

Corporate Presentation 2024

About

Nearshore Mexico Sourcing (NMS) is a consulting firm specialized in helping companies from North-America and Europe to develop and sustain a reliable manufacturing base in Mexico.

NMS provides liaison services to OEM's, brand owners and distributors to develop strategic relations with cost-effective, quality driven Mexican manufacturers.

NMS is headquartered in Guadalajara, with associates in Monterrey, Mexico City, Queretaro, Puebla, Torreón, and Cd. Juarez.

What we do

At NMS, we offer our clients a broad range of services to cover all of their manufacturing needs, from supplier selection to price negotiation. Among the many services we offer, we will:

- Actively engage with our client on commercial, technical and quality level to thoroughly understand their needs.
- Use expert sourcing acumen to locate the most suitable manufacturing solution.
- Supplier vetting, factory audits.
- Drive price negotiations, pilot runs and quality control during production and/or before shipping.
- Serve as a remote resource providing consulting services and advisory support to avoid logistical, legal and fiscal roadblocks.

Why nearshoring in Mexico?

In today's volatile global economy, there are many benefits to nearshoring to Mexico vs offshoring elsewhere. Developing a supplier in Mexico enables your business to:

- Cut cost and enhance speed to market
- Gain oversight and improve quality control
- Improve communication due to similar time zones
- Increase control of supply chain and IP
- Visit manufacturing sites more frequently and easily

Working with NMS makes the transition to nearshoring a breeze, from supplier selection to routine factory audits. Never worry about language barriers or supply chain issues again – we have you covered.

Faster Production and shipping lead times

**Reduced landed costs
Reduced reject rates**
