

WELCOME TO

OUR COMPANY

HISTORY

MYGSA (aka: MAQGEN) was founded in 1985 in Monterrey, Mexico. Operating as a family-owned machine shop, offered its services mainly to general public. Later, we specialized on mid to high production of gears for various profiles and industries.

FICOSA was funded in 1998 as a sister company of MYGSA, to complement our services, strongly entering to the CNC machining market.

FACILITY

On June 2016 FICOSA moved to a new manufacturing facility in Ciénega de Flores, Nuevo León.

On 2024 we moved all gear manufacturing capability from MYGSA to FICOSA to focus on production jobs, increasing our capacities and capabilities.

FACILITY SIZE

Total Land:
26,014.7 m²
(280,023 ft²)

Available Land:
8,700 m² (93,743 ft²)

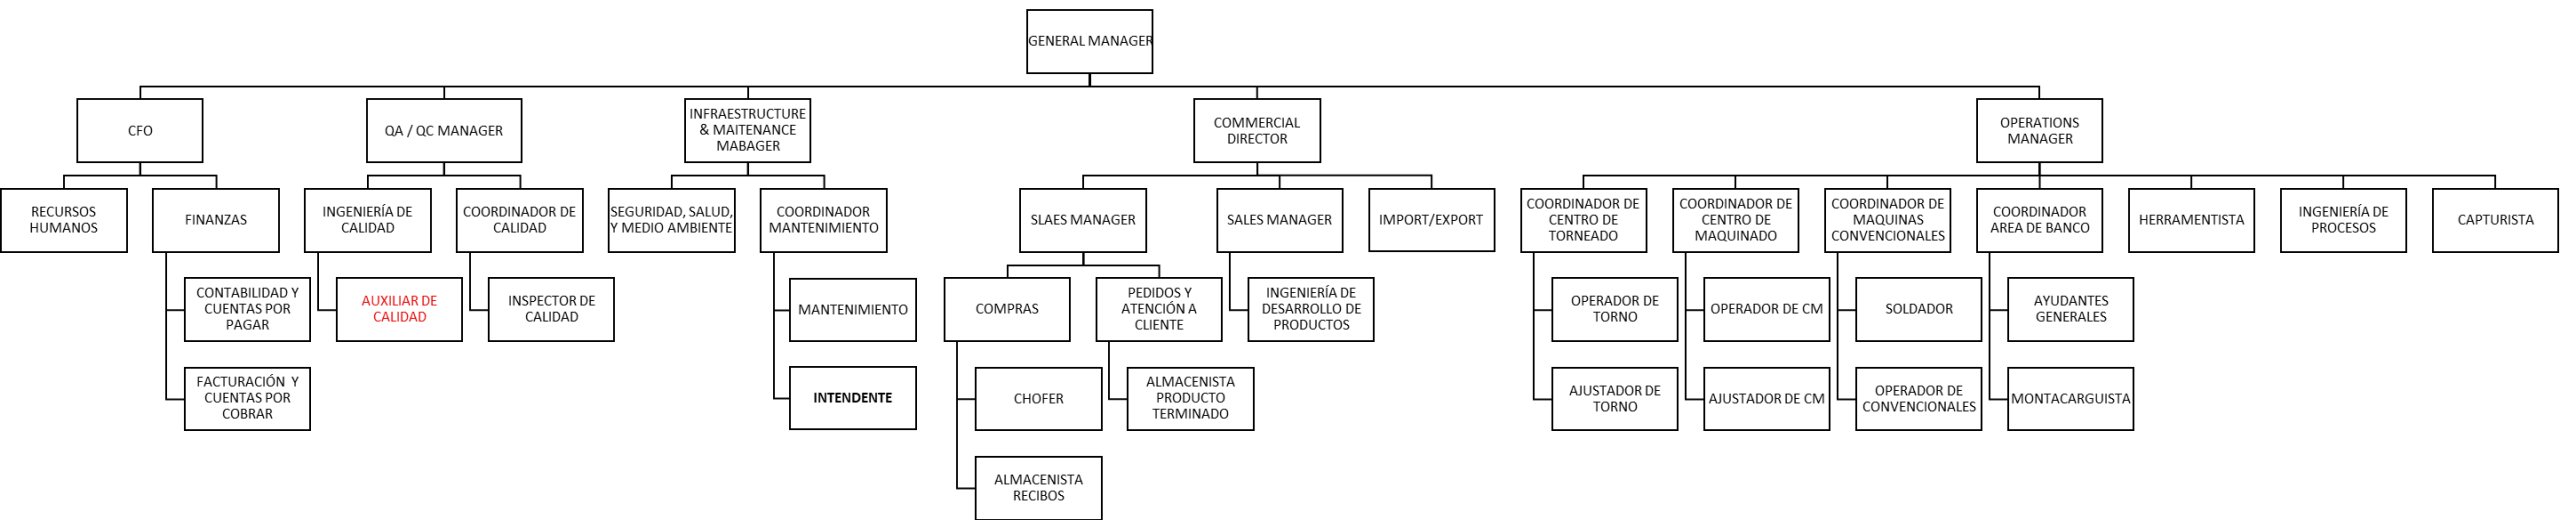

Shop Floor:
7,728 m² (83,184 ft²)

