

ARBOMEX COMPANY PROFILE

2026

IRON ENGINEERING. PRECISION DELIVERED.

Who We Are

ARBOMEX is a Mexican manufacturing company specialized in iron casting and precision machining for the automotive, MHCV, and industrial sectors. With decades of experience, we integrate engineering capability, process control, and advanced inspection systems to supply critical iron components for **powertrain systems, driveline applications, HVAC systems, and outdoor power equipment**, among others.

Operating across our facilities in Celaya and Apaseo, Guanajuato, Arbomex manages every stage — from initial concept and tooling to full-scale production, secondary operations, and final inspection. Certified under **IATF 16949 and ISO 14001**, the company has proven experience serving **Tier 1 and OEM customers** across North America.

Markets and Segments

From process design to production, we work closely with our customers to ensure productivity, reliability, and consistent component performance

IRON COMPONENTS

Our iron casting and machining operations support a range of automotive and industrial applications. We produce components for **powertrain systems**, primarily engine-related parts, as well as for **driveline systems**, including differential housings. Additional segments include **HVAC and outdoor power equipment**, all requiring durability, dimensional accuracy, and stable manufacturing processes.

Company Strengths

Main processes

**Foundry & Machining
manufacturing expertise**

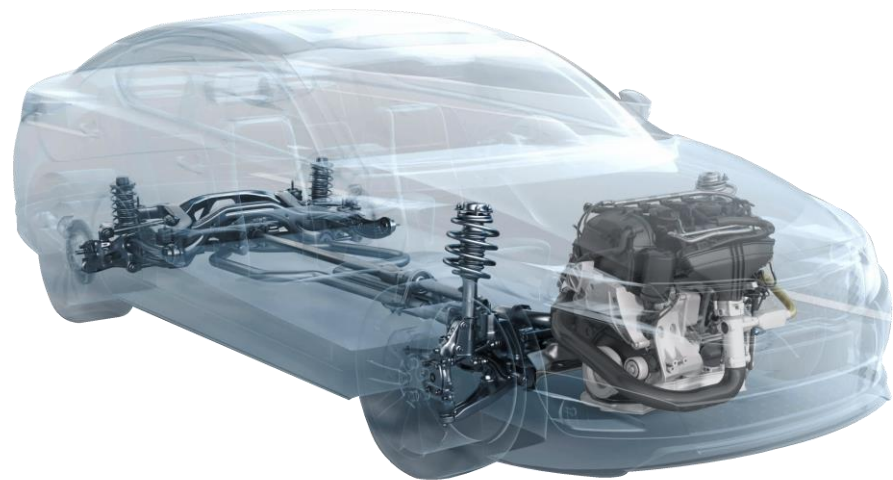

**Vertical Integration
casting & machining**

**Integrated Synergies
Iron and Steel**

Market Share & Manufacturing Facilities

≈10% Engines assembled in North America contain Arbomex components

Note: Market share data is exclusively for powertrain components and is based on information from S&P Global Mobility as of January 2025, excluding the production of battery electric vehicles (BEVs).

