

Packaging solutions

ovvindustries.com

Integrated Fabric Resource

specializes in the custom design and manufacture of rack assemblies, tote liners and bin liners for work in-process, expendable, and returnable material handling systems.

We provide customers with innovative solutions for their material handling needs and product protection. Our products are used in handling a broad range of manufactured parts of truck and automotive interior and exteriors, appliances, electronics and other parts with class-A and other special handling requirements.

As a leader in returnable packaging design and manufacturing we are committed to helping our customers create the most effective packaging solution for their needs.
