

A new global polyolefins leader

Borouge International is a new global polyolefins leader formed from the combination of Borouge, Borealis and NOVA Chemicals. Bringing together global scale, premium technologies, strong legacy and deep application expertise, we deliver flexible, dependable access to high-quality materials where and when your business needs them.

Essential materials,
advancing the world

Powering innovation in society's most essential industries

Protecting and preserving the items **people and businesses rely on every day**

Strengthening **essential systems** that keep water, energy and data flowing

Supporting reliable, **more efficient energy systems** and advancing the shift to lower-carbon solutions

Making mobility **lighter, more efficient and more durable** across automotive applications

Materials engineered for **specialized, high-performance** applications across critical sectors

Leading globally, delivering locally

Reliable, resilient supply of high-performance polyolefins to support customers wherever they operate.
