COMPANY OVERVIEW

Wiegel is a leading North American-based progressive die metal stamper, product assembler and battery component manufacturer supplying OEMs and tier manufacturers across the globe with custom product solutions for over 81 years.

- **2022 Revenue: \$78.5MM** (37% increase from 2021)
- **Revenue Expected to Increase by over 10% in 2023** (Projection based on booked programs)
- **230 Employees**
- **207,000 SF Operation with 4 Locations**
 - **Wiegel HQ - Wood Dale, IL (68,000 SF)**
 - **Manufacturing Plant - Wood Dale, IL (25,000 SF)**
 - **Manufacturing Plant - Bensenville, IL (52,000 SF)**
 - **Warehouse & Distribution - Elk Grove Village, IL (62,000 SF)**
- **44 Stamping Machines**
 - **26 Presses at Wood Dale, IL Ops**
 - **18 Presses at Bensenville, IL Ops**
 - **Includes progressive high-speed and heavy stamping presses, automation line transfer stamping presses and welding line stamping presses**

WIEGEL HISTORY & PLANT EXPANSION

1941

December 6, 1941 Industrial Tool Works is founded by Otto and Kathie Wiegel in Chicago, IL as a tool and die shop

1954

The company is relocated to Franklin Park, IL and later changed it's name to Wiegel Tool Works in 1958

1978

Purchased land in Wood Dale, IL and built a new **25,000 sq-ft** building for expansion and relocation of business operations

1993

Martin Wiegel, son of Otto and Kathie Wiegel assumes ownership of Wiegel Tool Works.

1994

Wiegel Tool Works shifts business focus from tool and die manufacturing to metal stamping production. In 1997, WTW invests in a **23,000 sq-ft** building addition.

2010

Martin Wiegel's three children, Aaron Wiegel, Erica Wiegel and Ryan Wiegel take over the family business.

2011

Invested in a **20,000 sq-ft** building addition to house additional stamping equipment.

WIEGEL HISTORY & PLANT EXPANSION

2011

Acquired a 25,000 sq-ft building.

2017

Purchased a 52,000 sq-ft building in Bensenville, IL to expand production space.

2019

Wiegel Tool Works introduces its first production automation line with 17 FANUC robots

2021

Expanded operations to a new 62,000 sq-ft facility in Elk Grove Village, IL for warehousing and distribution.

2022

Wiegel Tool Works rebrands the company identity assuming the DBA name, Wiegel, and launching a new logo

WIEGEL GROWTH

WIEGEL SALES

*Sales projections are based on booked programs

CAPITAL INVESTMENTS

2015

- 100-ton Servo Press

2016

- Okuma Vertical Machining Center
- 100-ton Mechanical Press
- Building Acquisition (Bensenville)

