

**GRAMO  
INDUSTRIAL**  
ELECTROMECHANICS + AUTOMATION

We are a leading company with more than 18 years of experience in the design, manufacture and integration of multiple projects, with a strong sense of service and commitment with our clients.

Faithfully focused on security, caring for our environment, quality, and productivity, we direct our resources to offer profitable engineering and manufacturing solutions based on innovation.

Our main action fields are:

- Automation & control
- Special manufacturing
- Integral solutions for the industry.

## Large tonnage slat conveyor

# Design & manufacture of special equipment

Aluminum casings for boat impeller

The background of the slide features a collage of industrial and technological elements. At the top, there is a blue decorative border with a repeating triangle pattern. The central area contains a faded image of various mechanical parts, including gears, shafts, and a laptop, suggesting a focus on manufacturing and technology. At the bottom, there is a red decorative border with a repeating triangle pattern.