Office + Kitchen/Dining room:
782 m² (8,417 ft²)

ORGANIZATIONAL CHART

HUMAN RESOURCES

FICOSA HAS OVER 170 EMPLOYEES - 2 SHIFTS, Monday - Saturday

To be able to achieve the quality in their products FICOSA continuously trains its personnel with the determination of offering a better service.

We have also implemented this learning program, so our operators can develop new skills and upgrade their category.

CERTIFICATION

FICOSA has developed and implemented a Quality System based on the compliance of the international standard, ISO-9001: 2015, to satisfy our customer's requirements through efficient process controls, and continuous improvement.

We are ISO 9001 certified since 1998.

QUALITY POLICY

"PROVIDE SERVICES AND SOLUTIONS FOR THE MANUFACTURE OF INDUSTRIAL PARTS, ACHIEVING THE SATISFACTION OF ALL OUR CUSTOMERS, PROVIDING PRODUCTS THAT MEET THEIR NEEDS, EXPECTATIONS AND WITH THE APPLICABLE LEGAL REQUIREMENTS, COMMITTED TO CONTINUOUS IMPROVEMENT."

CERTIFICATE

인증서

CERTIFICATE
The Certification Body
TÜV SÜD América de México, S.A. de C.V.
with operations at
San Pedro Garza García, Nuevo León; México
hereby certifies that the Organization
Fabricaciones Industriales Computarizadas
Avenida Texas #360, Parque Industrial Nacional,
Ciénega de Flores, Nuevo León; México. CP. 65550
has established and applies a Quality Management System
with the scope:
Manufacture of industrial parts.
Further clarifications regarding the scope of this certificate and the No applicability of ISO 9001:2015 requirements may be obtained by consulting the organization.
According with the audit report number MX 950 14 531 the audit team verified the implementation and effectiveness of the requirements of the international standard
ISO 9001:2015¹

Registration Number : 10 950 362

PROCESSES

We have experience machining different materials from round bar stock, flat bar, castings, and plate.

Materials that we use include:

CARBON STEELS	1018, 1020, 1026, 1045, 11L14, 1144, 4140, 4130, 4340, 8620, ETC
STAINLESS STEELS	300 SERIES, 400 SERIES, NITRINIC 50
TOOL STEELS	W1, D2, O1
IRON	DUCTILE, NODULAR, NI-RESIST
ALUMINUM ALLOYS	6061, 6063, 2011, 2024, 7075, 1100
BRASS	C36000, 332
BRONCE	C95400, SAE 660, C54400, C65500
COPPER ALLOYS	C11000, C18200
SUPERALLOYS	INCONEL 718, HEINZ 282, MONEL 400
ENGINEERING PLASTICS	DELTRIN, TEFLON, NYLAMID, MICARTA

PROCESSES

TURNING

19 CNC Lathes

The capacity in CNC lathe is up to $\varnothing 32''$ in vertical turning. And shafts up to 53'' length.

Experience with different threads including ANSI, ISO, API, ACME, STUB ACME, NPT, BSPT

PROCESSES

MILLING

31 Machining Centers

We have Vertical and Horizontal Machine Centers, most of them equipped with 4th Axis.

For higher volume parts, we use machine centers with double pallet to decrease setup costs.

PROCESSES

GEAR MANUFACTURING

We can make, spurs, helical, bevel, worm gears, racks, and internal splines

The capacity is up to 2.5 m Diameter. AGMA 8 Quality level.

PROCESSES

Additional processes we offer:

Broaching - Cylindrical Grinding - Bandsaw cutting - TIG & MIG welding - Brazing - Sand Blast - Minor Assemblies

QUALITY CONTROL

Quality measures the first part of the setup and the first part of every shift. Operator inspects during process, and quality performs a final inspection before packing, to ensure that our final product meets all the tolerances and requirements the designer intended on the drawing. Inspection records and other certificates are maintained on our server.

We utilize a CMM machine, Optical comparator, Surface Roughness tester, among other precision equipment to have the certainty that our products meet a guaranteed quality.

CPK studies can be performed when requested by our customer.