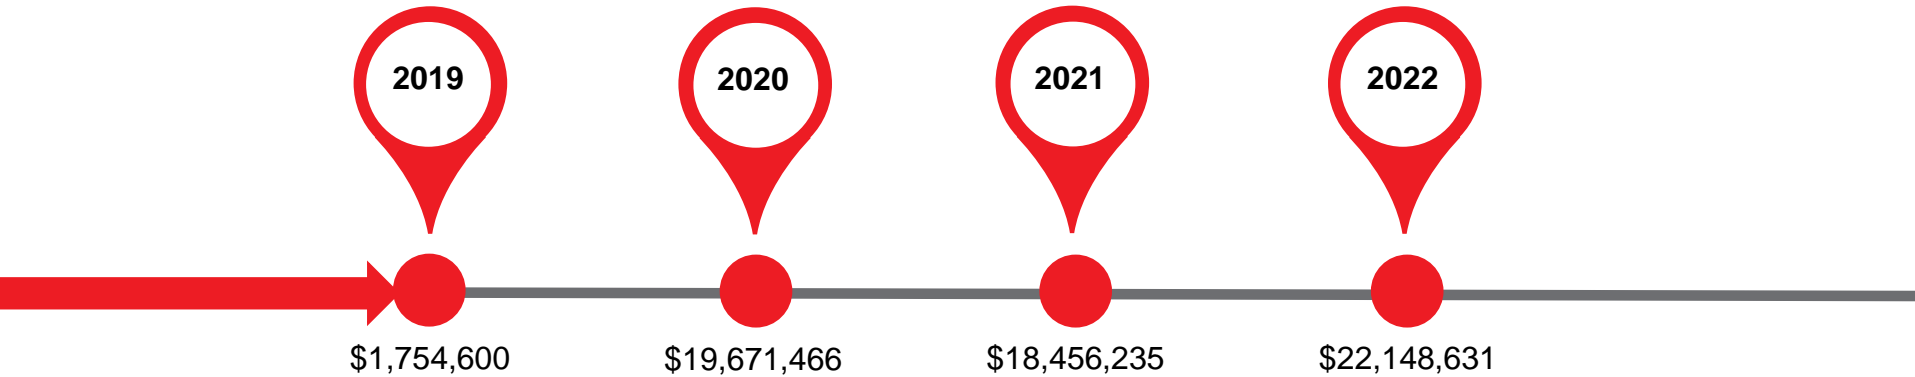

2017

- New Vision Systems
- New Cleaning System
- Building Improvements
- Land Acquisition
- Employee Lunch Room Improvements

2018

- New Roof (Wood Dale)
- New Material Scrap Dock
- Grinder
- (2) Mobile Vision Systems
- Minster Coil Feed Line
- Minster P2H-160 180-ton Press

CAPITAL INVESTMENTS

2019

- Okuma Horizontal Machining Center
- Hole Popper (EDM Drill)
- Zeiss Contura X700 CMM
- 300-ton Minster 120" bed
- Rebuild Existing 400-ton Minster
- Air Compressors
- (2) Roll Welders
- Automation line with (17) Fanuc Robots

2020

- 60-ton Bruderer Press
- Assembly Line
- (3) Komatsu Presses
- (2) Roll Welders
- Minster 400-ton Press
- Progressive/Transfer Dies
- In-line Washer
- (2) Bruderer Lines
- WTW Assembly Line
- Tapping Lines

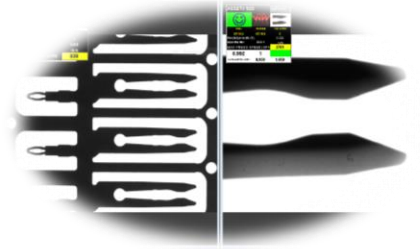

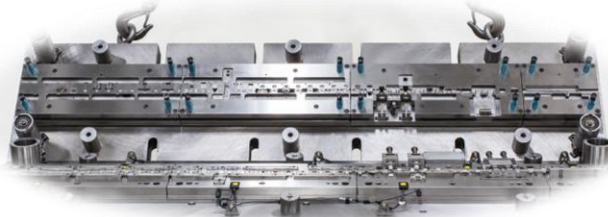

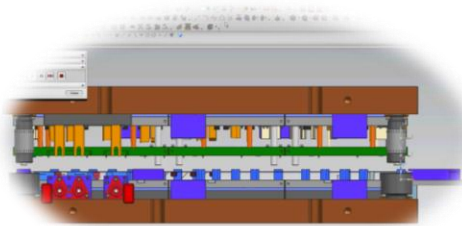

2021

- Welding Systems
- Automation Lines (Robotics)
- Vision Systems
- Laser Markers
- Presses
- Washing Equipment

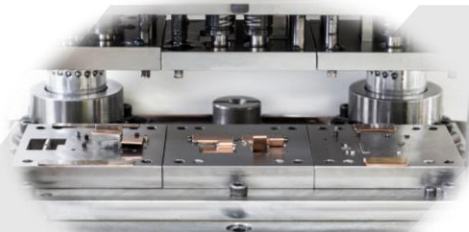

2022

- Welding Systems
- Automation Lines (Robotics)
- Vision Systems
- Laser Markers
- Presses
- (3) Wire EDMs

