Information

Who are we?

Innovation in Thermoforming

Experts in design and manufacturing of thermoformed pieces.

Certified processes and avant garde infrastructure.

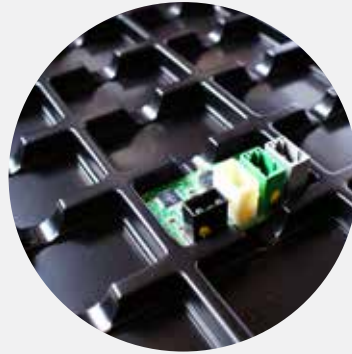

Industries

Automotive

They allow commuting of products. Thickness and material are selected from the product's characteristics. All requirements are taken into account.

Electronics

Trays for transporting electronic products with antistatic, dissipative or conductive properties. The latter offer more protection and ensure the best performance of the product they are carrying.

Retail

Blisters and clamshells make products stand out in shelving space. Attractive packaging that magnifies sales in addition to safety factors these cases offer.

Personal Care

Blisters sealed against cardboard or clamshells that protect cosmetic products. Transparency allows product visibility.

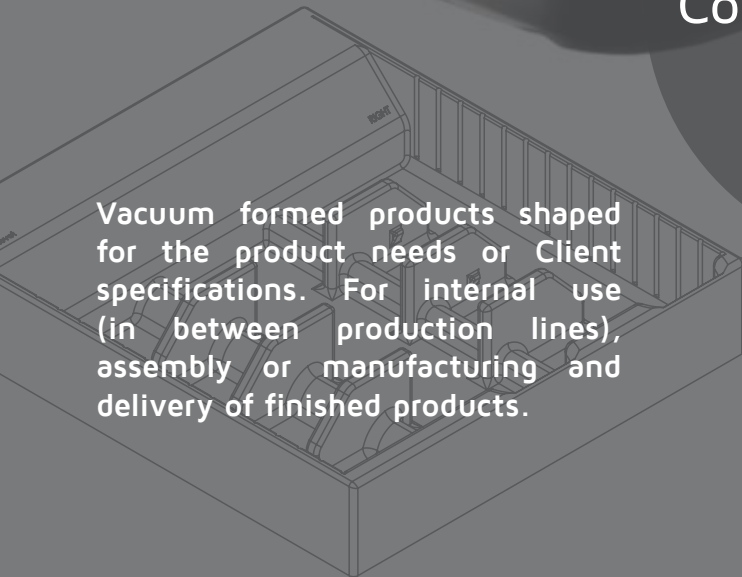

Products

Industrial Containers or Trays

Vacuum formed products shaped for the product needs or Client specifications. For internal use (in between production lines), assembly or manufacturing and delivery of finished products.

Customization

For every project the design is based on component or client requirements and specifications. Aspects such as stackability, protection and contact area are always taken into account.

Materials

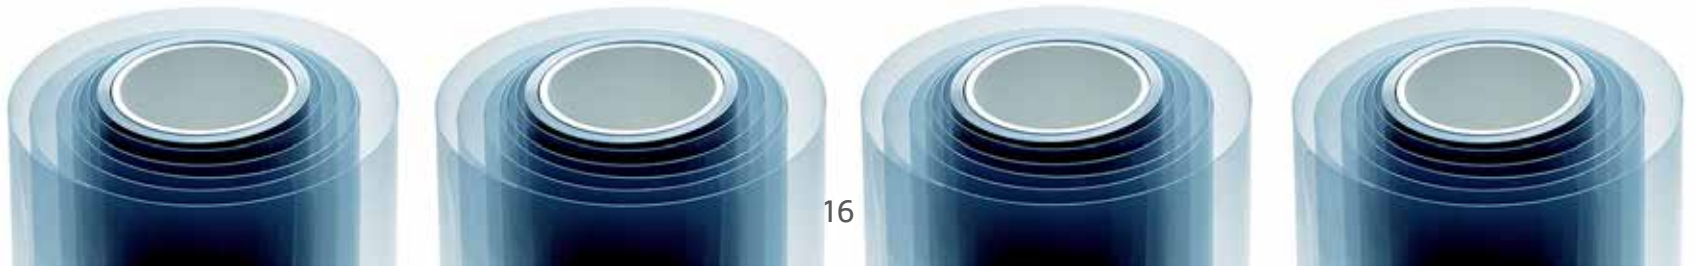

These are the main materials we manufacture in, however we can offer specialized materials as well as different thickness and colors.

ESD

PET

PVC

PS

Process

Our processes of vacuum forming packaging are certified ISO 9001. Increasing efficiency in procedures and guaranteeing high standard activities.

PROJECT EVALUATION

RISK ASSESMENT.
Compilation and analysis of information, crucial for conceptual design and tailoring for each of our customers.

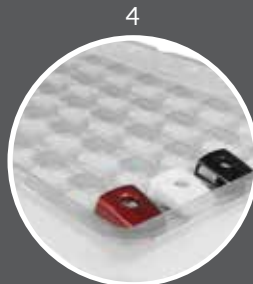

DESIGN, PROTOTYPES AND MOULDING PLANS

Trace of design and production of in house moulds in order to test and efficientize the whole process, maximizing the material use and reducing cost.

MOCK UPS AND VALIDATION

Mould production and testing of every aspect of the concept in order to delineate the final design.

PROJECT RELEASE

Final design finishing touches, moreover than just packaging, we deliver great image as added value.

PRODUCTION

We are experts always working and delivering in time no matter the size and volume of the order.

DELIVERY TO CUSTOMER

We also offer a tailor made option for packaging and logistics depending on what our customers need.

We proudly work with national and international brands.

Socially Responsible

ESR Certificate

Strong commitment so that all of our operations are sustainable. Including the economical, social and environmental aspects.

Program for Developing Young Technologists

Being close to young talent in order to develop innovation for the industry. Different scholarship programs and educational support.

Human Capital Development

We believe human capital is the most important part of the industry. Therefore we constantly seek to offer opportunities to all people without differences. We are committed to equality and fair treat.

Responsible Waste Handling

Certificate partnership with associations that knob plastic scrap in the most appropriate way for the environment.
