Products

| Copper Alloys              | Material Designations     | Aluminum Alloys    | Material Designations |
|----------------------------|---------------------------|--------------------|-----------------------|
| Copper                     | C110, C194, C102          | 1000 Series Alloys | 1050, 1060, 1100      |
| Brass                      | C260, C210, C230          | 3000 Series Alloys | 3003, 3105, 3004      |
| Leaded Brass               | C360                      | 5000 Series Alloys | 5052, 5454            |
| Tin Brass                  | C425                      | 6000 Series Alloys | 6061, 6063            |
| Phosphor Bronze            | C519, C510, C521          |                    |                       |
| Cupro Nickel/Nickel Silver | C725                      |                    |                       |
| High Performance Alloys    | C151, 18080, 19010, 19025 |                    |                       |

| Stainless Alloys  | Material Designations |
|-------------------|-----------------------|
| 300 Series Alloys | 301, 304, 304L, 316   |
| 400 Series Alloys | 430                   |

Solutions

Juárez

| Capabilities                     | Gauge           | Width           | Additional Information                              |
|----------------------------------|-----------------|-----------------|---|
| Slitting                         | 0.006" - 0.080" | 0.200" - 25.00" |   |
| Tin plating                      |                 |                 | Coil plating available                              |
| Stocking & distribution programs |                 |                 | Bars, extrusions and long products. Stock to 8M lbs |

Queretaro

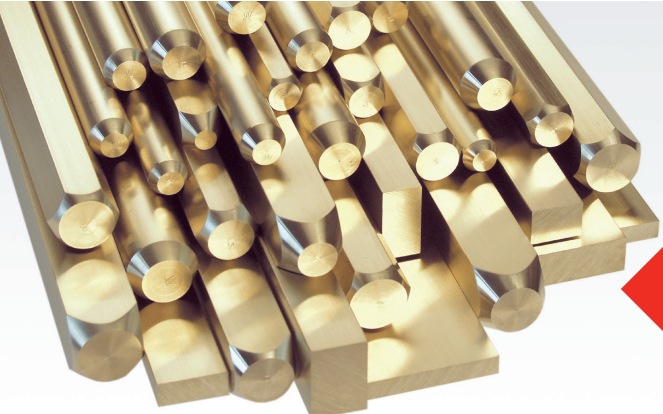

| Capabilities                     | Gauge           | Width           | Additional Information                              |
|----------------------------------|-----------------|-----------------|---|
| Slitting                         | 0.006" - 0.080" | 0.200" - 25.00" |   |
| Transverse winding               | 0.010" - 0.050" | 0.500 - 1.980"  |   |
| Strip edging                     |                 |                 | Round and square                                    |
| Stocking & distribution programs |                 |                 | Bars, extrusions and long products. Stock to 4M lbs |

Wieland Metal Services’ selection of metal products is among the most extensive in the industry today. The inventory in Mexico includes a full range of copper, brass and aluminum alloys in strip, bar, coil and extrusion forms. The exceptionally extensive product line is matched by an equally impressive variety of custom finishing capabilities and value-added services including precision metal slitting and traverse winding.

Strip

Available in standard gauges and configurations or custom specifications.

Bar

Choose from various sizes and geometries. Customized applications are supported by our Applications Engineering experts.

Extrusions

Solid and hollow copper sections in a wide range of sizes - obtain your finished parts in just a few operations.