OUR PROCESS

ENGINEERING \Rightarrow PROTOTYPING \Rightarrow TOOLING \Rightarrow PRODUCTION \Rightarrow INSPECTION

WIEGEL PRODUCTION CAPABILITIES

MINSTER PROGRESSIVE DIE HEAVY STAMPING

Part Specifications:

- Minimum Part Length/Width: 0.25 in (6.35 mm)
- Maximum Part Length/Width: 24 in (609.6 mm)
- Part Diameter: 0.25 in (6.35 mm) to 24 in (609.6 mm)
- Part Thickness: .008 in (.2 mm) to .375 in (9 mm)
- Tolerance: +/- .001 in (+/- .025 mm)

Equipment Capabilities Include:

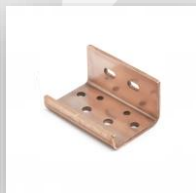

- Press Rating: 100 to 450 tons
- Press Speed: up to 140 strokes/min (spm) on conventional presses, up to 250 spm on servo and up to 400 spm on hybrid presses
- Maximum Press Stroke: 8.5 in (215 mm)
- Maximum Press Bed Length: 120 in (3,048 mm)
- Maximum Press Bed Width: 55 in (1,397 mm)

Camera Detection and Inspection of Parts:

- In-process and post-process camera vision systems (2-D and 3-D camera detection and inspection)
- Safe launch procedures

Appropriate for large/thick material components: busbars, lead frames, brackets, housings, etc.

BRUDERER PROGRESSIVE DIE HIGH-SPEED STAMPING

Part Specifications:

- Minimum Part Length/Width: 0.25 in (6.35 mm)
- Maximum Part Length/Width: 7 in (177.8 mm)
- Part Diameter: 0.25 in (6.35 mm) to 7 in (177.8 mm)
- Part Thickness: .002 in (.051 mm) to .090 in (2.2 mm)
- Tolerance: +/- .001 in (+/- .025 mm)

Equipment Capabilities Include:

- Press Rating: 30 to 90 tons
- Press Speed: Up to 1,500 strokes/min
- Maximum Press Stroke: 3 in (76.20 mm)
- Maximum Press Bed Length: 57 in (1447.8 mm)
- Maximum Press Bed Width: 33 in (838.20 mm)

Camera Detection and Inspection of Parts:

- In-process and post-process camera vision systems (2-D and 3-D camera detection and inspection)
- Safe launch procedures

Appropriate for delicate/thin material components: reel-reel or loose piece terminals, pins, shields, contacts, etc.

BRUDERER HIGH-SPEED STAMPING VIDEO

Bruderer press running at 1,300+ strokes per min (SPM) with an automatic take-up winder and camera vision system and sensors for 100% quality assurance.

ASSEMBLY & MANUFACTURING

Assembly Processes:

- Automated In-Die Assembly
- Automated Robotic Assembly
- Secondary Semi-Automated Assembly
- Threading
- Staking
- Tapping
- Hardware Insertion
- Stacking
- Joining
- Welding
- Riveting

Assembly Hardware:

- Plastic Pieces
- Metal Inserts
- Fasteners
- Screw Machine Parts
- Pemserts
- Bushings
- Nuts / Studs

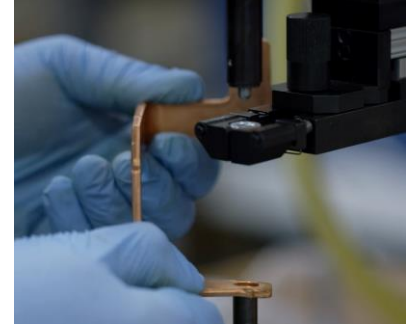

Camera Detection and Inspection of Parts:

- In-process and post-process camera vision systems (2-D and 3-D camera detection and inspection)
- Safe launch procedures

Appropriate for custom manufacturing and developing components

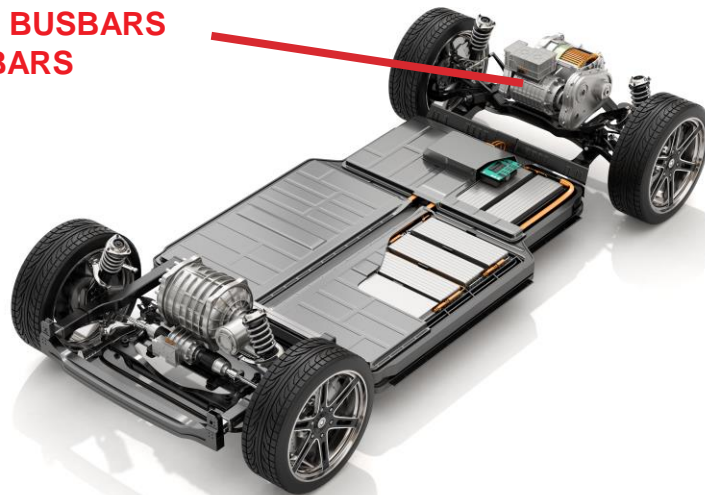

ROBOTIC AUTOMATION & HARDWARE INSERTION FOR PRODUCT ASSEMBLY

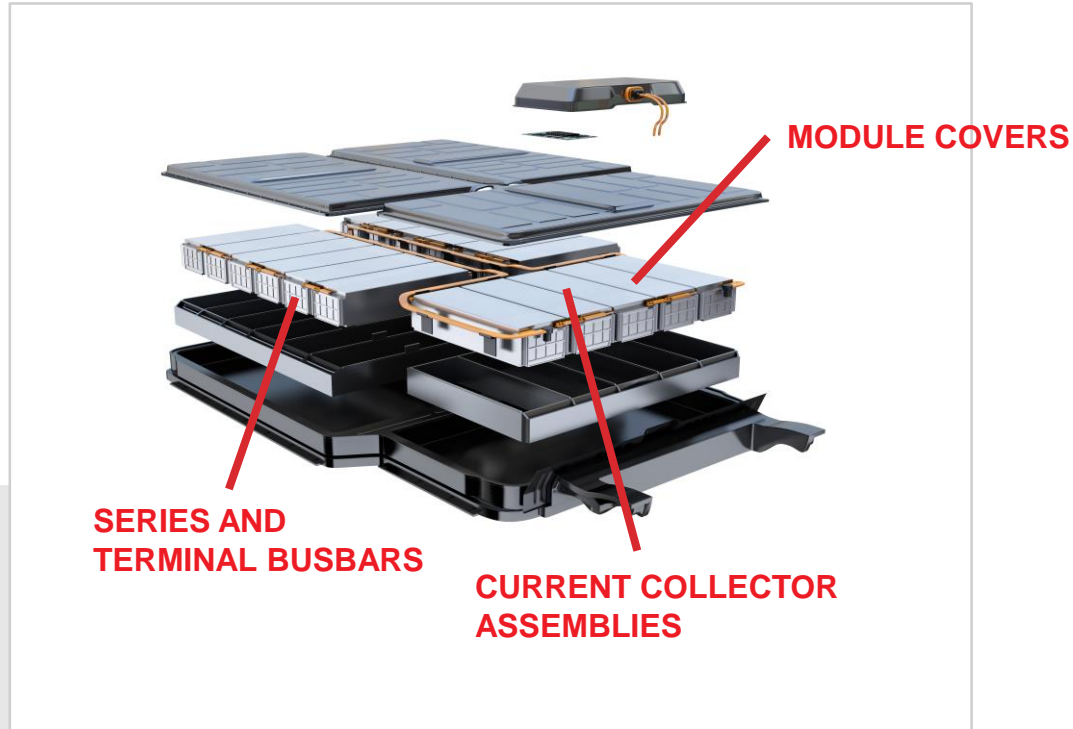

EV BATTERY PACK AND BATTERY COMPONENT MANUFACTURING

- INVERTER BUSBARS
- BDU BUSBARS

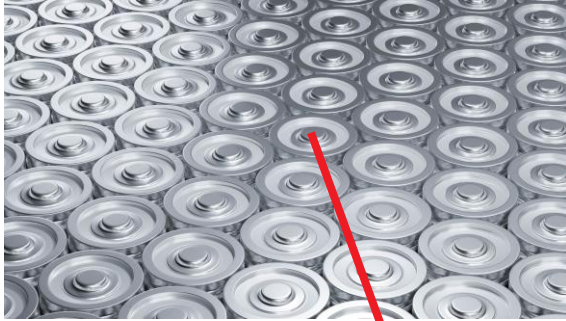

BATTERY PACK MODULE & SUB-MODULE PRODUCTION

FOR EV BATTERIES

BATTERY CELL COMPONENT PRODUCTION

- CATHODE COLLECTORS
- ANODE COLLECTORS
- BATTERY CAN LIDS

BATTERY PRODUCTION OPERATIONS

- **Stamping and forming of parts**
 - Progressive-die heavy and high-speed stamping systems
 - Transfer stamping systems
- **Plating and surface coating of parts**
- **Robotic joining and assembly of parts**
 - Welding systems
 - Bonding systems
 - Glue stations
 - UV Curing systems
 - Rollout stations
- **Automated material stacking and layering processes**