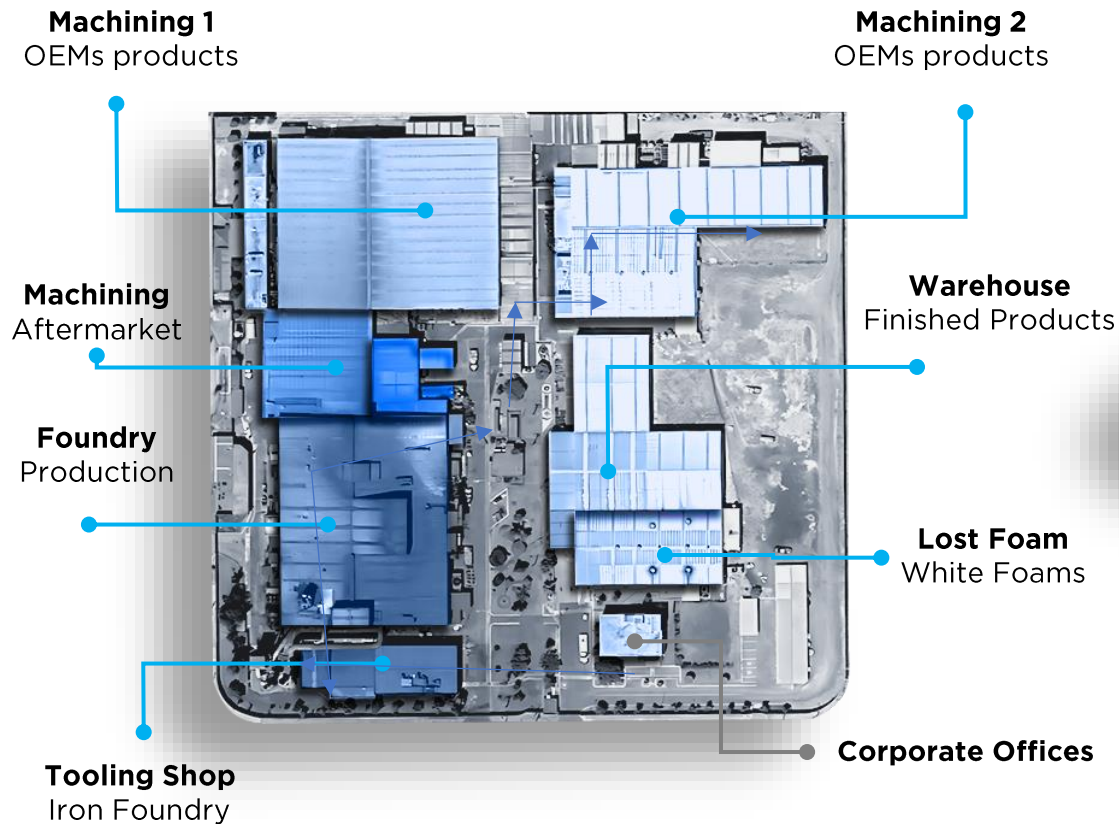

Available for expansion

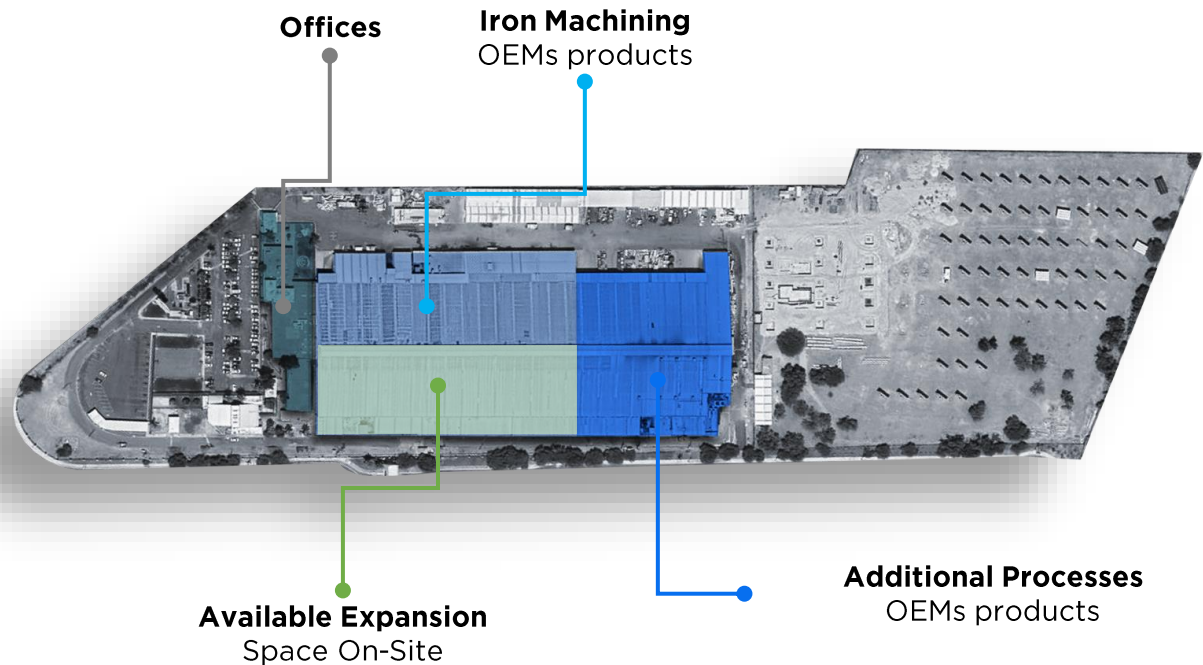

Facility Layouts & On-Site Expansion Capacity

Both sites include on-site capacity for future expansion, allowing flexibility to support new programs or increased production needs without requiring additional locations

