

HIGH  
PRECISION  
MACHINING

## Our history in Mexico

Auxim de México

Auxim de México S de RL de CV, starts operating for the first time in 1993 in the city of Puebla, Mexico, at the Industrial Park known as Parque Industrial Finsa, with the purpose of addressing the needs of the precision machining market, specifically for the automotive industry.

Thanks to the tenacity of the first team of technicians equipped with technologically advanced machinery, the first objective of the company was accomplished in 1994.

The first precision part manufactured by Auxim de México, was a support flange produced for the iconic Beetle model from the German car manufacturer, Volkswagen.

## Global History

Auxim Corporate Group

Auxim Corporate Group with headquarters in Madrid, Spain emerged from a small workshop founded in 1963 by Mr. D. Cándido Casas Navarro, with the aim of supplying advanced technical means provided by qualified personnel.

In 1996, Auxim Corporate Group had become the leader of the machining industry in Spain and shortly after became the main supplier for global brands.

Operations in the state of Puebla, Mexico, began in 1994 and in Rumania in 2010.

After 60 years, the essence of family business remains, with finances completely independent and proprietary technology.

## Quality in all of our machining processes

Our formula for success is based on the know-how acquired throughout 60 years of developing in-house technology along with committed and skillful human talent, making sure that our customers will receive a compliant product in due time.

## Production Resources

Auxim de México

We can provide the necessary state of the art equipment for large scale, high precision parts machining.

1. Multispindle lathes
2. CNC lathes
3. Double-head lathes
4. Multispindle lathes
5. Automatic Cells
6. Grinding machine
7. Rolling machines
8. Automatic control machine

Within the extent of the organization we have the capacity for machining any kind of part, at any volume, whether it is made of aluminium or steel, or even other type of light materials.

## Production Facilities

Auxim de México

Industrial premises dimension:  
130,000 sq ft.

Our facilities are equipped to run our production model and we have additional areas to build new production shops in order to increase our capacity according to our customers' new project needs.

## Quality Assurance

Auxim de México

Committed to always deliver high quality standards, an Assurance Quality Program has been implemented along with a measurement laboratory to achieve "Zero Defects" parts, in order to guarantee the effectiveness of our production plan.

Our production process complies with the quality standard recognized by the IATF.

Each part we  
produce is a  
guaranteed  
product.

All the parts delivered  
to our customers  
are compliant and free  
of defects, thanks to our  
rigorous manufacturing  
processes and to our  
production setting  
recognized by the IATF.

## Products

Auxim de México

▶ Spacer Rings / *anillos y arandelas*

▶ Spacer Bushings / *bujes*

▶ Pulley / *poleas*

▶ Armature Shafts / *eje de armadura*

## Productos

Auxim de México

▶ Rotor Shaft with pole body / *ensamble eje-núcleo*

▶ Core / *núcleos*

▶ Stub Axle / *eje de mangueta*

Our products qualify as 100% T-MEC regional origin (USMCA)

## Awards and Acknowledgements

Auxim de México

# On a resolute path to excellence

Over these decades of hard work and commitment, our profound motivation when we receive recognition to our dedication from our customers, which sets us in the right direction towards excellence and quality.

Each part of the  
process is  
supported by a  
capable, skilled,  
trained and  
committed team

In Auxim de México  
we recognize that our  
greatest asset is our  
people, we are a family,  
a success story.

## Our team

Auxim de México

*Currently Auxim de México S. de R.L. de C.V. has a work team of 98 collaborators (indirect labor + direct labor), working hard under the best safety conditions in a 130,000 sq ft area.*

## Human talent that makes a difference

Constant training, continuous improvement and organizational development programs have been a key factor for us to achieve having a stable and reliable workforce with a clear career path.

To us it will never be enough, for this reason we constantly strive to take in and keep within our organization the best field professionals. Our work team is the real added value in Auxim México.

## Work Process

Auxim de México

One of our priorities in Auxim de México is the continuous assessment of our machines, processes and control mechanisms in terms of capacity and reliability.

Our **availability to invest in new processes and equipment** allows us to increase our production capacity to meet our customers' needs.

► We are constantly **looking for new opportunities** and due to our automotive approach we are capable of working for **other sectors** such as:

- Agriculture
- Railway
- Renewable energy
- White goods
- Household appliances
- Heavy vehicles
- Recreational vehicles

## Acquisition and Imports

Auxim de México

Auxim de México is skillful and experienced enough to machine parts with high specifications at a large scale.

We can count on our purchasing experts in both imports and global supplies, to assure efficiency in the raw materials supply chain.