- **Camera Detection and Inspection of Parts**
 - In-process and post-process camera vision systems (2-D and 3-D camera detection and inspection)
 - Safe launch procedures
- **Automated cleaning of parts**
- **Automated packaging and laser marking of parts**

EMOBILITY AND EV BATTERY TECH COMPONENTS

High current, thick copper battery busbars with PEMnut fasteners

Copper busbars with Dielectric insulated materials (epoxy powder coating and heat shrink tubing) with PEMnut fasteners

Battery eyelet terminals and wire cable connectors

Power pack terminals and contact inserts

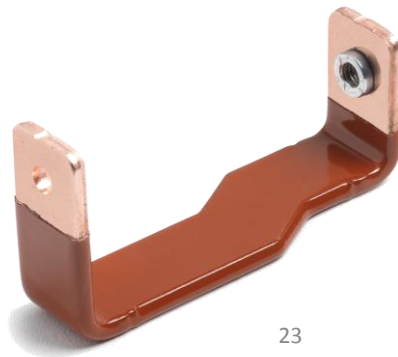

Shields and terminals for electric connector plugs

Terminals, tabs and connector contacts

High current, thick copper battery busbars with tin plating and PEMnut fasteners

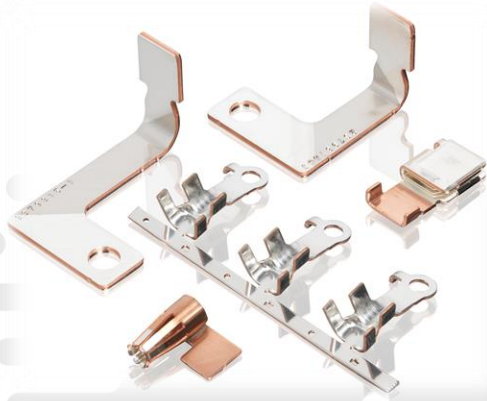

VALUE-ADD CAPABILITIES

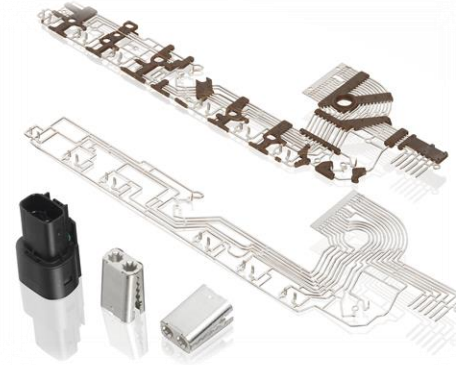

PRE- AND POST-PRODUCTION PROCESSES

Precious Metal Plating:

We offer a range of pre- and post-plating options for metal stamping assemblies to allow for corrosion protection, electrical conduction, decorative use, wear resistance, coloring, bonding, and lubricity.

Insert Molding, Injection Molding and Overmolding:

Surface Coating Applications:

Stampings may require a surface coating for dielectric insulation, application environment protection, heat and extreme temperature protection, abrasion protection and corrosion protection in various electrical applications.

PRE-PRODUCTION SERVICES

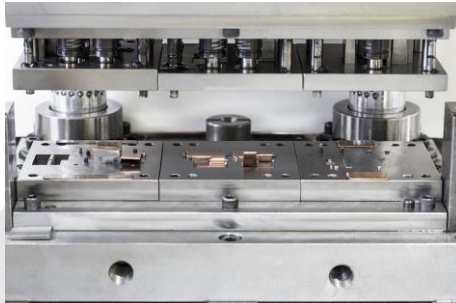

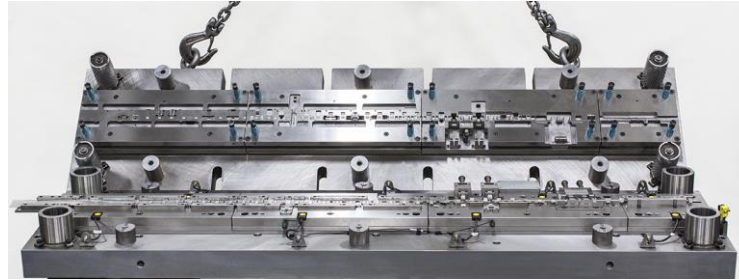

Tool & Die Design and Manufacturing

Die Design

- We utilize the most sophisticated 3D CAD modeling system in the industry, Siemens NX, to design and debug progressive dies on screen.

Die Manufacturing

- We produce our tools in-house using top technology such as wire EDM, CNC machining, optical profile grinding and waterjet cutting.

Rapid Prototyping

Part Development and Testing

- We test design concepts at early phases of part development to perfect part designs and prevent mass production issues.
- We determine feasibility of manufacturing part designs
- We offer recommendations on best suited materials, appropriate manufacturing technology and design modifications for parts and tools

WATERJET

Waterjet Cutting

Tooling Applications

- We utilize waterjet for efficiently cutting custom die sets and blocks for in-house tool making

Production Applications

- We have invested in waterjet cutting technology as an alternative manufacturing method that produces quick and cost-effective parts for many applications without the need for tooling design and production.

Prototype Applications

- We can cut out prototype parts with thicker materials using waterjet

QUALITY ASSURANCE & EFFICIENCY

WIEGEL: A REPUTATION BUILT ON QUALITY

Our Quality:

- Engineers can design and run tools in a virtual production simulation to debug the production process
- Tooling Department integrates quality detection sensors into the tools that ensure quality during tool try-out and final production
- Camera vision systems incorporated at the press
- We conduct in-process inspection, capability studies, quality lab tests and safe launch procedures

QC Equipment:

- Zeiss CMM
- OGP Smart Scopes
- Keyence Vision Systems
- ATOS Laser Measuring System
- In-Die Sensors and Camera Vision Systems

Predictable Production:

- Feasibility study at the beginning of every production program
- Process failure mode and effects analysis (PFMEA) conducted to prevent failures and ensure error-free production process

Strict Supplier and Partner Selection:

- All material suppliers and subcontracted vendors go through a strict supplier qualifying and approval process.

