

FASCO INC.

SECURING THE FUTURE, CONNECTING THE WORLD™

Founded in 1978, Fasco started with humble beginnings as a regional nut and bolt distributor. After nearly 40 years, Fasco has grown into a world-class comprehensive fastener and component supplier serving OEM customers located on five continents.

We supply custom “made-to-print” fasteners as well as standard industrial fasteners. Our broad product offering makes Fasco a convenient “one stop shop” for any customer’s assembly needs.

Our headquarters are located just outside of Chicago in Alsip, Illinois, where we manage parts (and programs) produced by our supply chain partners in Asia (predominantly Taiwan) and North America.

QUALITY MANAGEMENT SYSTEM

Our commitment to quality begins with our global supply chain. We strategically partner with suppliers that are just as dedicated to quality as we are.

We've ensured our Quality Management System is up-to-date and currently hold ISO 9001:2015 certification and ISO/IEC 17025:2017 accreditation.

- ⑥ Fasco's quality system incorporates automotive level quality tools such layered process audits (LPA), process failure mode and effects analysis (PFMEA), as well as gage repeatability and reproducibility (GR&R) studies.
- ⑥ Our factories are capable of providing full level 3 PPAP submissions, performing statistical process control (SPC) and process capability analysis, as well as AIAG CQI assessments for secondary processors.
- ⑥ Our system for the new product introduction process utilizes methodologies such as APQP to assure quality is built into the product.
- ⑥ Inspection in accordance with industry standards published by IFI, ASME, ASTM, SAE, ISO, DIN, & JIS.

Main Products

⬠ Nuts

⬠ Rivets

⬠ SEMS

⬠ Bolts

⬠ Screws

⬠ Washers

◊ Studs

◊ Rings

◊ Pins

Automotive Applications

- ⊕ Automotive/ Transportation
- ⊕ Steering
- ⊕ Brake Assemblies
- ⊕ Commercial Truck
- ⊕ Electrical Systems/ Wire Harnesses
- ⊕ Interior

Industrial Applications

- ⊕ Furniture
- ⊕ OEM
- ⊕ Appliances and Consumer White Goods
- ⊕ Mounting Systems
- ⊕ Lawn & Garden
- ⊕ Tools & Storage
- ⊕ Construction/ Building Products

Services

Dock to Stock

With DTS services, you consciously bypass your normal receiving inspection, which is no issue with our history of providing quality products and accurate shipments. This track record has allowed us to achieve DTS status with many customers.

Kanban

We customize our KANBAN programs to your needs to make sure your inventory matches your rate of production.

VMI (Vendor Managed Inventory)

Fasco offers Vendor Managed Inventory (VMI) programs tailored to meet your objectives. Our VMI programs reduce direct costs (such as part cost or cost of stock-outs) as well indirect costs (such as overhead, administrative and accounting). Furthermore, inventory turnover is increased, thereby positively impacting cash flow.

JIT

Fasco's Just-In-Time (JIT) shipping programs allow you to receive raw materials exactly when you need them. JIT uses blanket-ordering to reduce or eliminate the need for safety stock at your location(s). Our accurate planning and scheduling allows you to place larger orders less frequently, significantly reducing admin time and costs, while receiving your orders as needed.

EDI

As the world becomes more digital, businesses must quickly adapt to ever-evolving changes. Our Electronic Data Interchange (EDI) service allows for live communication between our companies for effortless MRP, ASN, invoicing, and any other data exchange needs.

Packaging/Kitting

For your packaging and assembly line needs, Fasco offers in-house custom bagging, kitting and sub-assembly services. We help streamline production by reducing inventory, packing errors, waste, and cost. We offer multiple quality inspections and have the capacity to meet temporary or long-term changes in demand.

Our printing capabilities include customized graphics, lot codes, date codes, bar codes, serial numbers and logos.

Suppliers

Global Reach

Our world class supply chain and warehousing capabilities allow us to stock and ship products at competitive prices around the world.

Broad Product Offerings

We streamline your purchasing process by supplying all of your Class C component requirements.

Diversified Supplier Network

We source around the globe to ensure a stable supply chain and minimize the risk of material inavailability.

Cost

By stocking products and leveraging a competitive bidding strategy, Fasco reduces both your direct and indirect costs to bring you the best value.

Improve:

Customer overhead

Inventory outages

Forecasting

Logistics

Fasco is a C-TPAT certified company, which means that by working with us, your products will get:

Expedited clearance across the Canadian and Mexican U.S. borders

Reduced time and cost at U.S. Customs

Priority access into the U.S. in the event of a national emergency
