*Commitment to Excellence.*

**PERFORMANCE AND SAFETY DRIVEN**

# COMPANY OVERVIEW

---

*Trans 99 Logistics was founded in 2007, and is headquartered in Guelph, Ontario. Trans 99 is a leading-edge asset-based logistics provider. We offer a comprehensive suite of supply chain solutions, providing transportation, value added, intermodal and specialized services, internationally.*

## ➔ **Our Mission**

*The Trans99 mandate is to integrate our core values of Focus, Service, Capacity and Safety with our customers to optimally meet the demands of their Supply Chain and Logistics Challenges.*

## ➔ **Our Vision**

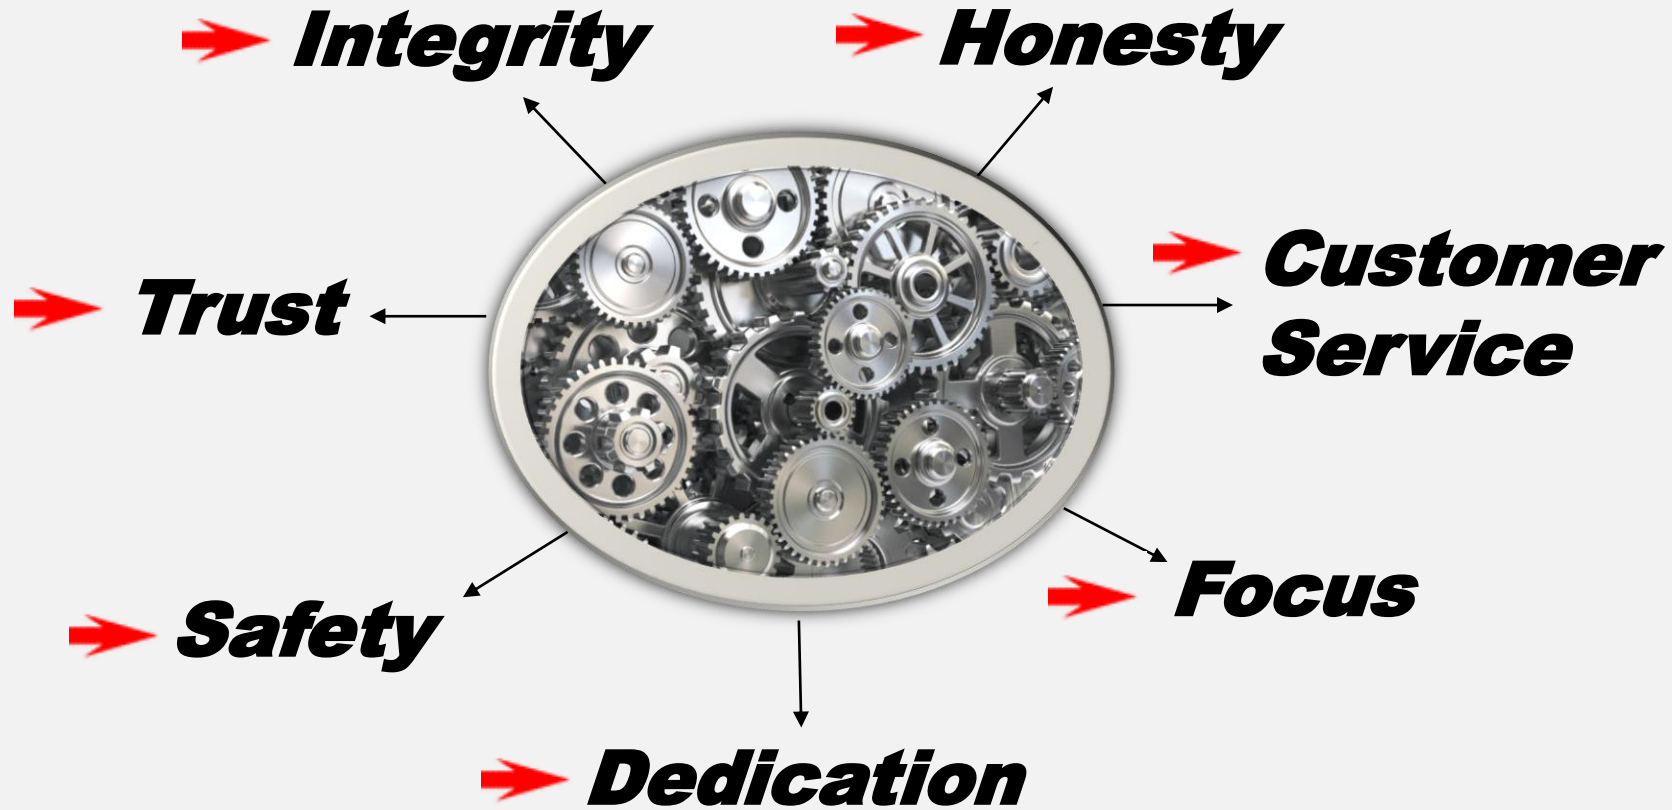

*Our primary objective is to carefully expand our company, while increasing our marginal effectiveness towards offering savings to our customers by significantly improving the efficiency of their transportation and supply chain needs. We are a management company, designed to create long term dedicated business partnerships based on mutual trust. Trans 99 takes pride in providing improved customer service, communication, and a focus in best-practice methodology in our operations execution. Trans 99 Logistics, a Commitment to Excellence.*

# EQUIPMENT – TRACTORS

- ➔ 250+ Asset-based truck fleet, running under Trans 99 authority.
- ➔ Sleeper-Cabs, Day-Cabs, and Shunt Trucks.
- ➔ Average truck age under 4 years, and under stringent maintenance schedules.
- ➔ All trucks have onboard ELD based, Satellite tracking systems.

PERFORMANCE AND SAFETY DRIVEN

# EQUIPMENT – TRAILERS

- ➔ 700+ Trailer Fleet of conventional 53' dry van trailers. Average age 4 years.
- ➔ Majority of Trans 99 trailers have **COMPOSITE FLOOR**: highly optimal for applications such as automotive parts shipments. Composite flooring reduces exterior moisture absorption, which keeps the trailer interior as dry as possible for sensitive materials.
- ➔ 45+ specialized 53' trailers compliment our equipment inventory including reefers, super-vans, flat-beds and curtain-sides.

# TECHNOLOGY

---

*Trans 99 realizes the absolute need for advanced technologies to deliver applications to customers, and meet the demands of the logistics industry. We employ a balance of vendor provided and proprietary applications to assure we are flexible in the ability to meet customer requirements. Trans 99 employs a team of IT professionals who can customize or build application solutions which can fully integrate with our customers' systems.*

- ➔ **Integrated driver management and safety systems, to assure a safe, secure, and compliant fleet.**
- ➔ **Full EDI integration into our transportation and value-added service systems.**
- ➔ **Full EDI integration into customer ERP systems.  
GPS based technologies to provide real-time data interfaces.**
- ➔ **Development of Customer-specific web portals for tracking of defined metrics.**

# QUALITY

*By integrating technology into the daily operations, Trans 99 has also integrated sophisticated error-proofing methods into our quality management. Managers, supervisors and operators are thoroughly trained, tested and continuously involved in improving our performance and eliminating errors throughout the system resulting in a remarkable value for our customers.*

- ➔ **Managing our quality begins with each new opportunity. Process and work instruction development is a crucial part of our new business launch planning.**
- ➔ **Trans 99 incorporates best practices from each of our diverse operations segments, into the development of quality management systems for each.**
- ➔ **This practice also provides control of critical documents and process management. Managers and trained internal auditors meet regularly to ensure best practices throughout the company.**