Celaya Manufacturing

Apaseo el Grande Manufacturing

Manufacturing Capabilities

Foundry & Machining

3 Molding **processes**
No Bake, Lost Foam, Stack Molding

Ductile and Gray Iron

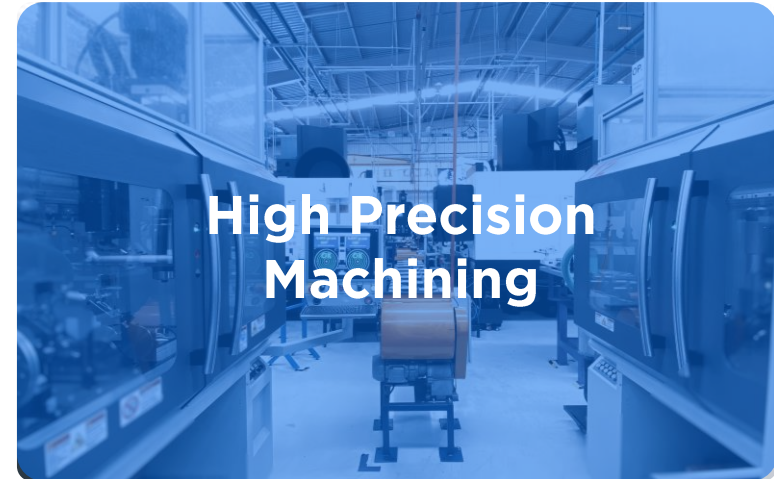

Melting capacity: 72k Tons/yr

2 induction furnaces dual track

Casting & Near Net Processes

Iron Foundry

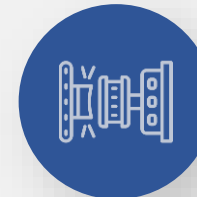

**High Precision
Machining**

Dedicated lines

More than 800 assets

CNC Turning and Machining Centers

Controlled Heat Treatment Processes

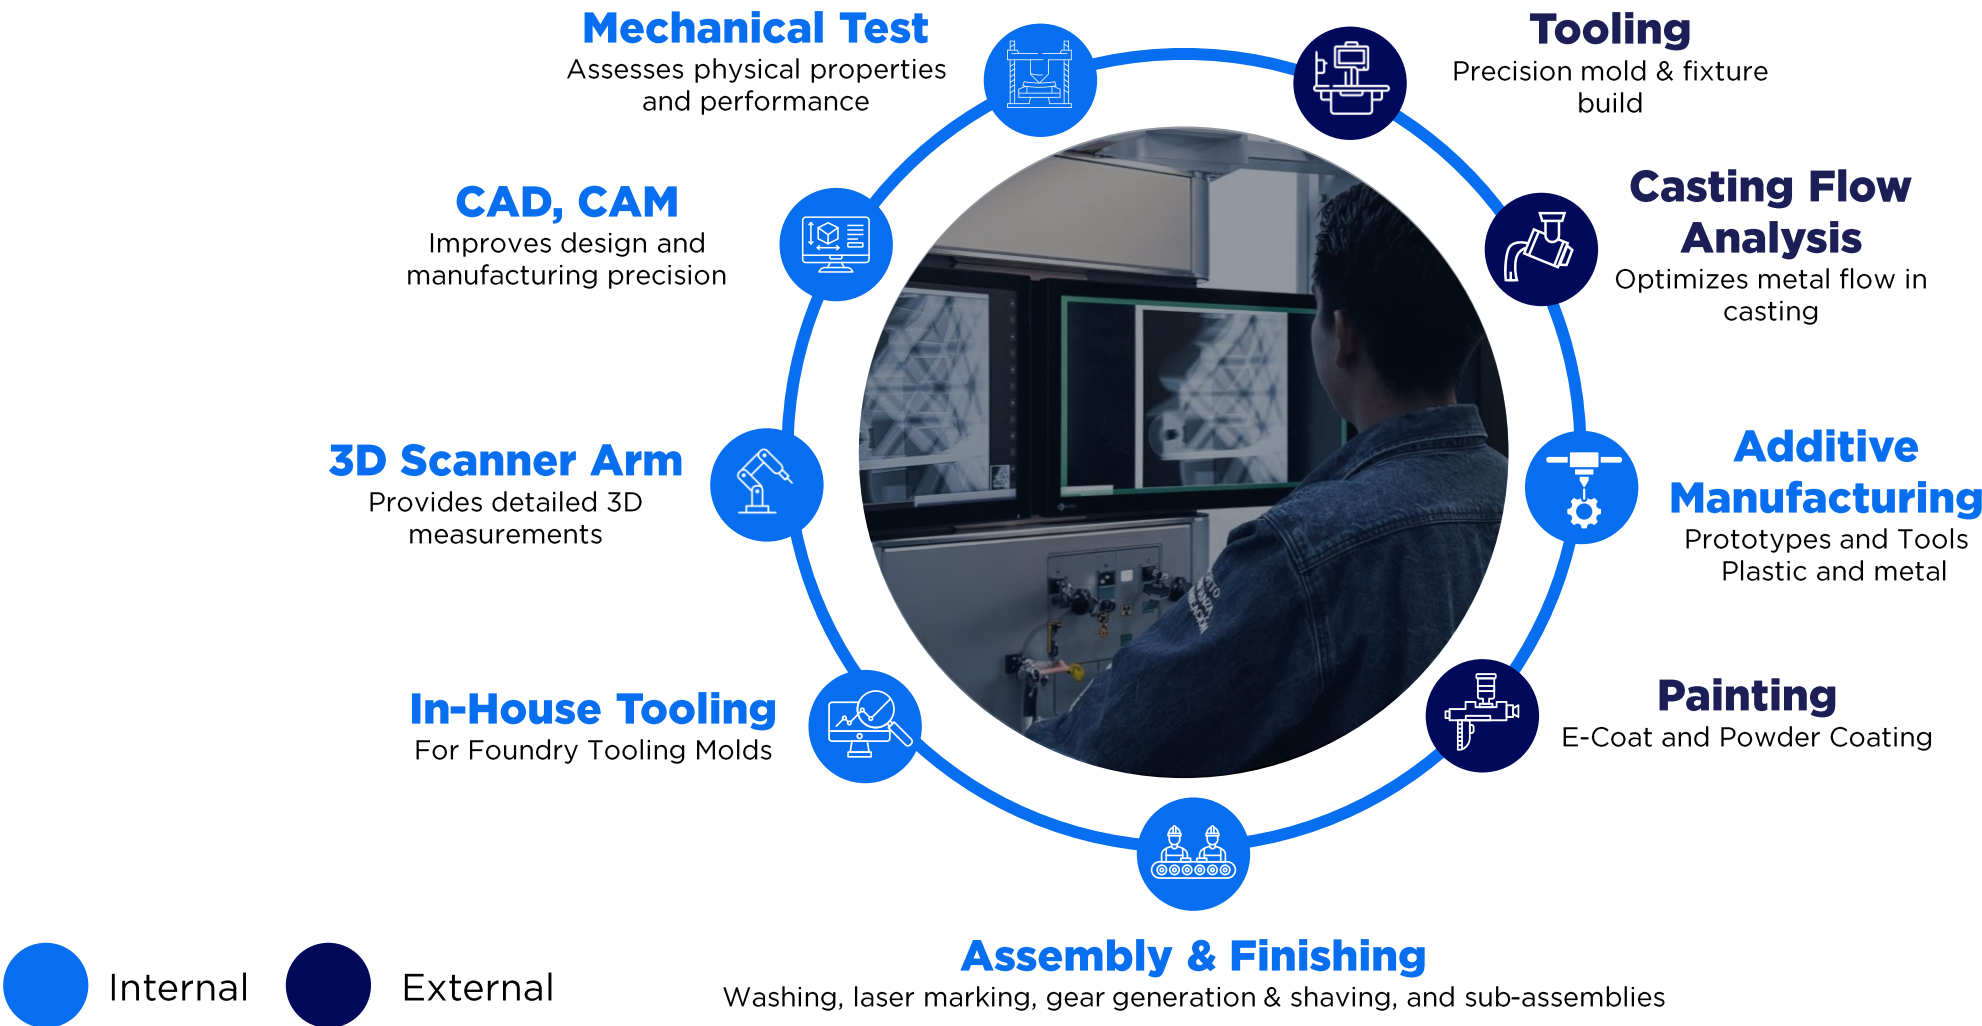

Precision Grinding Systems

Complete Traceability for Performance

Consistency through controlled processes

Other Capabilities

Internal and external competences

Products Portfolio

By Segments

• IRON FOUNDRY

NOTE: Not all applications are included

Trade Compliance & Certifications

From raw material sourcing to final manufacturing, our processes are designed to **comply with origin rules** — ensuring seamless trade qualification and continued alignment with customer and regulatory expectations in North America.

■ **IATF 16949:2016**
We proudly meet global standards, demonstrating our commitment to quality, efficiency, and continuous improvement.

■ **CTPAT**
Since 2009, CTPAT supported our commitment to providing reliable, efficient, and high-quality solutions to our customers while upholding high-security standards at all our supply chain stages.

■ **ISO 14001:2015**
This international standard supports our commitment to sustainability and responsible environmental management. It reflects our dedication to implementing best practices to achieve our goal of reducing our GHG emissions by 50% by 2035.

■ **Q1 BY FORD**
This distinction awarded by Ford Motor Company reflects our commitment to the highest standards of quality and excellence in every aspect of our operations.
