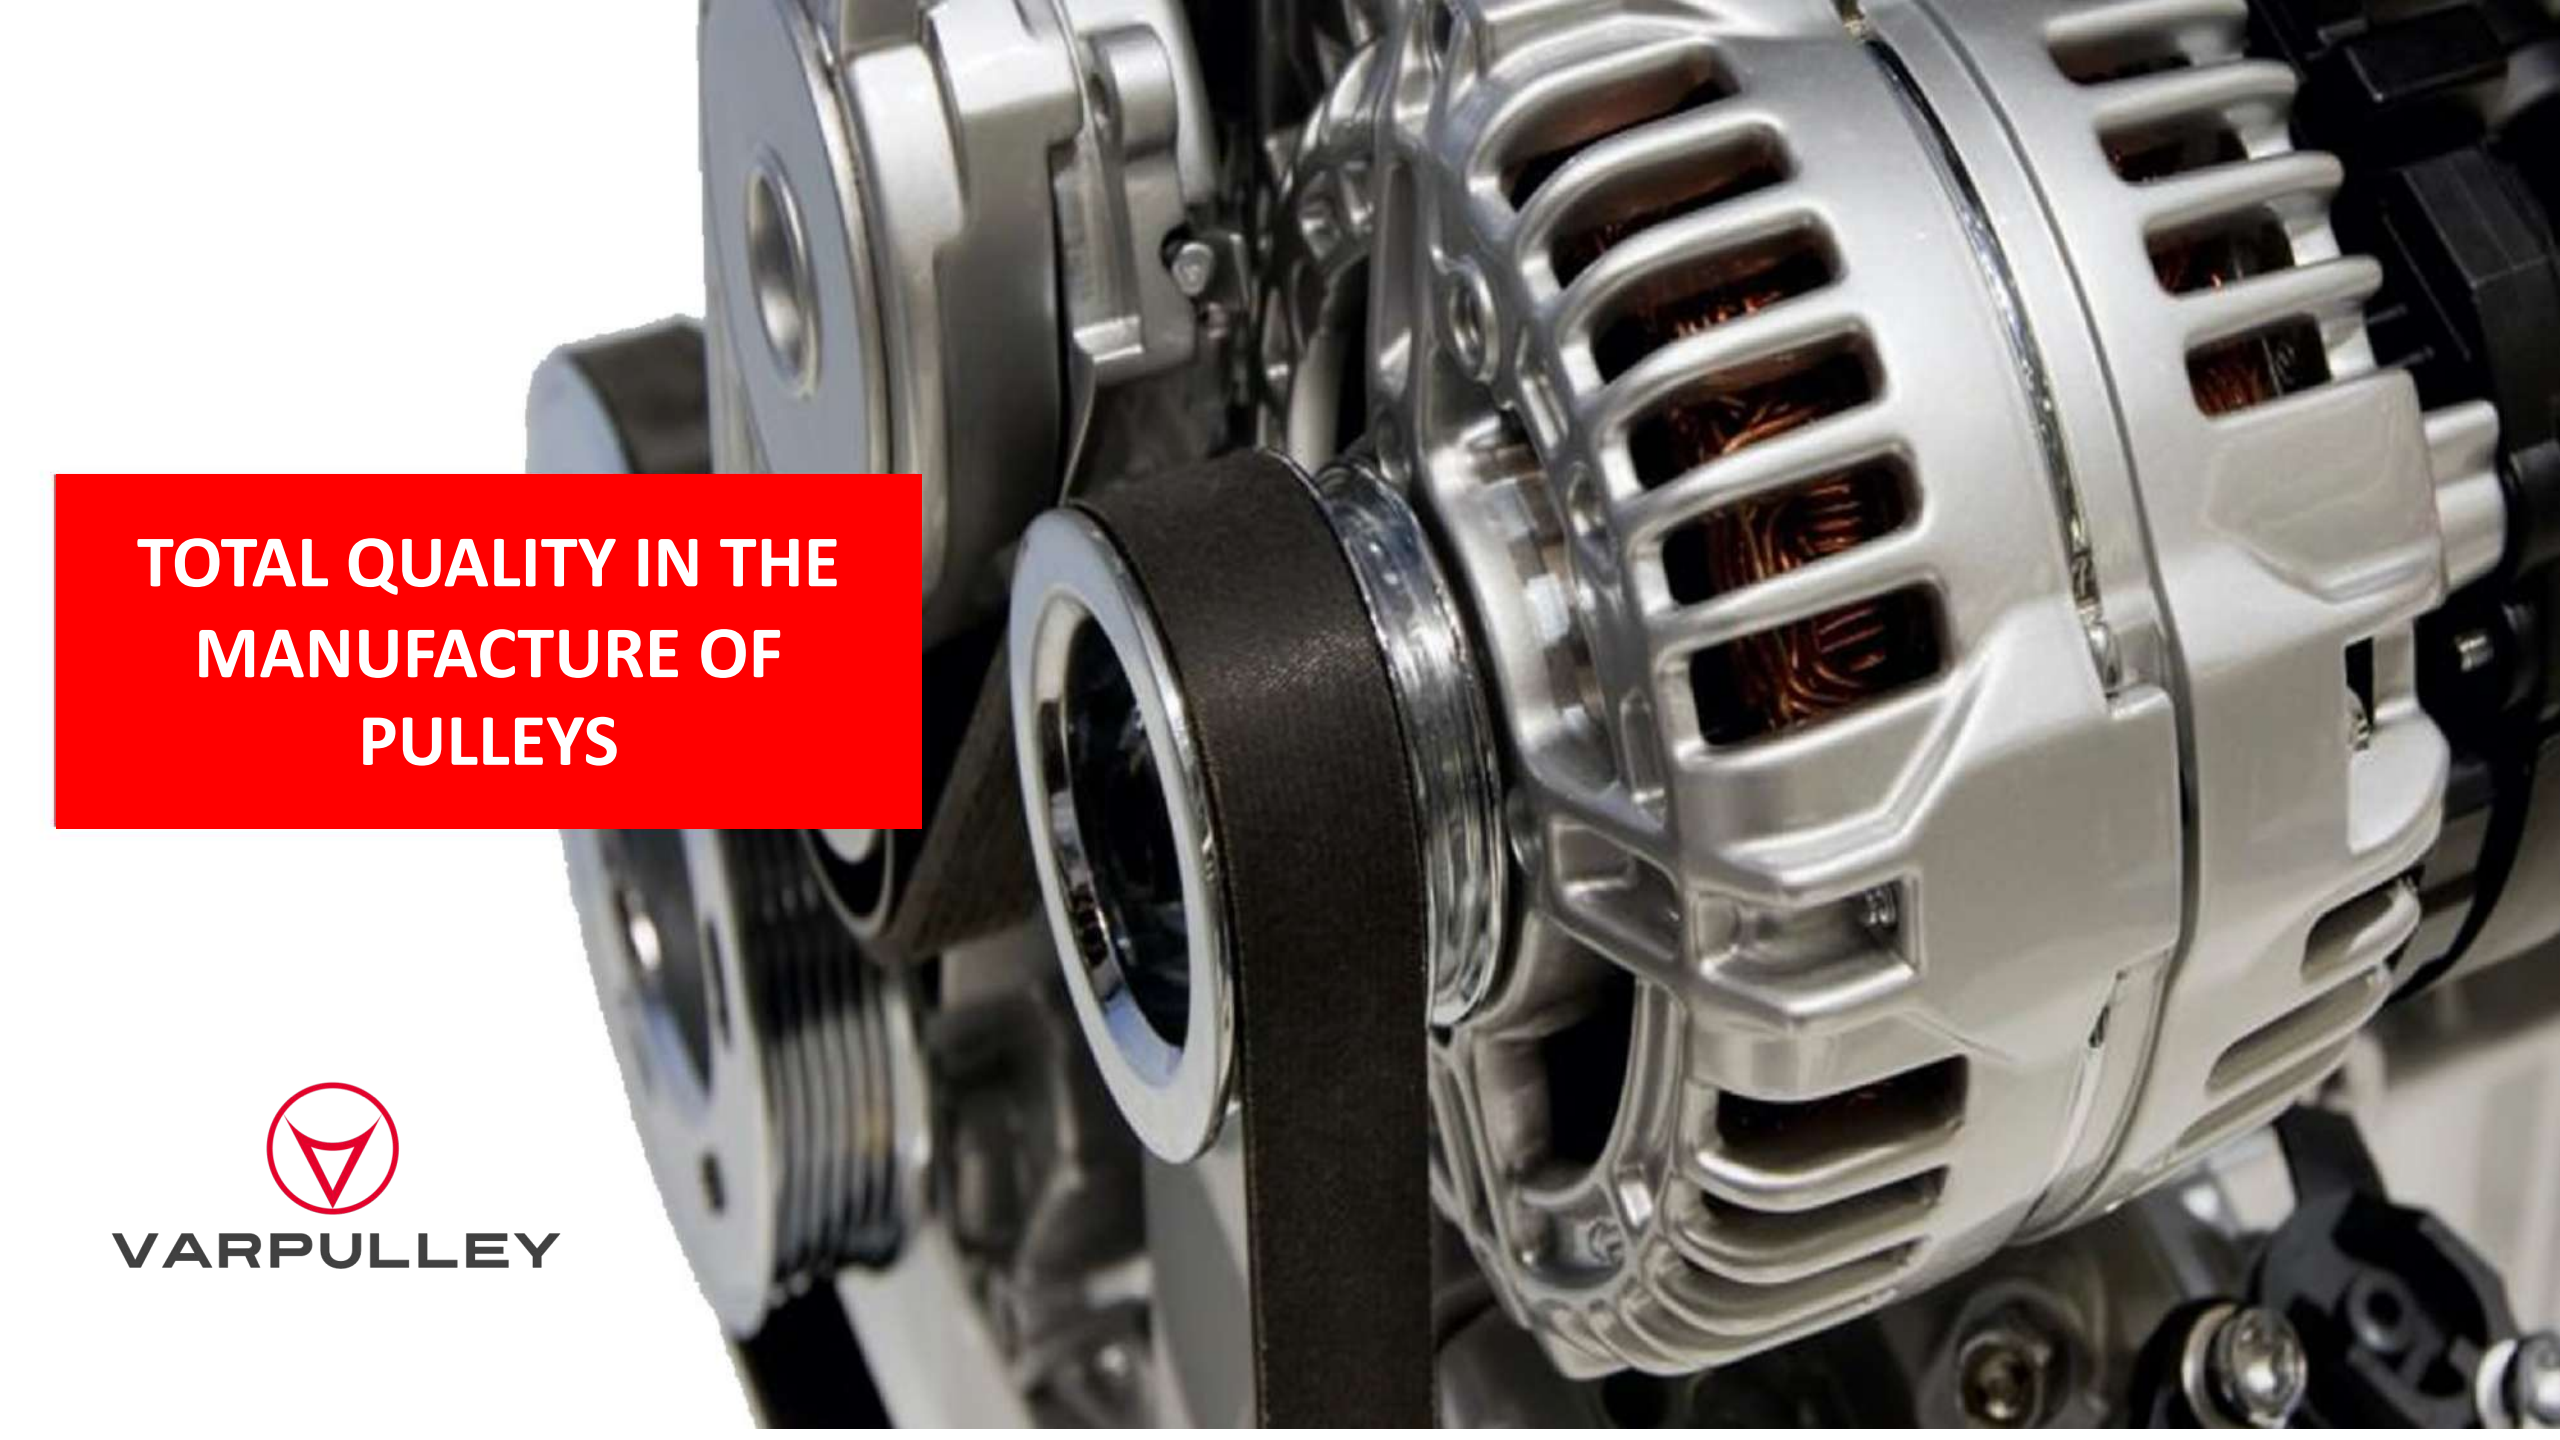

VARPULLEY

ABOUT US

In the manufacture of our Pulleys we use steels of the highest quality and resistance with manufacturing processes that guarantee our pulleys to comply with all international quality requirements.

Our work team reviews every detail in the manufacturing process with high-tech equipment, managing to manufacture highly competitive pulleys worldwide.

We are ISO 9001: 2008 certified

A detailed close-up photograph of an automotive alternator and its associated pulley system. The alternator, with its distinctive silver-colored cooling fins, is the central focus, showing its internal copper windings. It is connected to a black rubber drive belt that runs over a series of pulleys. The pulleys are made of polished metal and are part of a larger engine assembly. The background is a plain, light color, emphasizing the mechanical components.