Packaging & Delivery:

- Follow specific packaging instructions provided by our customers
- All packaging options are properly secured onto skids or pallets and edge protected on all sides. Packages are banded and stretch wrapped to make sure parts adhere to the skid to prevent movement from the skid or damage during transit.

SOPHISTICATED QUALITY CONTROLS & EFFICIENCY

Automated Inspection

In-Line/Off-Line Vision Systems

- 100% quality off the press

Die simulation software

- Reduces debug and die try out.

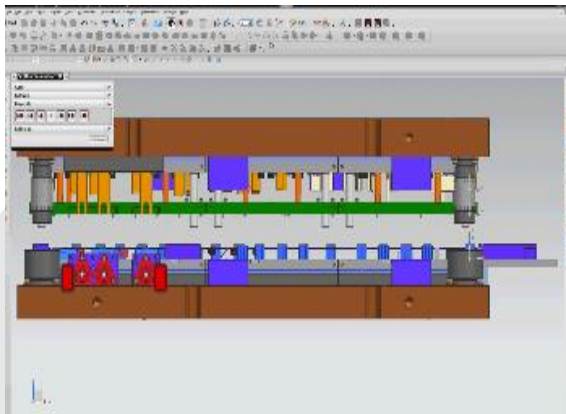

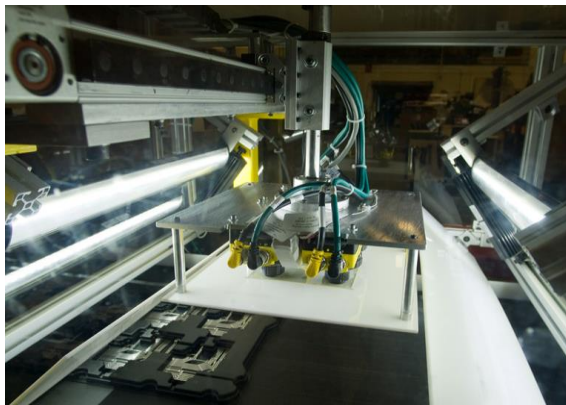

Press Monitoring System

Shop Floor Connect

- Real-time Production Monitoring

In-Tool Monitoring

- Sensors
- Tonnage meters
- SPM control

MOBILE VISION SYSTEM (MVS)

MVS Capabilities:

- Capable of inspecting flat and/or formed parts
- Precise measurement and inspection at very high speed
- Data collection
- Low angle light enabled for greater detection of surface imperfections
- Back-lit to enhance contour (missing features, extra features, slivers)

450 strokes per min (SPM)

1300 strokes per min (SPM)

QUALITY CERTIFICATIONS

ISO 14001

ABS Quality Evaluations

Certificate Of Conformance

This is to certify that the Quality Management System of:

Wiegel Tool Works, Inc.
935 North Central Avenue
Wood Dale, IL 60191
U.S.A.

(WITH ADDITIONAL FACILITIES LISTED ON ATTACHED ANNEX)

has been assessed by ABS Quality Evaluations, Inc. and found to be in conformance with the requirements set forth by:

IATF 16949:2016

The Quality Management System is applicable to:

**MANUFACTURE OF METAL PROTOTYPES, STAMPINGS AND PRODUCTION ASSEMBLY
EXCLUDING PRODUCT DESIGN - IATF 16949:2016, CLAUSE 8.3**

Certificate No: 38104
Effective Date: 11 June 2021
Expiration Date: 10 June 2024
Revision Date: 19 August 2022
IATF No: 0404563

Dominic Townsend, President

Validity of this certificate is based on the successful completion of the periodic surveillance audits of the management system defined by the above scope and is contingent upon prompt written notification to ABS Quality Evaluations, Inc. of significant changes to the management system or components thereof.
