

KUS combines global vertically integrated manufacturing with application-focused design and validation to support off-highway, commercial, and electric vehicles

Plastics Assemblies (Blow, Roto, and Injection Molded)				DEF / SCR Systems			
Coolant & Expansion Tank Assemblies	HVAC Ducts	Panels & Covers	Fuel Tank Assemblies	DEF Sending Unit	DEF Tank Assebmly	Heated DEF Lines	
							
Fluid Management & Sensors				Thermal Management & Electrification			
Reed Switch Level Sensor	Multi-Function Level Sensor	High Accuracy Level Sensor	Fuel & Coolant Lines	Coolant PTC Heater	Air PTC Heater	Cold Plate	Battery Thermal Management System
							

Competitive Advantage

- Vertically integrated manufacturing and design
- Global manufacturing and support footprint
- Majority of key components produced in-house
- In-house tooling design and manufacturing
- Validation and testing laboratories
- Highly flexible production capabilities
- In-house automation design and development
